Deep-Sky Companions: The Caldwell Objects Stephen James O'Meara,2016-09-26 The Caldwell Catalogue, compiled by the late Sir Patrick Moore (1923-2012), has delighted amateur astronomers worldwide since its publication in 1995. Twenty years on, Stephen James O'Meara revisits his guide to these 109 deep-sky delights, breathing new life into them and the 20 additional observing targets included as an appendix. This second edition retains O'Meara's detailed visual descriptions and sketches, accompanied by stunning new images taken by amateur photographer Mario Motta and observations by Magda Streicher. The astrophysical descriptions have been updated to account for the many advances in our understanding of the objects, not least due to an armada of space-borne observatories and the new technologies used in large ground-based telescopes. Ideal for observers who have completed the Messier objects and are looking for their next challenge, *Deep-Sky Companions: The Caldwell Objects* is a fitting tribute from a renowned visual observer to one of astronomy's most famous personalities.

Catalhöyük Excavations Ian Hodder,2023-02-22 This volume discusses the main excavations at Neolithic Catalhöyük East undertaken from 2009 to 2017. The site is well known because of its large size, elaborate symbolism and wall paintings, and long history of excavation. This volume covers the last period of excavation directed by Ian Hodder in the North and South Areas of the site. It also describes the work conducted in the GDN Area on the later phases of occupation. The main aim of these excavations was to understand the layout and social geography of the settlement (both houses and open areas) and to situate the elaborate art and symbolism within a secure architectural and depositional context. Excavation and conservation methods are described and the campaign of geophysical prospection is described. Considerable focus is placed on detailed dating using Bayesian modeling that alters significantly our understanding of the organization of the settlement. New light is thrown on the degree of contemporaneity of buildings and on the continuities and breaks in house occupation and in the site as a whole. A fuller understanding has also been reached of the variability of houses and burials and of how these variations relate to social differentiation. The descriptions of excavated units, features and buildings incorporates results from the analyses of animal bone, chipped stone, groundstone, shell, ceramics, phytoliths, micromorphology. The integration of different types of data and of different voices within the excavation team mimics the process of collaborative interpretation that took place during the excavation and post-excavation process.
