*The Walls Have Ears* Helen Fry,2019-09-10 A history of the elaborate and brilliantly sustained World War II intelligence operation by which Hitler's generals were tricked into giving away vital Nazi secrets At the outbreak of World War II, MI6 spymaster Thomas Kendrick arrived at the Tower of London to set up a top secret operation: German prisoners' cells were to be bugged and listeners installed behind the walls to record and transcribe their private conversations. This mission proved so effective that it would go on to be set up at three further sites--and provide the Allies with crucial insight into new technology being developed by the Nazis. In this astonishing history, Helen Fry uncovers the inner workings of the bugging operation. On arrival at stately-homes-turned-prisons like Trent Park, high-ranking German generals and commanders were given a phony interrogation, then treated as guests, wined and dined at exclusive clubs, and encouraged to talk. And so it was that the Allies got access to some of Hitler's most closely guarded secrets--and from those most entrusted to protect them.

The Sulu Zone, 1768-1898 James Francis Warren,2007 First published in 1981, The Sulu Zone has become a classic in the field of Southeast Asian History. The book deals with a fascinating geographical, cultural and historical border zone centred on the Sulu and Celebes Seas between 1768 and 1898, and its complex interactions with China and the West. The author examines the social and cultural forces generated within the Sulu Sultanate by the China trade, namely the advent of organized, long distance maritime slave raiding and the assimilation of captives on a hitherto unprecedented scale into a traditional Malayo-Muslim social system. How entangled commodities, trajectories of tastes, and patterns of consumption and desire that span continents linked to slavery and slave raiding, the manipulation of diverse ethnic groups, the meaning and constitution of culture, and state formation? James Warren responds to this question by reconstructing the social, economic, and political relationships of diverse peoples in a multi-ethnic zone of which the Sulu Sultanate was the centre, and by problematizing important categories like piracy, slavery, culture, ethnicity, and the state. His work analyzes the dynamics of the last autonomous Malayo-Muslim maritime state over a long historical period and describes its stunning response to the world capitalist economy and the rapid forward movement of colonialism and modernity. It also shows how the changing world of global cultural flows and economic interactions caused by cross-cultural trade and European dominance affected men and women who were forest dwellers, highlanders, and slaves, people who worked in everyday jobs as fishers, raiders, divers or traders. Often neglected by historians, the response of these members of society are a crucial part of the history of Southeast Asia.--

Professionals in the field of mental health and allied subjects without any mathematical background can easily understand all the relevant statistical methods and carry out the analysis and interpret the results in their respective fields without consulting a statistician. The sequence of the chapters, the sections within the chapters, the subsections within the sections, and the points within the subsections have all been arranged to help professionals in classification refine their knowledge in statistical methods and fill the gaps, if any. Emphasizing simplicity, the fundamental statistical methods are demonstrated by means of arithmetical examples that may be reworked with pencil and paper in a matter of minutes. Topics covered include: • An overview of psychiatry research • The organization and collection of data • Descriptive statistics • The basis of statistical inference • Tests of significance • Correlational data analysis • Multivariate data analysis • Meta-analysis • Reporting the results • Statistical software The language of the book is very simple and covers all aspects of statistical methods starting from organization and collection of data to descriptive statistics, statistical inference, multivariate analysis, and meta-analysis. Two chapters on computer applications deal with the most popular data analysis software: SPSS. The book will be very valuable to professionals and post-graduate students in psychiatry and allied fields, such as psychiatric social work, clinical psychology, psychiatric nursing, and mental health education and administration.
