Challenging the Mandate of Heaven Elizabeth J. Perry,2015-05-20 Social science theories of contentious politics have been based almost exclusively on evidence drawn from the European and American experience, and classic texts in the field make no mention of either the Chinese Communist revolution or the Cultural Revolution -- surely two of the most momentous social movements of the twentieth century. Moreover, China's record of popular upheaval stretches back well beyond this century, indeed all the way back to the third century B.C. This book, by bringing together studies of protest that span the imperial, Republican, and Communist eras, introduces Chinese patterns and provides a forum to consider ways in which contentious politics in China might serve to reinforce, refine or reshape theories derived from Western cases.

Clad in Iron Howard J. Fuller,2007-12-30 This work addresses many persistent misconceptions of what the monitors were for, and why they failed in other roles associated with naval operations of the Civil War (such as the repulse at

Charleston, April 7, 1863). Monitors were 'ironclads'- not fort-killers. Their ultimate success is to be measured not in terms of spearheading attacks on fortified Southern ports but in the quieter, much more profound, strategic deterrence of Lord Palmerston's ministry in London, and the British Royal Navy's potential intervention. The relatively unknown 'Cold War' of the American Civil War was a nevertheless crucial aspect of the survival, or not, of the United States in the mid 19th-century. Foreign intervention—explicitly in the form of British naval power—represented a far more serious threat to the success of the Union blockade, the safety of Yankee merchant shipping worldwide, and Union combined operations against the South than the Confederate States Navy. Whether or not the North or South would be 'clad in iron' thus depended on the ability of superior Union ironclads to deter the majority of mid-Victorian British leaders, otherwise tempted by their desire to see the American 'experiment' in democratic class-structures and popular government finally fail. Discussions of open European involvement in the Civil War were pointless as long as the coastline of the United States was virtually impregnable. Combining extensive archival research on both sides of the Atlantic, this work offers an in-depth look at how the Union Navy achieved its greatest grand-strategic victory in the American Civil War. Through a combination of high-tech 'machines' armed with 'monster' guns, intensive coastal fortifications and a new fleet of high-speed Union commerce raiders, the North was able to turn the humiliation of the Trent Affair of late 1861 into a sobering challenge to British naval power and imperial defense worldwide.
