Civic Tech Andrew Schrock, 2018-04-06 The term 'Civic Tech' has gained international recognition as a way to unite communities and government through technology design. But what does it mean for our shared future? In this book, Andrew Schrock cuts through the hype by telling stories of the people and ideas driving the movement. He argues that Civic Tech emerged as a cultural movement to address inequality and a wide range of social problems. The collaborative approaches and early successes of 'techies' exemplify a powerful civic alternative. Ultimately, Civic Tech draws our attention to the challenges of democratic technology design and public ownership—vital goals for the years ahead.

Participatory Budgeting and Civic Tech Hollie Russon Gilman, 2016-05-06 In a time when citizens are deeply dissatisfied

with the basic institutions and elected officials that govern them, the participatory budgeting movement empowers citizens to get results for pressing community needs. It creates a transparent process where citizens can propose projects through traditional community meetings or use civic technologies to provide input online, work with elected officials to craft budget proposals, and vote on where and how to spend public funds. Unlike other forms of civic engagement, participatory budgeting involves spending real public money on the priorities that the community identifies. In this brief work, Hollie Russon Gilman explains the history and concepts of participatory budgeting. First used abroad, participatory budgeting has been piloted in Chicago, New York City, Boston, and several other cities across the United States since 2009. She relates participatory budgeting to other forms of civic innovation and proposes ways for new digital tools to increase entry points for civic engagement. This brief and accessible work is an ideal introduction to participatory budgeting for students, scholars, and practitioners. Georgetown Digital Shorts—longer than an article, shorter than a book—deliver timely works of peer-reviewed scholarship for a fast-paced world. Civic Media Eric Gordon, Paul Mihailidis, 2022-06-07 Examinations of civic engagement in digital culture—the technologies, designs, and practices that support connection through common purpose in civic, political, and social life. Countless people around the world harness the affordances of digital media to enable democratic participation, coordinate disaster relief, campaign for policy change, and strengthen local advocacy groups. The world watched as activists used social media to organize protests during the Arab Spring, Occupy Wall Street, and Hong Kong's Umbrella Revolution. Many governmental and community organizations changed their mission and function as they adopted new digital tools and practices. This book examines the use of “civic media”—the technologies, designs, and practices that support connection through common purpose in civic, political, and social life. Scholars from a range of disciplines and practitioners from a variety of organizations offer analyses and case studies that explore the theory and practice of civic media. The contributors set out the conceptual context for the intersection of civic and media; examine the pressure to innovate and the sustainability of innovation; explore play as a template for resistance; look at civic education; discuss media-enabled activism in communities; and consider methods and funding for civic media research. The case studies that round out each section range from a “debt resistance” movement to government service delivery ratings to the “It Gets Better” campaign aimed at combating suicide among lesbian, gay, bisexual, transgender, and queer youth. The book offers a valuable interdisciplinary dialogue on the challenges and opportunities of the increasingly influential space of civic media.

Civic Power K. Sabeel Rahman, Hollie Russon Gilman, 2019-08-29 What will it take to restore American democracy and rescue it from this moment of crisis? *Civic Power* argues that the current threat to US democracy is rooted not just in the outcome of the 2016 election, but in deeper, systemic forms of inequality that concentrate economic and political power in the hands of the few at the expense of the many. Drawing on historical and social science research and case studies of contemporary democratic innovations across the country, *Civic Power* calls for a broader approach to democracy reform focused on meaningfully redistributing power to citizens. It advocates for both reviving grassroots civil society and novel approaches to governance, policymaking, civic technology, and institutional design - aimed at dismantling structural disparities to build a more inclusive, empowered, bottom-up democracy, where communities and people have greater voice, power, and agency.

Experimental Modes of Civic Engagement in Civic Tech Laurenellen McCann, 2015-09-30 *Experimental Modes of Civic Engagement in Civic Tech* is an investigation into what it means to build civic technology with, not for, real people and real communities. It answers the question, What's the difference between sentiment and action? The project was conducted by Laurenellen McCann, and it deepens her work in needs-responsive, community-driven processes for creating technology for

public good. This is a project of the Smart Chicago Collaborative, a civic organization devoted to improving lives in Chicago through technology. It was funded by a Knight Community Information Challenge Deep Dive grant given to The Chicago Community Trust by the John S. and James L. Knight Foundation.

The Innovation Complex Sharon Zukin, 2020-02-03 You hear a lot these days about innovation and entrepreneurship and about how good jobs in tech will save our cities. Yet these common tropes hide a stunning reality: local lives and fortunes are tied to global capital. You see this clearly in metropolises such as San Francisco and New York that have emerged as superstar cities. In these cities, startups bloom, jobs of the future multiply, and a meritocracy trained in digital technology, backed by investors who control deep pools of capital, forms a new class: the tech-financial elite. In The Innovation Complex, the eminent urbanist Sharon Zukin shows the way these forces shape the new urban economy through a rich and illuminating account of the rise of the tech sector in New York City. Drawing from original interviews with venture capitalists, tech evangelists, and economic development officials, she shows how the ecosystem forms and reshapes the city from the ground up. Zukin explores the people and plans that have literally rooted digital technology in the city. That in turn has shaped a workforce, molded a mindset, and generated an archipelago of tech spaces, which in combination have produced a now-hegemonic innovation culture and geography. She begins with the subculture of hackathons and meetups, introduces startup founders and venture capitalists, and explores the transformation of the Brooklyn waterfront from industrial wasteland to innovation coastline. She shows how, far beyond Silicon Valley, cities like New York are shaped by an influential triple helix of business, government, and university leaders--an alliance that joins C. Wright Mills's power elite, real estate developers, and ambitious avatars of academic capitalism. As a result, cities around the world are caught between the demands of the tech economy and communities' desires for growth--a massive and often--insurmountable challenge for those who hope to reap the rewards of innovation's success.

Smartphone-Demokratie Adrienne Fichter, 2017 Facebook, Twitter und Google bieten die zentrale Architektur für politische Debatten. Doch Microtargeting, die zunehmende 'Messengerisierung' unserer digitalen Kommunikation und polarisierende Algorithmen führen dazu, dass wir immer mehr in unseren eigenen politischen Realitäten leben. Verschiedene Autoren analysieren die wachsende Bedeutung von Social Media für den politischen Diskurs. Sie präsentieren Strategien und Lösungsansätze und stellen zukunftssträchtige Technologien der digitalen Demokratie vor.

Digital Technology, Politics, and Policy-Making Fabrizio Gilardi, 2022-06-23 This element shows, based on a review of the literature, how digital technology has affected liberal democracies with a focus on three key aspects of democratic politics: political communication, political participation, and policy-making. The impact of digital technology permeates the entire political process, affecting the flow of information among citizen and political actors, the connection between the mass public

and political elites, and the development of policy responses to societal problems. This element discusses how digital technology has shaped these different domains, identifies areas of research consensus as well as unresolved questions, and argues that a key perspective involves issue definition, that is, how the nature of the problems raised by digital technology is subject to political contestation.

The Urban Commons Daniel T. O'Brien,2018-12-03 Through voicemail, apps, websites, and Twitter, Boston's sophisticated 311 system allows citizens to report potholes, broken streetlights, graffiti, and vandalism that affect everyone's quality of life. Drawing on Boston's rich data, Daniel T. O'Brien offers a model of what smart technology can do for cities seeking both growth and sustainability.

The State of Open Data Davies, Tim,Walker, Stephen B.,Rubinstein, Mor,2019-05-22 It's been ten years since open data first broke onto the global stage. Over the past decade, thousands of programmes and projects around the world have worked to open data and use it to address a myriad of social and economic challenges. Meanwhile, issues related to data rights and privacy have moved to the centre of public and political discourse. As the open data movement enters a new phase in its evolution, shifting to target real-world problems and embed open data thinking into other existing or emerging communities of practice, big questions still remain. How will open data initiatives respond to new concerns about privacy, inclusion, and artificial intelligence? And what can we learn from the last decade in order to deliver impact where it is most needed? The State of Open Data brings together over 60 authors from around the world to address these questions and to take stock of the real progress made to date across sectors and around the world, uncovering the issues that will shape the future of open data in the years to come.

Brownfields Redevelopment Joaquin Jay Gonzalez III,Tad McGalliard,Ignacio Dayrit,2021-09-04 In urban planning, a brownfield is a former industrial or commercial site where environmental contamination hinders development. They exist in almost every community--there is probably one in your neighborhood--and state or federal resources can be used to facilitate assessment, cleanup and reuse. Drawing on a range of local and international experiences, this collection of essays focuses on cases where citizens, nonprofits, developers, cities, and state and federal agencies overcame challenges and mitigated risks to redevelop brownfields using leading-edge practices and simple innovations. The Covid-19 pandemic and mass civil unrest of 2020 underscores the importance of health and social justice considerations in future development initiatives.

Social Media and Civic Engagement Scott Robertson,2022-05-31 Social media platforms are the latest manifestation in a series of sociotechnical innovations designed to enhance civic engagement, political participation, and global activism. While many researchers started out as optimists about the promise of social media for broadening participation and enhancing civic engagement, recent events have tempered that optimism. As this book goes to press, Facebook is fighting a battle over the massive disclosure of user information during the 2016 U.S. presidential campaign, social analytics company

Cambridge Analytica is being revealed as a major player in micro profiling voters in that same election, bots and fake news factories are undermining democratic discourse via social media worldwide, and the president of the United States is unnerving the world as a stream-of-consciousness Twitter user. This book is a foundational review of current research on social media and civic engagement organized in terms of history, theory, practice, and challenges. History reviews how researchers and developers have continuously pushed the envelope to explore technology enhancements for political and social discourse. Theory reveals that the use of globally-networked social technologies touches many fields including political science, sociology, psychology, media studies, network science, and more. Practice is examined through studies of political engagement both in democratic situations and in confrontational situations. Challenges are identified in order to find ways forward. For better or worse, social media for civic engagement has come of age. Citizens, politicians, and activists are utilizing social media in innovative ways, while bad actors are discovering possibilities for spreading dissent and undermining trust. We are at a sobering inflection point, and this book is your foundation for understanding how we got here and where we are going.

Technology vs. Government Lloyd Levine, 2024-03-19 Technology vs. Government examines why government fails at technology acquisitions, innovation, and implementation, the impact on people, and the future opportunities and implications for government service, administration and policy.

Technology Against Technocracy Maya M. Wagoner, 2017 This thesis develops an intersectional, critical analysis of the field of practice known as Civic Tech and highlights other relevant community-organizing and activist practices that utilize technology as a central component. First, I develop critiques of Civic Tech as a dominant technocratic, neoliberal approach to democracy and bureaucracy and trace the history and intellectual genealogy of this specific movement. I then highlight civic technologies outside of the field of Civic Tech that have resulted in more redistributive and democratic outcomes, especially for Black people and other people of color. Finally, I define a research and design practice called Critical Community Technology Pedagogy that is demystificatory, multi-directional, transferable, and constructive, and draws upon examples from the Civic Lab for Environmental Action Research (CLEAR) in Newfoundland, Data DiscoTechs in Detroit, and the Center for Urban Pedagogy in New York City.
