Kultivierungsforschung Christine E. Meltzer, 2019-02-13 Beeinflussen Fernsehbilder, wie wir selbst die Realität sehen? Mit dieser Frage beschäftigt sich die Kultivierungsforschung seit den 1970er Jahren. Über den systematischen Vergleich von Viel- und Wenigsehern untersuchen Kultivierungsforscher, wie das Fernsehen Vorstellungen von sozialer Wirklichkeit langfristig prägt. Seit seiner Formulierung durch George Gerbner gehört der Ansatz zu den meistzitierten und meistdiskutierten der Kommunikationswissenschaft. Das Buch gibt Einblicke in die Entwicklung der Kultivierungsforschung von den soziologisch geprägten Überlegungen Gerbners bis hin zu den Bemühungen um eine kognitionspsychologische Präzisierung des Kultivierungseffekts. Die damit einhergehenden methodischen Herangehensweisen werden kritisch diskutiert. Anhand der wachsenden thematischen Vielfalt des Fernsehangebots und der zunehmend zeitsouveranen Fernsehnutzung werden die konzeptionellen Herausforderungen der Kultivierungsforschung aufgezeigt.

Contraceptive Risk William Green, 2017-05-02 The story of Depo-Provera joins the national struggle over the drug's FDA approval to the state legal issues raised by its contraceptive and criminal justice uses. Depo-Provera is known as an

injectable hormonal birth control method, but few are familiar with its dark and complicated history. Depo-Provera was tested on women since the mid-1960s without their informed consent until it was FDA-approved in 1992, but never FDA-approved as chemical castration for male sex offenders. *Contraceptive Risk* is William Green's landmark study of Depo-Provera. Based on a fascinating combination of archival materials and interviews, the book is framed as three interconnected stories told by Judith Weisz, who chaired the FDA's Public Board of Inquiry on Depo-Provera, a scientific court; by Anne MacMurdo who brought a products liability suit against Upjohn, the drug's manufacturer, for the deleterious side effects she suffered from the drug's use; and by Roger Gauntlett, an Upjohn heir who, when he was convicted of sexual assault, refused to take a dose of his family's own medicine as a probation condition. Together these three stories of Depo-Provera's convoluted fifty year odyssey call for a paradigm shift in pharmaceutical drug development. *Contraceptive Risk* is a thoroughly researched and engrossing approach to the scientific, political and institutional forces involved in health law and policy, as well as the multifaceted politics of measuring risk.
