The Politics of the Piazza Eamonn Canniffe, 2016-03-03 Through a detailed study of the principal spaces of Italian cities, this book explores the relationship between political systems and their methods of representation in architecture. Illustrated by contemporary photographs and analytical drawings, it examines significant piazzas and situates these examples in their social and political contexts, highlighting the urban evidence of shifts between autocratic and democratic forms of government through history. The ideological role of political architecture is analyzed through the work of various theorists including ancient sources, Renaissance thinkers and modern critics. The complex evolution of individual spaces over time is represented by their physical layering from ancient times to the present day. Other examples connect the development of different characteristic types of Italian urban form in chronological sequence, categorized by art historical and political periods.

Michelangelo's Campidoglio Catherine Gubisch, 2012 Michelangelo's Campidoglio complex in Rome is one work by the artist that can be profitably examined with the lens of the pervasive Neoplatonic theories of the sixteenth-century Italian Renaissance. This analysis will provide evidence of this Neoplatonic influence using concepts taken from ancient and contemporary writings, as well as facts known about the artist's life and education. I shall conclude that there is a strong correlation between the twelve-pointed star pattern on the pavement of the Campidoglio and the complex number theories set forth first by the writers of antiquity, and later adopted by Renaissance Humanists. I will argue that in designing this complicated pavement, Michelangelo used Neoplatonic number theories in order to glorify the papacy, Christianity, and Rome.

Vasari on Theatre Giorgio Vasari,Thomas A. Pallen,1999 From this imposing source, Thomas A. Pallen has created a compendium of theatrical references augmented by related modern Italian scholarship. Vasari's Lives - daunting because of its sheer magnitude - has remained relatively obscure to English-speaking theatre historians.

The Individual and Utopia Dr Clint Jones,Mr Cameron Ellis,2015-03-28 Interdisciplinary in scope and bringing together work from around the world, *The Individual and Utopia* enquires after the nature of the utopian as citizen, demonstrating the inherent value of making the individual central to utopian theorizing and highlighting the methodologies necessary for examining the utopian individual. The various approaches employed reveal what it is to be an individual yoked by the idea of citizenship and challenge the ways that we have traditionally been taught to think of the individual as citizen. As such, it will appeal to scholars with interests in social theory, philosophy, literature, cultural studies, architecture and feminist thought, whose work intersects with political thought, utopian theorizing, or the study of humanity or human nature.

A View from the Campidoglio Robert Venturi,Denise Scott Brown,1984 These seventeen essays span thirty-two years in the careers of Robert Venturi and Denise Scott Brown. In these careers one can see the inextricable blending of the building of buildings and the building of words. They look, analyze, synthesize through writing, synthesize through design, then look again. Robert Venturi's *Complexity and Contradiction in Architecture*, published in 1966, has been acknowledged as the most important thinking and writing on architecture since Le Corbusier. It provided a theoretical base for architects to transform architectural design from Modern to contemporary. A leading exponent of the Postmodern, the firm of Venturi, Rauch and Scott Brown has been in the forefront of new approaches in architecture and design, combining traditional with modern. And their writing has been viewed as brilliant and liberating. Paul Goldberger, in *The New York Times*, says of Robert Venturi and Denise Scott Brown: They merge a kind of childlike delight with an adult's ironic sensibility, bringing to architecture an attitude not altogether different from that which Lewis Carroll brought to literature. -- from book cover.

Il Campidoglio Anna Bedon,2008 Il volume affronta la storia della costruzione della piazza del Campidoglio dalle sue origini nel XIV secolo al rifacimento della pavimentazione di A. Muñoz nel 1938. La piazza è sempre stata il simbolo delle libertà cittadine e nel 1538 si decise di dare forma architettonica alle idealità del Popolo Romano. L'artista scelto dal Papa e dal popolo per la riqualificazione dei palazzi fu Michelangelo, che affrontò il tema della piazza civica con il consueto impegno civile, sebbene gli esiti siano in parte lontani dalle sue intenzioni originarie. Il testo è accompagnato da una serie di ricostruzioni grafiche che restituiscono i molti progetti per la piazza e per i palazzi che si susseguono, in una lotta per il prestigio personale e familiare che ha sempre un riflesso nell'allestimento del complesso. L'analisi, inoltre, delle scelte politiche, delle presenze sul cantiere, della sua organizzazione, della successione degli interventi e delle tecniche scelte viene fatta su base documentaria. Una esaustiva appendice completa gli apparati del libro.
