Wastiary Michael Picard, Albert Brenchat-Aguilar, Timothy Carroll, Jane Gilbert, Nicola Miller, 2023-07-03 Wastiary, or Bestiary of Waste, is a creative exercise that occupies letters, numbers, and symbols of Western academic language to compose a list of 35 short entries on the uncomfortable but pressing topic of waste in the contemporary world. The collection is richly illustrated with artwork, photography, collage and mixed media. The book is a heterodox compendium of 'beasts of waste', playfully re-imagining the medieval treatise on various kinds of animal. It conveys the message that various forms of waste and pollution have achieved a beast-like or untameable quality, at times pungently transferring to considerations of 'the human', or humans treated as waste.

Die Collage in der bildenden Kunst Rahel Blumenthal, 2011-03-28 Studienarbeit aus dem Jahr 2010 im Fachbereich Kunst - Übergreifende Betrachtungen, , Sprache: Deutsch, Abstract: Das Prinzip des Collage findet ihre Anwendung in den verschiedensten Bereichen der Kunst. Synonym für den Collage Begriff wird auch wird auch häufig der Begriff Montage verwendet, welcher auf strenger Definition auf das „klebende Element“ der Collage verzichtet (mehr dazu siehe Kapitel 2. Collage - Definitionsversuche) Im Fokus dieser Arbeit liegt die Collage als künstlerischen Mittel in der bildenden Kunst. Ihre Geschichte und verschiedenen Hintergründe lassen das Inventar der Collage zu einer Geschichte der Kunst des vergangenen Jahrhunderts werden, welcher ich mich in dieser Arbeit annähern möchte. Dabei legte klassische Moderne legte die

Grundlage für den Siegeszug der Collage in der zweiten Hälfte des zwanzigsten Jahrhunderts. Somit entstand im vergangenen Jahrhundert eine Vielfalt von neuen Formen der Collage/Montage. Der Untersuchungsgegenstand dieser Arbeit ist sehr umfangreich, daher werde ich mich primär auf einen Vergleich des verwendeten Ausgangsmaterials und dessen neu Kombination in den einzelnen Kunstrichtungen konzentrieren. Ein Exkurs in Musik, Literatur und Film, drei Künste, in welchen sich das Prinzip der Collage wider findet bildet das Verbindungsglied zu Seminar „Found Footage Film“.

Fractal-Based Methods in Analysis Herb Kunze, Davide La Torre, Franklin Mendivil, Edward R. Vrscay, 2011-11-18 The idea of modeling the behaviour of phenomena at multiple scales has become a useful tool in both pure and applied mathematics. Fractal-based techniques lie at the heart of this area, as fractals are inherently multiscale objects; they very often describe nonlinear phenomena better than traditional mathematical models. In many cases they have been used for solving inverse problems arising in models described by systems of differential equations and dynamical systems. Fractal-Based Methods in Analysis draws together, for the first time in book form, methods and results from almost twenty years of research in this topic, including new viewpoints and results in many of the chapters. For each topic the theoretical framework is carefully explained using examples and applications. The second chapter on basic iterated function systems theory is designed to be

used as the basis for a course and includes many exercises. This chapter, along with the three background appendices on topological and metric spaces, measure theory, and basic results from set-valued analysis, make the book suitable for self-study or as a source book for a graduate course. The other chapters illustrate many extensions and applications of fractal-based methods to different areas. This book is intended for graduate students and researchers in applied mathematics, engineering and social sciences. Herb Kunze is a professor of mathematics at the University of Guelph in Ontario. Davide La Torre is an associate professor of mathematics in the Department of Economics, Management and Quantitative Methods of the University of Milan. Franklin Mendivil is a professor of mathematics at Acadia University in Nova Scotia. Edward Vrscay is a professor in the department of Applied Mathematics at the University of Waterloo in Ontario. The major focus of their research is on fractals and the applications of fractals.

Knowing Bodies, Moving Minds Liora Bresler, 2013-11-11 This book aims to define new theoretical, practical, and methodological directions in educational research centered on the role of the body in teaching and learning. Based on our phenomenological experience of the world, it draws on perspectives from arts-education and aesthetics, as well as curriculum theory, cultural anthropology and ethnomusicology. These are arenas with a rich untapped cache of experience and inquiry that can be applied to the notions of schooling, teaching and learning. The book provides examples of state-of-the-art, empirical research on the body in a variety of educational settings. Diverse art forms, curricular settings, educational levels, and cultural traditions are selected to demonstrate the complexity and richness of embodied knowledge as they are manifested through institutional structures, disciplines, and specific practices.

Artists Respond Melissa Ho, Thomas Crow, Erica Levin, Mignon Nixon, Martha Rosler, Smithsonian American Art Museum, 2019-04-23 How the Vietnam War changed American art By the late 1960s, the United States was in a pitched conflict in Vietnam, against a foreign enemy, and at home—between Americans for and against the war and the status quo. This powerful book showcases how American artists responded to the war, spanning the period from Lyndon B. Johnson's fateful decision to deploy U.S. Marines to South Vietnam in 1965 to the fall of Saigon ten years later. *Artists Respond* brings together works by many of the most visionary and provocative artists of the period, including Asco, Chris Burden, Judy Chicago, Corita Kent, Leon Golub, David Hammons, Yoko Ono, and Nancy Spero. It explores how the moral urgency of the Vietnam War galvanized American artists in unprecedented ways, challenging them to reimagine the purpose and uses of art and compelling them to become politically engaged on other fronts, such as feminism and civil rights. The book presents an era in which artists struggled to synthesize the turbulent times and participated in a process of free and open questioning inherent to American civic life. Beautifully illustrated, *Artists Respond* features a broad range of art, including painting, sculpture, printmaking, performance and body art, installation, documentary cinema and photography, and conceptualism. Bending Genre Margot Singer, Nicole Walker, 2013-03-14 Ever since the term creative nonfiction first came into widespread use, memoirists and journalists, essayists and fiction writers have faced off over where the border between fact and fiction lies. This debate over ethics, however, has sidelined important questions of literary form. *Bending Genre* does not ask where the boundaries between genres should be drawn, but what happens when you push the line. Written for writers and students of creative writing, this collection brings together perspectives from today's leading writers of creative nonfiction, including Michael Martone, Brenda Miller, Ander Monson, and David Shields. Each writer's innovative essay probes our notions of genre and investigates how creative nonfiction is shaped, modeling the forms of writing being discussed. Like creative nonfiction itself, *Bending Genre* is an exciting hybrid that breaks new ground.

Adhesion between polymers and concrete / Adhésion entre polymères et béton H. R. Sasse, Laboratoire central des ponts et chaussées, RILEM Tech. Comm. 52-Resin Adherence to Concrete, 2013-11-27 Preface Adhesion is a phenomenon architects and civil engineers are not very familiar with. In other disciplines knowledge about surface properties and the background of bonding energies is also far from satisfactory; nevertheless there are many important applications in concrete engineering, where adhesion is necessary for success and durability. These include: - coating and painting - repair of concrete surfaces - bonding of fresh to old concrete - crack injection - glueing of precast elements - glueing of steel to concrete, etc. In 1981 RILEM established the technical committee 52-RAC 'Resin Adherence to Concrete'. The main aims of the committee's work were - to collect research results and practical experiences - to initiate and coordinate research programs - to develop, on a scientific base, test methods for field and for laboratory purposes. One of the results of the committee's work is a state-of-the-art report, which will be presented orally as a General Report at the International

Symposium ISAP '86, and will be printed either in the RILEM journal Materials and Structures or separately. Several test recommendations have been elaborated and will be prepared as drafts for the participants of ISAP '86. These are: - direct tensile test - pull-off test - direct shear test - slant shear test - four-point bending test - dynamic loading test - thermal compatibility test (two versions) - injectibility test.
