Animals and Courts Mark Hengerer, Nadir Weber, 2019-12-16 Early modern princely courts were not only inhabited by humans, but also by a large number of animals. This coexistence of non-human living beings had crucial impacts on the spatial organization, the social composition and cultural life at these courts. The contributions enrich our knowledge on another aspect of court life and invite to reconsider our basic understandings of court, courtiers and court society.

Luca Marenzio Marco Bizzarini, 2017-07-05 Regarded by his contemporaries as the leading madrigal composer of his time, Luca Marenzio was an important figure in sixteenth-century Italian music, and also highly esteemed in England, Flanders and Poland. This English translation of Marco Bizzarini's study of the life and work of Marenzio provides valuable insights into the composer's influence and place in history, and features an extensive, up-to-date bibliography and the first published list of archival sources containing references to Marenzio. Women play a decisive role as dedicatees of Marenzio's madrigals and in influencing the way in which they were performed. Bizzarini examines in detail the influence of both female and male patrons and performers on Marenzio's music and career, including his connections with the confraternity of SS Trinità and other institutions. Dedications were also a political tool, as the book reveals. Many of Marenzio's dedications were

made at the request of his employer Cardinal d'Este who wanted to please his French allies. Bizzarini examines these extra-musical dimensions to Marenzio's work and discusses the composer's new musical directions under the more austere administration of Pope Clement VIII.

A Forest on the Sea Karl Appuhn,2009 The idea of a Venetian forestry service might strike one as the beginning of a joke. The statement that it began in the fourteenth century would surprise most people. Venice is built on a lagoon with no timber resources. This book reveals the story of Venice's attempt to establish protected forests in order to have a constant supply of wood. Beyond the need for wood for heating and cooking, tall beams of oak and beech were needed for ship building and the shoring up of breakwaters that kept the sea from flooding the city. The author follows the practice of forest conservation and management from its inception in the 1300s to the end of the eighteenth century. He details the administrative and legal debates as well as problems with the implementation of policies. This study is a corrective to histories that assume a lack of interest in forest conservation in Europe at this time. The experience of the Venetians also serves as an example for timber use and conservation today.

Observing Agriculture in Early Twentieth-Century Italy Federico D'Onofrio,2016-05-20 Agricultural Economists in Early Twentieth-Century Italy describes how Italian agricultural economists collected information about the economy of Italy, between the Giolittian and the Fascist era. The book carefully describes three main forms of economic observation: enquiries, statistics, and farm surveys. For each of these forms of observation, the main participants to the investigation are discussed with their respective agendas, alongside the purposes of the investigation, and its practical constraints. This work introduces the concept of stakeholder statistics, and stresses the two-way relation between the observer and the observed in the co-production of observational knowledge. Practices of observation developed together with agricultural economics as a discipline and a profession. The study of forms of investigation therefore shed light on the constitution of a coherent and self-conscious group of agricultural economists in Italy, and the scientific and methodological alliances they forged with agricultural economists elsewhere in Europe. Thanks to ambitious research projects, Ghino Valenti in the Giolittian period, and Arrigo Serpieri, after the First World War, led the transformation of Italian agricultural economists from agents of estate owners, to social and economic experts in the service of the Italian state. The group of agricultural economists who gathered around Serpieri played an important role in supplying the ideology of the agricultural elites with economic content, especially after the First World War, along lines that resemble the development of agrarian ideologies in other countries of Central Europe. This work discusses how observation entered the political debate on agricultural policies of the Fascist regime, namely the so-called Ruralismo.
