## Desmond O'Connor

Guida degli italiani in Boston ,1909

No Need to be Afraid Desmond O'Connor,1996 The story of how Italians struggled to earn the right to live and work amidst an Anglo-Saxon society. It is a story of fear: the Britishers' fear that the 'swarthy' undesirables would threaten their jobs and their way of life; the fear, as WW2 erupted, that Italians might sabotage the war effort and assist the Axis powers to take over Australia.

**Complex, Intelligent and Software Intensive Systems** Leonard Barolli, 2022-06-16 Software intensive systems are systems, which heavily interact with other systems, sensors, actuators, devices, other software systems, and users. More and more domains are involved with software intensive systems, e.g., automotive, telecommunication systems, embedded systems in general, industrial automation systems, and business applications. Moreover, the outcome of web services delivers a new platform for enabling software intensive systems. Complex systems research is focused on the overall understanding of systems rather than its components. Complex systems are very much characterized by the changing environments in which they act by their multiple internal and external interactions. They evolve and adapt through internal and external dynamic interactions. The development of intelligent systems and agents, which is each time more characterized by the use of ontologies and their logical foundations, builds a fruitful impulse for both software intensive systems and complex systems. Recent research in the field of intelligent systems, robotics, neuroscience, artificial intelligence, and cognitive sciences is a very important factor for the future development and innovation of software intensive and complex systems. The aim of the book "Complex, Intelligent and Software Intensive Systems" is to deliver a platform of scientific interaction between the three interwoven challenging areas of research and development of future ICT-enabled applications: software intensive systems, complex systems, and intelligent systems.

*Sternbilder des Mittelalters und der Renaissance* Dieter Blume, Mechthild Haffner, Wolfgang Metzger, 2016-08-08 Die vorliegende Publikation schließt ein Forschungsprojekt ab, in dem erstmalig sämtliche illustrierten, astronomischen und astrologischen Handschriften von 800-1500 systematisch erfasst und bearbeitet wurden. Damit wurde für das Verständnis der profanen Bildkultur, der Antikenrezeption sowie der astronomischen Wissenschaft in Mittelalter und Renaissance eine völlig neue Basis geschaffen. Astronomie und Astrologie sind in besonderem Maße auf Bilder angewiesen, um ihren Gegenstand und ihre Theoriemodelle zu veranschaulichen. An der Geschichte der Sternbilderdarstellungen treten deshalb in eindrucklicher Weise die vielfältigen Verschränkungen von Erkenntnisprozess und Verbildlichung, von Bildtradition und bewegter Phantasie, von kosmischer Wirklichkeit und antiker Mythologie zu Tage.

Italians to America Ira A. Glazier, Percy William Filby, 1992 The tenth reference volume in a planned series of 15, devoted to an index of Italian immigrants arriving in the US from 1880-1899. It presents passenger lists in chronological order and detailed information on each person and their origins. Each volume also carries a full name index.

Naviguer, commercer, gouverner Claire Judde de Larivière, 2008-11-30 The convoys of public galleys, the typical form of Venetian medieval sea-faring, had disappeared gradually by the time of the battle of Lepanto. This disappearance was not the sign of a general economic crisis, but was nevertheless the corollary of important political, economic and social changes which marked the history of sixteenth-century Venice. Through the study of economic actors, their identity, their practices

and their functions, this book analyses public and private commercial navigation in relation to the evolution of forms and functions of the State, within a general context of the redefinition of the relationship between public good and private interests.
