The Roma and Their Struggle for Identity in Contemporary Europe Huub van Baar, Angéla Kóczé, 2020-02-01 Thirty years after the collapse of Communism, and at a time of radically diverse kinds of identity politics, including anti-migrant, anti-Roma, anti-Muslim and anti-establishment movements, this book analyses how Roma identity is expressed in contemporary Europe. From backgrounds ranging from political theory, postcolonial, cultural and gender studies to art history, feminist critique and anthropology, the contributors reflect on the extent to which a politics of identity regarding historically disadvantaged, racialized minorities such as the Roma can still be legitimately articulated. In part, the contributors argue, the answer lies in a movement beyond classic identity politics and any opposition between essentialism and constructivism.

Lifelong Learning and the Roma Minority in Central and Eastern Europe Andrea Óhidy, Katalin R. Forray, 2019-09-30 This book discusses the current educational climate and the impact of these policy measures for Roma people in eight Central and Eastern European countries. There is a severe lack of information about the Roma people in the public domain. This book seeks to raise awareness of this forgotten minority.

The Roma in Romanian History Viorel Achim, 2004-01-01 One of the greatest challenges during the process of European Union enlargement towards the east is how the issue of the Roma or Gypsies is tackled. This enormous social and political problem cannot be solved without proper historical studies like this book. Achim presents and interprets the long history of the Gypsies, including slavery, the process of integration and assimilation into the majority population, as well as the historical roots of the marginalization of the Gypsies. The deportation of Gypsies to Transnistria during the Antonescu regime, between 1942 and 1944, is reconstructed in a separate chapter. The closing chapters elaborate on the policy toward the Gypsies in the decades after the Second World War, and its bearing on the situation of the Roma population in today's Romania.

Romaphobia Dr Aidan McGarry, 2017-02-15 Based on first-hand accounts from Roma communities, Romaphobia is an

examination of the discrimination faced by one of the most persecuted groups in Europe. Well-researched and informative, it shows that this discrimination has its roots in the early history of the European nation-state, and the ways in which the landless Roma have been excluded from national communities founded upon a notion of belonging to a particular territory. Romaphobia allows us to unpick this relationship between identity and belonging, and shows the way towards the inclusion of Roma in society, providing vital insights for other marginalized communities.

Writing the Roma Cynthia Levine-Rasky, 2016-09-13T00:00:00Z The culmination of four years of ethnographic research at the Roma Community Centre in Toronto, *Writing the Roma* is the first book to provide an overview of the identities, origins, history and treatment of Roma refugees. Cynthia Levine-Rasky traces the historical and cultural roots of the Roma in Europe, through their genocide in the Holocaust, their persecution in Eastern Europe in the post-Communist era, to their settlement as refugees in Canada. What emerges is a book that challenges the stereotypes surrounding this non-territorial nation while exposing the ways that Canadian immigration policies have affected Roma populations.

Those Who Count Mihai Surdu, 2016-11-10 *Those Who Count* scrutinizes the scientific and expert practices of Roma classification and counting, and the politics of Roma-related knowledge production. The book takes a historical perspective on Roma group construction, both as an epistemic object and a policy target, with a focus on the expert discourse of the last two decades. The book argues that knowledge production on Roma is neither objective nor disinterested but rather is co-produced by political and academic actors driven by organizational interests with rather narrow disciplinary research traditions, as well as by political manifestos. The result of such co-production is a negative Roma public image circulating well beyond the expert discourse which reinforces stereotypes held by society at large. The case studies and examples presented in the book show that the state-led population census, policy related surveys, as well as academic and scientific research, together craft an essentialized Roma identity. The recently reemerged Roma-related genetic research imports assumptions, classifications, and narrations from the social sciences and contributes through sampling strategies, interpretation of data, and generalization to reify and pathologize Roma ethnicity. Roma are relegated by experts to several types of determinism: to a social category, to a frozen culture, and to a homogenous biologized entity.

The People and the Nation Reinhard Heinisch, Emanuele Massetti, Oscar Mazzoleni, 2019-11-05 The edited book brings together country experts on populism, ethno-territorial politics, and party competition. It consists of twelve empirical chapters, covering seven Western European states (Austria, Belgium, France, Italy, Spain, Switzerland, and the UK) as well as four Central European states (Croatia, Hungary, Serbia, and Poland). It is a collaboration by scholars from across Europe which contributes to the growing literature on populism by focusing on a relatively unexplored research agenda: the intersection of territoriality, ethno-politics, and populism. Presenting an original perspective contributing experts use case studies to highlight the territorial dimension of populism in different ways and identify that a deeper understanding of the

interactions between populist actors and ethno-territorial ideologies is required. This book will be of interest to academics, researchers, and students of European politics, populism, and ethno-territorial politics.

The Legacies of the Romani Genocide in Europe since 1945 Celia Donert, Eve Rosenhaft, 2021-12-27 This book explores the legacies of the genocide of Roma in Europe after the end of the Second World War. Hundreds of thousands of people labelled as 'Gypsies' were persecuted or killed in Nazi Germany and across occupied Europe between 1933 and 1945. In many places, discrimination continued after the war was over. The chapters in this volume ask how these experiences shaped the lives of Romani survivors and their families in eastern and western Europe since 1945. This book will appeal to researchers and students in Modern European History, Romani Studies, and the history of genocide and the Holocaust.

Nationalist Politics and Everyday Ethnicity in a Transylvanian Town Rogers Brubaker, Margit Feischmidt, Jon Fox, Liana Grancea, 2018-06-05 Situated on the geographic margins of two nations, yet imagined as central to each, Transylvania has long been a site of nationalist struggles. Since the fall of communism, these struggles have been particularly intense in Cluj, Transylvania's cultural and political center. Yet heated nationalist rhetoric has evoked only muted popular response. The citizens of Cluj--the Romanian-speaking majority and the Hungarian-speaking minority--have been largely indifferent to the

nationalist claims made in their names. Based on seven years of field research, this book examines not only the sharply polarized fields of nationalist politics--in Cluj, Transylvania, and the wider region--but also the more fluid terrain on which ethnicity and nationhood are experienced, enacted, and understood in everyday life. In doing so the book addresses fundamental questions about ethnicity: where it is, when it matters, and how it works. Bridging conventional divisions of academic labor, Rogers Brubaker and his collaborators employ perspectives seldom found together: historical and ethnographic, institutional and interactional, political and experiential. Further developing the argument of Brubaker's groundbreaking *Ethnicity without Groups*, the book demonstrates that it is ultimately in and through everyday experience--as much as in political contestation or cultural articulation--that ethnicity and nationhood are produced and reproduced as basic categories of social and political life.

The EAL Teaching Book Jean Conteh,2023-05-24 As the number of children for whom English is an Additional Language in schools increases, how do teachers and trainees prepare to support them to succeed? A complete guide to understanding, learning from and teaching bilingual and EAL children in schools. The text begins by asking 'who are EAL learners' and challenges some of the misconceptions about this group. It goes on to examine language in depth, providing focused theory to help teachers and trainees better understand the wider context of children's needs. This theory is supported by a wealth of information on practical teaching strategies and resources in the promoting learning section. The text covers planning across the curriculum for EAL and offers day-to-day practical support for teachers. The fourth edition is updated throughout and includes a new chapter on EAL and SEND.

Migration, Protest Movements and the Politics of Resistance Tamara Caraus,Elena Paris,2018-10-01 Migration and cosmopolitanism are said to be complementary. Cosmopolitanism means to be a citizen of the world, and migration, without impediments, should be the natural starting point for a cosmopolitan view. However, the intensification of migration, through an increasing number of refugees and economic migrants, has generated anti-cosmopolitan stances. Using the concept of cosmopolitanism as it emerges from migrant protests like?Sans Papiers, No One Is Illegal, and No Borders, an interdisciplinary group of scholars addresses this discrepancy and explores how migrant protest movements elicit a new form of radical cosmopolitanism. The combination of basic theoretical concepts and detailed empirical analysis in this book will advance the theoretical debate on the inherent cosmopolitan aspects of migrant activism. As such, it will be a valuable contribution to students, researchers and scholars of political science, sociology and philosophy.

Breaking the Exclusion Cycle Ana Bracic,2020-03-24 Social exclusion of minority groups is an intractable problem in many diverse nations. For some minority groups this means going to segregated schools, for others not having access to gainful employment or quality healthcare. But why does social exclusion persist, and what can one do to stop it? This book proposes a theory of how individual behavior contributes to social exclusion, a novel method for measuring that behavior, and

solutions to ending it. Based on original fieldwork among Central and Eastern European Roma, the largest ethnic minority in Europe (yet still very understudied), and non-Roma, Ana Bracic develops a theory she calls the exclusion cycle, through which anti-minority culture gives rise to discrimination by members of the majority, and minority members develop survival strategies. Members of the majority resent these strategies, assuming that they are endemic to the minority group rather than an outcome of their own discriminatory behavior. To illustrate her theory, Bracic includes an analysis of a video game she created that simulates interactions between Roma and non-Roma participants, which members of these groups played through avatars (thereby avoiding contentious face-to-face interactions). The results demonstrate that majority members discriminate against minority members even when minority group members behave in ways identical to the majority. It also shows the way in which minority members develop survival mechanisms. Bracic draws on the results of the simulation to offer evidence that this cycle can be broken through NGO-promoted discussion and interaction between groups. She also draws on extant scholarship on interactions between Muslim women in France, African Americans, the Batwa in Uganda, and their respective majority communities.

Undoing Homogeneity in the Nordic Region Suvi Keskinen, Unnur Dís Skaptadóttir, Mari Toivanen, 2019-06-03

Chapter 1 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

https://tandfbis.s3-us-west-2.amazonaws.com/rt-files/docs/Open+Access+Chapters/9781138564275_oachapter1.pdf This book critically engages with dominant ideas of cultural homogeneity in the Nordic countries and contests the notion of homogeneity as a crucial determinant of social cohesion and societal security. Showing how national identities in the Nordic region have developed historically around notions of cultural and racial homogeneity, it exposes the varied histories of migration and the longstanding presence of ethnic minorities and indigenous people in the region that are ignored in dominant narratives. With attention to the implications of notions of homogeneity for the everyday lives of migrants and racialised minorities in the region, as well as the increasing securitisation of those perceived not to be part of the homogenous nation, this volume provides detailed analyses of how welfare state policies, media, and authorities seek to manage and govern cultural, religious, and racial differences. With studies of national minorities, indigenous people and migrants in the analysis of homogeneity and difference, it sheds light on the agency of minorities and the intertwining of securitisation policies with notions of culture, race, and religion in the government of difference. As such it will appeal to scholars and students in social sciences and humanities with interests in race and ethnicity, migration, postcolonialism, Nordic studies, multiculturalism, citizenship, and belonging.

The Psychology of Politically Unstable Societies Anna Kende, Barbara Láštíková, 2023-10-09 This volume presents the latest developments in the field of political psychology by exploring the psychological processes that underlie political instability and how these can be addressed with psychological interventions. Written by a team of international leading researchers, the book critically re-evaluates the relevance of concepts primarily developed in WEIRD (Western, Educated, Industrialized, Rich and Democratic) contexts, for non-WEIRD societies. It focuses particularly on East-Central Europe and South Africa, showing how they enjoy some privileges of WEIRD countries but are also characterized by a troubled history and relative deprivation. Covering psychological concepts such as political trust, conspiracy thinking, authoritarianism, populism, autochthony, social identity and prejudice, the chapters illustrate that psychology has the tools to explain the recurring and shared problems of these societies. This original book is ideal for scholars and students in social psychology, political science and social science. It will also be useful reading for policy makers, political analysts and anyone who wishes to understand their role in creating more stable and more just societies.

The Romani Women's Movement Angéla Kóczé, Violetta Zentai, Jelena Jovanović, Enikő Vincze, 2018-07-17 The lack of recognition of Romani gender politics in the wider Romani movement and the women's movements is accompanied by a scarcity of academic literature on Romani women's mobilization in wider social justice struggles and debates. The Romani Women's Movement highlights the role that Romani women's politics plays in shaping equality related discourses, policies, and movements in Central, Eastern and South-Eastern Europe. Presenting the diverse experiences and voices of Romani women activists, this volume reveals how they translate experiences of structural inequalities into political struggles by defining their own spaces of action; participating in formalized or less formal activist practices, and challenging the agendas and mechanisms of the established Romani and women's movements. Moving discourses on and of Romani women from the periphery of scholarly exchanges to the mainstream, the volume invites scholars and activists from different disciplines and movements to critically reflect on their engagements with particular social justice agendas. It will appeal to students, researchers and practitioners interested in fields such as social movements, gender equality, and social and ethnic justice.
