**Frauenhandel. Diskurse und Praktiken** Jürgen Nautz,Birgit Sauer,2009-04-29 Frauenhandel wurde in der vergangenen Dekade zu einer der lukrativsten Unternehmungen krimineller Netzwerke. Frauen aus armen Regionen werden in Arbeitsverhältnisse in den Metropolen verkauft - zum größten Teil in die Prostitution. Die sklavenartigen Beziehungen sind in der Regel von körperlicher und psychischer Misshandlung gekennzeichnet. Die Beiträge des Bandes analysieren das Thema Frauenhandel in Mittel- und Südosteuropa - seit dem Zusammenbruch des Realsozialismus eine Herkunfts-, Ziel- und Transitregion für gehandelte Frauen. Sie fragen nach der Entstehung von Frauenhandelsmärkten, den Motiven von Freiern, dem Opferschutz, der Zusammenarbeit von staatlichen Institutionen und zivilgesellschaftlichen NGOs in Bezug auf Prävention und Bekämpfung des Frauenhandels.Mit einem Vorwort von Rita Süßmuth.

**Global Corruption Report: Sport** Transparency International,2016-02-05 Sport is a global phenomenon engaging

billions of people and generating annual revenues of more than US\$ 145 billion. Problems in the governance of sports organisations, fixing of matches and staging of major sporting events have spurred action on many fronts. Yet attempts to stop corruption in sport are still at an early stage. The Global Corruption Report (GCR) on sport is the most comprehensive analysis of sports corruption to date. It consists of more than 60 contributions from leading experts in the fields of corruption and sport, from sports organisations, governments, multilateral institutions, sponsors, athletes, supporters, academia and the wider anti-corruption movement. This GCR provides essential analysis for understanding the corruption risks in sport, focusing on sports governance, the business of sport, planning of major events, and match-fixing. It highlights the significant work that has already been done and presents new approaches to strengthening integrity in sport. In addition to measuring transparency and accountability, the GCR gives priority to participation, from sponsors to athletes to supporters an essential to restoring trust in sport.

*Design for Inclusion* I. Garofolo, G. Bencini, 2023-07-27 Current ideas about human diversity often highlight the importance of the relational and dynamic nature of interactions across different domains of human function, activities and participation. Universal Design (UD) is defined as design that is usable by all people, to the greatest extent possible and without the need for adaptation or specialization. The term 'universal' is intended to embrace human diversity, making it the opposite of the one-size-fits-all approach. The Universal Design conference series was started in 2012 with the aim of promoting UD as a discipline-independent philosophy and approach which can transcend the boundaries between communities of knowledge and communities of practice. The first part of this book is a collection of 6 invited papers arising from some of the informal and semi-formal discussions and debates which took place as part of the UD 2022 conference in Italy. Authors were invited to submit papers presenting real case studies, and asked to discuss not only the opportunities and strengths, but also the challenges encountered when implementing UD in various domains. The second part of the book presents 6 essays by researchers who have worked on different aspects of UD over the years, each written from the perspective of the author's own research strand. The book will be of interest to all those working in the field of universal design and inclusivity.

**Curating Fascism** Sharon Hecker, Raffaele Bedarida, 2022-11-17 On the centenary of the fascist party's ascent to power in Italy, *Curating Fascism* examines the ways in which exhibitions organized from the fall of Benito Mussolini's regime to the present day have shaped collective memory, historical narratives, and political discourse around the Italian ventennio. It charts how shows on fascism have evolved since the postwar period in Italy, explores representations of Italian fascism in exhibitions across the world, and highlights blindspots in art and cultural history, as well as in exhibition practices. Featuring

contributions from an international group of art, architectural, design, and cultural historians, as well as journalists and curators, this book treats fascism as both a historical moment and as a major paradigm through which critics, curators, and the public at large have defined the present moment since World War II. It interweaves historical perspectives, critical theory, and direct accounts of exhibitions from the people who conceived them or responded to them most significantly in order to examine the main curatorial strategies, cultural relevance, and political responsibility of art exhibitions focusing on the Fascist period. Through close analysis, the chapter authors unpack the multifaceted specificity of art shows, including architecture and exhibition design; curatorial choices and institutional history; cultural diplomacy and political history; theories of viewership; and constructed collective memory, to evaluate current curatorial practice. In offering fresh new perspectives on the historiography, collective memory, and understanding of fascist art and culture from a contemporary standpoint, *Curating Fascism* sheds light on the complex exhibition history of Italian fascism not just within Italy but in such countries as the USA, the UK, Germany, and Brazil. It also presents an innovative approach to the growing field of exhibition theory by bringing contributions from curators and exhibition historians, who critically reflect upon curatorial strategies with respect to the delicate subject of fascism and fascist art, into dialogue with scholars of Italian studies and art historians. In doing so, the book addresses the physical and cultural legacy of fascism in the context of the current historical moment.

**New Urban Geographies of the Creative and Knowledge Economies** Simonetta Armondi,Stefano Di Vita,2019-10-23 The temporal and spatial intersection of information and telecommunication technologies, creative and knowledge economies, and related new manufacturing systems, has been leading to significant effects on urban socioeconomic and spatial configurations and public policies. Specifically, the post-crisis emergence of innovative workplaces to accommodate these changes, is creating socioeconomic and spatial features that are only recently beginning to be explored in the scholarly literature. According to this scenario, this edited book offers a variety of avenues for exploring the relationships between contemporary production activities and new workplaces in several urban contexts. In particular, it focuses on the consequences of these relationships in terms of regeneration of the urban fabric, as well as on their implication in terms of urban policies. This book represents early observation of the fast-growing phenomenon of new productive activities and

workplaces against the background of the gig economy and sharing economy paradigms. Central to this discussion is the investigation of the connection between digital technologies, new works and workplaces, and urban change processes and projects, by providing an additional contribution to new urban agendas for contemporary cities. The chapters originally published as a special issue in the Journal of Urban Technology.

Buildings for Education Stefano Della Torre,Massimiliano Bocciarelli,Laura Daglio,Raffaella Neri,2019-01-01 This open access book presents theoretical and practical research relating to the vast, publicly financed program for the construction of new schools and the reorganization of existing educational buildings in Italy. This transformative process aims to give old buildings a fresh identity, to ensure that facilities are compliant with the new educational and teaching models, and to improve both energy efficiency and structural safety with respect to seismic activity. The book is divided into three sections, the first of which focuses on the social role of the school as a civic building that can serve the needs of the community. Innovations in both design and construction processes are then analyzed, paying special attention to the Building Information Modeling (BIM) strategy as a tool for the integration of different disciplines. The final section is devoted to the built heritage and tools, technologies, and approaches for the upgrading of existing buildings so that they meet the new regulations on building performance. The book will be of interest to all who wish to learn about the latest insights into the challenges posed by, and the opportunities afforded by, a comprehensive school building and renovation program.

Legal Language and the Search for Clarity Anne Wagner,Sophie Cacciaguidi-Fahy,2006 This interdisciplinary collection with contributions in English and French explores how the various disciplines of law and linguistics appreciate and work towards improving the nature of clarity and obscurity in legal language. For the first time, it brings together legal academics and practitioners, jurilinguists and linguists from the common law and civil law with the specific aim to understand the complex nature, practice and tools of clarity and obscurity in legal drafting. Topics addressed include how the Clarity framework has been put into practice through the use of plainer language, better comprehensibility, readability and access to legal or administrative texts. In an attempt to reflect the more recent development of the Clarity-Obscurity debate, the editors have also focused on the use of specific instruments to respond to the problems raised by obscurity to improve clarity. Cette collection interdisciplinaire offrant des contributions en anglais et en français, explore comment les diverses disciplines du droit et de la linguistique appréhendent et visent à perfectionner la nature de la clarté et de l'opacité du discours juridique. Cet ouvrage rassemblant pour la première fois, des universitaires et professionnels du droit, des jurilinguistes et linguistes de la common law and et du droit civil, propose de découvrir la nature complexe, les pratiques et outils de la clarté et de l'opacité utilisés en rédaction juridique. Les questions abordées examinent la mise en pratique de la clarté juridique au travers de l'utilisation de la langue courante, une meilleure lisibilité, compréhensibilité et accès aux textes juridiques et administratifs. Dans le but de refléter l'actualité du débat Clarté-Opacité du discours juridique, les éditrices se sont

également concentrées sur l'utilisation des outils et méthodes les plus récents et utilisés pour résoudre les difficultés soulevées par l'opacité des langues du droit et ainsi améliorer la transparence du discours juridique.

*Social Dimensions of Organised Crime* Corinna Elsenbroich, David Anzola, Nigel Gilbert, 2016-12-15 This book presents a multi-disciplinary investigation into extortion rackets with a particular focus on the structures of criminal organisations and their collapse, societal processes in which extortion rackets thrive and fail and the impacts of bottom-up and top-down ways of fighting extortion racketeering. Through integrating a range of disciplines and methods the book provides an extensive case study of empirically based computational social science. It is based on a wealth of qualitative data regarding multiple extortion rackets, such as the Sicilian Mafia, an international money laundering organisation and a predatory extortion case in Germany. Computational methods are used for data analysis, to help in operationalising data for use in agent-based models and to explore structures and dynamics of extortion racketeering through simulations. In addition to textual data sources, stakeholders and experts are extensively involved, providing narratives for analysis and qualitative validation of models. The book presents a systematic application of computational social science methods to the substantive area of extortion racketeering. The reader will gain a deep understanding of extortion rackets, in particular their entrenchment in society and processes supporting and undermining extortion rackets. Also covered are computational social science methods, in particular computationally assisted text analysis and agent-based modelling, and the integration of empirical, theoretical and computational social science.
