Unveräußerliches Kulturgut im nationalen und internationalen Rechtsverkehr Marc Weber, 2015-02-06 Das Werk stellt die nationalen Rechtsordnungen der Schweiz, Deutschlands, Frankreichs, Italiens und Englands in Bezug auf besonders geschützte Kulturgüter dar und berücksichtigt das Kulturgüterrecht der Europäischen Union, das Völkerrecht sowie das Internationale Privatrecht. Im ersten Teil untersucht der Verfasser die sachen- und schuldrechtlichen Besonderheiten von Kulturgütern als res extra commercium in den genannten Rechtsordnungen. Er unterscheidet herkömmliche Kulturgüter, archäologische Objekte sowie kirchliche Kulturgüter. Der zweite Teil ist der Ausfuhrgesetzgebung gewidmet, wobei mit einer historischen Einleitung auf das römische Recht und auf die Rechtslage im Kirchenstaat eingegangen wird. Der dritte Teil behandelt den internationalen Rechtsverkehr mit unveräußerlichem Kulturgut. Der Verfasser analysiert kritisch die internationale Rechtsprechung anhand bekannter, aber auch bisher unbesprochen gebliebener Gerichtsentscheidungen. Schließlich wird das Kulturgüterrecht der Europäischen Union und der einschlägigen Staatsverträge wie die UNESCO-Konvention von 1970 und die UNIDROIT-Konvention von 1995 behandelt. Der Verfasser zeigt Lösungsansätze auf, wie ausländisches Kulturgüterrecht im Inland durchgesetzt werden könnte. Einen Schwerpunkt bildet die Darstellung der Situation von unveräußerlichem Kulturgut im französischen und italienischen Recht. Der Verfasser greift dabei auf die Entstehung dieser sachenrechtlichen Besonderheit von Kulturgut als Bestandteil des sog. domaine public bzw. demanio pubblico zurück und vergleicht diese mit dem schweizerischen und deutschen Recht.

*The Evolution of National Water Regimes in Europe* Stefan Kuks, Ingrid Kissling-Näf, 2013-06-05 All over the world countries struggle with water stress. Problems vary from water scarcity and a degrading water quality, to floods and a rising sea level due to climate change. The European Union adopted a Water Framework Directive to improve the sustainability of water management in its member states. Water management should be coordinated at the level of river basins as a whole.

Interests of various user groups should be better represented. River basin visions should take into account the impact of all human activities on the status of the resource. Water legislation needs streamlining and more focus on its implementation. The European Union advocates regulating water prices by charging the costs of water services on the basis of full cost recovery and the polluter pays principle. This book examines the development of water management in the Netherlands, Belgium, France, Spain, Italy and Switzerland. It is based on the European research project EUWARENESS. The authors apply a theoretical framework for the analysis of institutional regimes, water governance and property rights. The evolution of national water resource regimes is described over a period of almost 200 years (1800-2000). The long-term perspective enables the reader to see the conditions under which regime transformation and paradigm change are made possible. The book also includes a critical analysis of policy making by the European Union, and a comparative review and analysis of regime development in the six countries involved. This book is followed by another volume published with Kluwer Academic Publishers on Integrated Governance and Water Basin Management, edited by Hans Bressers and Stefan Kuks.

*Enhancement of Public Real-estate Assets and Cultural Heritage* Lucia Della Spina,Francesco Calabrò,2021-01-21 The management of cultural heritage and public real-estate assets is one of the most crucial challenges concerning the sustainable use of these resources, involving dynamic methods to stimulate preservation, development, renewal, and transmission to future generations of these essential assets. The contributions presented in this book provide a rich and varied panorama of research experiences and innovative tools, capable of promoting the re-use of cultural heritage in European cities and cultural landscapes, using a circular economy logic as a model of sustainable development. From this point of view, cultural capital becomes the driver of a regeneration process on the local, urban, and metropolitan scales, in which the transversal interconnections between the production cycles of the adaptive re-use of the available heritage, both in the adaptation and in the management phase, configure a circular process of multidimensional production of value. Therefore, future territorial redevelopment projects can base their idea strength on an open system of appropriately selected social attractors, whose enhancement and use have the objective of triggering widespread regeneration effects on the whole territory of influence, receiving inducement and resources to progress.

**Rivista di Estetica 85** AA.VV.,2024-07-05 This issue of the 'philosophy of the city' includes articles by scholars on a

range of human sciences, from media theory to aesthetics and architectural theory. Philosophy, social ontology, cultural anthropology, aesthetics, digital hermeneutics, media theory, cognitive science: these are just some of the disciplines that contribute to the philosophy of the city. This variety of approaches doesn't necessarily result in a chaotic mix. Many of the included forms of discourse belong to the same episteme, which means there are many connections and overlaps. This is true both in the literatures of reference and in the ways of answering the question of what 'the city' is. Secondly, the texts don't focus on the city itself, but on those who live in, design, imagine and think about it. Thirdly, because these texts create a place where different ideas can live together. This is like a city, where ideas change, are built on and then rebuilt. This is what Wittgenstein wrote about in his *Philosophical Investigations*.

**Diritto pubblico dell'economia - III edizione** Giuseppe Franco Ferrari, 2020-03-26T00:00:00+01:00 I processi di globalizzazione e la progressiva riduzione del ruolo giocato dai sistemi giuridici nazionali non nascondono ma, al contrario, finiscono per amplificare l'esigenza di inquadrare il mercato in regole giuridiche certe e prevedibili. Il diritto pubblico dell'economia si propone di coniugare le regole catallattiche del mercato con quelle della democrazia politica, nella consapevolezza che non vi è società libera senza economia di mercato e che la seconda si impernia necessariamente sulla continua ricerca di un equilibrio con i principi, i diritti e i valori codificati nelle Costituzioni statali e negli atti fondativi degli organismi sovranazionali che aspirano ad avere un ruolo di primo piano nella governance globale. Giunto alla sua terza edizione, in seguito ad un attento e profondo lavoro di aggiornamento, questo manuale offre una sintesi delle problematiche connesse all'articolato rapporto tra istituzioni pubbliche ed economia, con particolare riguardo al contesto italiano. Nello specifico, esso tiene conto del quadro evolutivo di sistema, delle applicazioni giurisprudenziali e delle linee di tendenza in atto, come pure delle più recenti innovazioni prodotte in conseguenza della crisi e del suo impatto sulle istituzioni nazionali ed europee.

**Water Law, Policy and Economics in Italy** Paolo Turrini, Antonio Massarutto, Marco Pertile, Alessandro de Carli, 2021-05-12 This book provides the first comprehensive overview of the most important water-related issues that centre on Italy, analysed from several disciplinary perspectives – such as hydrology, economics, law, sociology, environmental sciences and policy studies – in order to promote full understanding of the challenges the country is facing and the ways it could best tackle them. Despite the misconception that Italy is a water-scarce country, is in fact quite rich in water resources. Such resources, however, are unevenly distributed over the Italian territory. Italy's northern regions rely on quite an abundant quantity of freshwater, whereas in the southern area water endowment is limited. Moreover, climatic differences between North and South contribute to widen the divide. This disparity has notable consequences of socio-economic character, some of which, in turn, feed back into the environmental conditions of Italian regions: pollution, floods, landslides and droughts are among the problems affecting the country. There are numerous features of water use and consumption that

distinguish Italy from other comparable countries, such as the significant role played by agriculture (a water-intensive activity), a lead position in the consumption of bottled water, lower-than-average prices of water and a far-from-optimal efficiency of waterworks. All such aspects, and many others, make Italy an essential case study.

**Commons** Silke Helfrich, Heinrich-Böll-Stiftung, 2015-07-31 Commons - die Welt gehört uns allen! Die nicht enden wollende globale Finanzkrise zeigt: Markt und Staat haben versagt. Deshalb verwundert es nicht, dass die Commons, die Idee der gemeinschaftlichen Organisation und Nutzung von Gemeingütern und Ressourcen, starken Zuspruch erfahren - nicht erst seit dem Wirtschaftsnobelpreis für Elinor Ostrom. Commons sind wichtiger denn je. Sie beruhen nicht auf der Idee der Knappheit, sondern schöpfen aus der Fülle. Dieser Band mit Beiträgen von 90 internationalen Autorinnen und Autoren aus Wissenschaft, Politik und Gesellschaft stellt ein modernes Konzept der Commons vor, das klassische Grundannahmen der Wirtschafts- und Gütertheorie radikal in Frage stellt und eine andere Kultur des Miteinanders skizziert.

**Creating Property Rights** Margherita Colangelo, 2012-04-19 The creation by government regulation of entitlements akin to property rights is a phenomenon imposing a reconsideration of the traditional categories of public and private property. This book focuses on the European level by means of a comparative method involving private law, public law, and law and economics approaches.

**Solidarity: A Normative Principle** Guido Alpa, 2023-05-17 The term solidarity has acquired a commendable meaning of mutual responsibility, yet remains suspect because it has been invoked in too broad a spectrum of cultural contexts, ranging from fascist ideology to human rights. This essential book shows how solidarity may be - should be - conceived as a normative principle with pressing legal content, instrumental to the realisation of the social ends of today's democratic polities. The author, for the first time in such depth, documents the interweaving of legal norms with social ideas and values, focusing on the use of the principle of solidarity in the European Union's bodies and in its Member States. There are detailed examinations of how the principle appears in such realms as the following: national constitutions; welfare systems; regulation of contracts; social effects of legal rules; women's rights; the social market economy; the social doctrine of the Catholic Church; affirmation of corporate social responsibility; and sustainability and corporate governance. The author describes

how each context contributes to a meaningful elaboration of the concept of solidarity, thus synthesising and extending prior work on the subject. Following Kant's dictum that the solidarity of mankind is a 'to be or not to be; a matter of life or death', in today's difficult and calamitous times it is appropriate to rethink the principle of solidarity as the reason for living, living fully and not just surviving, in a social agglomeration we call a community. Decoding solidarity, in order to fully understand its potentialities, misrepresentations, and mystifications has therefore become a task entrusted to jurists. For this reason, this matchless book will prove invaluable for lawyers, judges, and policymakers, all of whose professions demand authoritative knowledge of the legal relations among individuals and among legal entities.

Origins of a new economic union (7th-12th centuries). Preliminary results of the nEU-Med project: October 2015-March 2017 Giovanna Bianchi, Richard Hodges, 2018-10-11 The nEU-Med project is part of the Horizon 2020 programme, in the ERC Advanced project category. It began in October 2015 and will be concluded in October 2020. The University of Siena is the host institution of the project. The project is focussed upon two Tuscan riverine corridors leading from the Gulf of Follonica in the Tyrrhenian Sea to the Colline Metallifere. It aims to document and analyze the form and timeframe of economic growth in this part of the Mediterranean, which took place between the 7th and the 12thc. Central to this is an understanding of the processes of change in human settlements, in the natural and farming landscapes in relation to the exploitation of resources, and in the implementation of differing political strategies. This volume brings together the research presented at the first nEU-Med workshop, held in Siena on 11-12 April, 2017. The aim of the workshop was to draw up an initial survey of research and related work on the project, one and a half years after its inception. The project is composed of several research units. Each unit covers an aspect of the interdisciplinary research underpinning the nEU-Med project, each with their own methodology. For this first volume of results, it was decided not to give an account of all the work carried out within all the units, but to select those lines of investigation which, at the end of the first year and a half, have made it possible to articulate and develop an interdisciplinary research strategy.
