Die Institutionalisierung der Evaluation in Europa Reinhard Stockmann, Wolfgang Meyer, 2021 Das Globe-Projekt des Centrums für Evaluation CEval strebt eine weltweite Bestandsaufnahme zum Stand der Institutionalisierung von Evaluation auf nationaler Ebene an. Dies ist der erste Band zu den Entwicklungen in 16 europäischen Ländern und in zentralen Institutionen der Europäischen Union. Untersucht werden anhand eines gemeinsamen Analyseleitfadens drei zentrale gesellschaftliche Systeme, nämlich das politische, das soziale und das Professionssystem. Hierfür konnten insgesamt 37 Expertinnen und Experten aus den jeweiligen Ländern und Institutionen gewonnen werden, die entsprechend der Vorgaben Recherchen durchgeführt und Länderbeschreibungen erstellt haben. Die Vorgehensweise ermöglicht zudem einen Ländervergleich, der in einer Synthese zum Stand der Institutionalisierung der Evaluation in Europa mündet.

Quality of life in Italy Filomena Maggino, Giampaolo Nuvolati, 2012-06-06 The outcome of the first Italian National Conference on Quality of Life, this volume is full of cogent analysis of topics and issues related to well being and quality of life, including focused papers on specific population groupings and discrete themes. Held in Florence in September 2010, the conference saw the creation of the Italian Association of Quality of Life Studies, devised as a forum for this varied field of research with a rapidly expanding profile in the context of the continuing financial crisis. The papers address a number of recognized quality-of-life concerns, including public health, wealth distribution, employment, political participation and the perception of crime. Contributors deploy innovative methods of analyzing official statistics that result in more complex and multidimensional indicators. Some papers provide data on other European nations that allow for comparative assessment, while others set out fresh approaches to evaluating quality of life itself. Highly relevant not just to academics, but to policy makers and practitioners in a range of sectors, this publication explores important aspects of a crucial contemporary subject.

Volume-Outcome Relationship in Oncological Surgery Marco Montorsi, 2020-10-15 The book offers a comprehensive review of the relations between volumes and outcomes in oncological surgery especially in Italian hospitals, based on national and regional data. After illustrating the quality-control methodology and the determinants of surgical outcomes, it discusses the volume-outcome relationship in different fields of surgical oncology (cancers of the upper and lower gastrointestinal tract, hepatopancreatobiliary system, breast, sarcomas etc.) and suggests possible solutions. The latest

findings from Europe and the USA are also presented.

Active Citizenship in Europe Cristiano Bee,2017-07-14 The book provides an overview of key issues in the debate concerning the emergence of active citizenship in Europe. The specific focus of enquiry is the promotion of patterns of civic and political engagement and civic and political participation by the EU and the relative responses drawn by organizations of the civil society operating at the supranational level and in Italy, Turkey and the UK. More specifically, it addresses key debates on the engagement and participation of organized civil society across the permanent state of euro-crisis, considering the production of policy discourses along the continuum that characterized three subsequent and interrelated emergency situations (democratic, financial and migration crises) that have hit Europe since 2005. Active Citizenship in Europe will be of interest to students and scholars in a range of fields, including sociology, politics, European studies and international studies.

Patient Involvement in Health Technology Assessment Karen M. Facey,Helle Ploug Hansen,Ann N.V. Single,2017-05-15 This is the first book to offer a comprehensive guide to involving patients in health technology assessment (HTA). Defining patient involvement as patient participation in the HTA process and research into patient aspects, this book includes detailed explanations of approaches to participation and research, as well as case studies. Patient Involvement in HTA enables researchers, postgraduate students, HTA professionals and experts in the HTA community to study these complementary ways of taking account of patients' knowledge, experiences, needs and preferences. Part I includes chapters discussing the ethical rationale, terminology, patient-based evidence, participation and patient input. Part II sets out methodology including: Qualitative Evidence Synthesis, Discrete Choice Experiments, Analytical Hierarchy Processes, Ethnographic Fieldwork, Deliberative Methods, Social Media Analysis, Patient-Reported Outcome Measures, patients as collaborative research partners and evaluation. Part III contains 15 case studies setting out current activities by HTA bodies on five continents, health technology developers and patient organisations. Each part includes discussion chapters from leading experts in patient involvement. A final chapter reflects on the need to clearly define the goals for patient involvement within the context of the HTA to identify the optimal approach. With cohesive contributions from more than 80 authors from a variety of disciplines around the globe, it is hoped this book will serve as a catalyst for collaboration to further develop patient involvement to improve HTA. If you're not involving patients, you're not doing HTA! - Dr. Brian O'Rourke, President and CEO of CADTH, Chair of INAHTA

Healthcare and Culture Maria Francesca Freda,Raffaele De Luca Picione,2017-02-01 The book deals with current issues, pertinent every healthcare relationship. Changes in medicine as well as some constant aspects over time arise within a cultural ground and generate new questions and issues that are not only purely medical, but also bioethical, social, political, economic and psychological of course. On the one hand, changes in medicine generate new questions for society, on the other hand, the society poses new questions to the medicine, new challenges, and in some cases they can conflict with

consolidated models and practices. Never the progress of Western medicine and its therapeutic practices have been as significant as in the last decades but the increase of specific competence and effectiveness of medical treatments are not linearly translated into an increase of consensus, dialogue and alliance between medicine and society. How does psychology take on a position of interlocutor towards medicine and its transformations? How does Cultural Psychology, Health Psychology, Clinical Psychology confront themselves with the processes of meaning making generated by medicine? The interest of the book is aimed to grasp the construction of processes of cultural, relational and subjective meaning in the dialogical encounter between medicine and society, between doctor and patient. The book intends to focus in particular on two specific plans: on the one hand, to present a reflection and analysis on contemporary medicine and its on?going transformations of the healthcare relationship; on the other hand, to present and discuss experiences of intervention and possible models of intervention addressed to healthcare and doctor?patient relationships during its crucial steps (consultation, formulation and communication of diagnosis, therapy, conclusion). The book's purposes are aimed to discuss crucial and current issues on the borders between medicine and psychology: consensus and sharing, decision?making and autonomy, subjectivity and narration, emotions and affectivity, medical semeiotics and cultural semiotics, training of physicians, and epistemological, theoretical and methodological issues.

The Institutionalisation of Evaluation in Europe Reinhard Stockmann, Wolfgang Meyer, Lena Taube, 2020-04-10 This book examines the progress of institutionalisation of evaluation in European countries from various perspectives. It describes both prior developments and current states of evaluation in 16 European countries and across the European Union (EU), focussing on three dimensions, namely the political, social and professional systems. These detailed country reports, which have been written by selected researchers and authors from each of the respective countries, lead to a concluding comparison and synthesis. This is the first of four volumes of the compendium *The Institutionalisation of Evaluation* to be followed by volumes on the Americas, Africa and Australasia. The overall aim is to provide an interdisciplinary audience with cross-country learning to enable them to better understand the institutionalisation of evaluation in different nations, world regions and different sectors.

Governance and Public Management Charles Conteh, Thomas J. Greitens, David K. Jesuit, Ian Roberge, 2014-05-09 The key difference between success and failure for most governance systems is adaptation, specifically the ability to resolve the existing social, cultural, economic and environmental challenges that constrain adaptation. Local, regional and national systems differ in how they are designed to organize effective participation and create innovative ideas for missions, goals, strategies and actions. They also differ in how they build the effective coalitions needed to adopt, guide and protect strategies and actions during implementation, and how to build competence and knowledge to sustain implementation. This

book presents the strategic foundations for government's role in fostering and adapting to societal transformation in a volatile world. It shifts the focus of the discipline from an overtly retrospective analysis to a prospective analysis, incorporating the role of foresight techniques and instruments. Above all, it stimulates debate about the practical implications of governance as an emergent future-oriented framework of public management. This challenging book aims to facilitate dialogue and discussion between academics and practitioners, and encourage advanced students to take a new perspective on Public Management during these volatile times.

Citizens in Europe Giovanni Moro,2011-12-04 In the Community-building process, citizens are the most invoked and feared, but at the same time the least known subject. This lack of knowledge nourishes the citizens' detachment from the European Union and itself emerged in well known cases such as the French and Dutch referenda on the Constitutional Treaty or the public concern towards the EU policy on immigration. This gap is true especially for active citizenship organizations operating in the European policy making, not only in Brussels, but also and above all at national and local levels, and this book is aimed at filling this knowledge gap. The book is divided into two parts. The first part of the book focuses on the way in which the literature on EU governance and citizenship and on participatory democracy deals with citizen activism in public policy making. The second part discusses a number of empirical research projects on civic activism in Europe. This book aims, on the one hand, to bridge the academic debate to more policy oriented debates in which active citizenship organizations and policy makers are involved; and, on the other hand, to bridge theoretical discussion of the nature of the EU with the empirical literature based on the study of civic activism in Europe and at the national level. The distinctiveness of the book is that it tries to overcome both the "methodological nationalism" that affects the research and public debate on the EU, the normative attitude of most part of European studies in favor of an approach aimed at describing phenomena, and the habit of dealing with civic associations in Europe by referring only to the "Brussels Civil Society, making it of interest to both policy makers as well as students and scholars in European Studies, Political Science, Sociology and International Relations.

Human-Centered Service Design for Healthcare Transformation Mario A. Pfannstiel,2023-01-27 This book explores the use of human-centered service design. Through a variety of case studies and best practices, it highlights ways to systematically improve the provision of healthcare services to different target and age groups in order to understand customer expectations and needs. The book also offers new insights into the dyadic relationship between service provider and customer, each of which has their own set of goals, purposes, and benefits and must cope with a scarcity of resources and opportunities to optimize and design. Written by recognized experts, scholars, and practitioners, this book demonstrates how, where, and when to successfully apply human-centered service design at multiple levels, including corporate, departmental, and product/service. Value-added services are not only assessed in terms of their effectiveness, efficiency, and

productivity, but also bearing in mind human emotions, interactions, and communication techniques as an important part of service provision. Accordingly, the book will appeal to scholars and practitioners in the hospital and healthcare sector, and to anyone interested in organizational development, service business model innovation, customer involvement and perceptions, and the service experience.

Water Law, Policy and Economics in Italy Paolo Turrini, Antonio Massarutto, Marco Pertile, Alessandro de Carli, 2021-05-12 This book provides the first comprehensive overview of the most important water-related issues that centre on Italy, analysed from several disciplinary perspectives – such as hydrology, economics, law, sociology, environmental sciences and policy studies – in order to promote full understanding of the challenges the country is facing and the ways it could best tackle them. Despite the misconception that Italy is a water-scarce country, is in fact quite rich in water resources. Such resources, however, are unevenly distributed over the Italian territory. Italy's northern regions rely on quite an abundant quantity of freshwater, whereas in the southern area water endowment is limited. Moreover, climatic differences between North and South contribute to widen the divide. This disparity has notable consequences of socio-economic character, some of which, in turn, feed back into the environmental conditions of Italian regions: pollution, floods, landslides and droughts are among the problems affecting the country. There are numerous features of water use and consumption that distinguish Italy from other comparable countries, such as the significant role played by agriculture (a water-intensive activity), a lead position in the consumption of bottled water, lower-than-average prices of water and a far-from-optimal efficiency of waterworks. All such aspects, and many others, make Italy an essential case study.

Italienische Mediensprache. Handbuch / Glossario del linguaggio dei mass media Eckhard Römer, 2009-12-15 So wie jedem deutschen Zeitungsleser der Barras, die Schlapphüte, die Hardthöhe zu geläufigen Begriffen geworden sind, und Abkürzungen wie AOK, TÜV oder DGB so vertraut sind, dass eine Auflösung oder Erklärung dieser Abkürzungen nicht erforderlich ist, muss auch dem italienischen Leser nicht erläutert werden, für was Fiamme Gialle, Botteghe Oscure, Inps oder Tac stehen. Die vorliegende Ausarbeitung gibt denjenigen Hilfestellung, die bereits gute Grundkenntnisse der italienischen Sprache besitzen und diese nun um den Wortschatz erweitern wollen, wie er in den italienischen Medien verwendet wird. Dem Leser bietet sich eine wahre Fundgrube, die in dieser Zusammenstellung bislang nicht vorhanden ist. Mit seinem Anliegen richtet sich das Werk sowohl an den wissenschaftlich vorgeprägten Leser als auch an den interessierten Laien. Thematisch wird dabei, in Anlehnung an den Aufbau einer italienischen Tageszeitung, ein weiter Bogen geschlagen von Politik über Wirtschaft, Justiz, Arbeit und Soziales bis hin zu Kultur, Umwelt, Verkehr oder Sport.

Il coraggio dell'amore Angelo Ambrosino, 2016-09-06 Un uomo comune imprigionato nel ghiaccio di una drammatica

notte... Solo! Col suo coraggio rompe le tenebre che hanno sommerso lui e travolto suo figlio. Entrambi si ritrovano, all'improvviso, sulle due opposte sponde della vita e della morte, come non mai uniti in un unico catartico destino di luce e di amore. Dio ha voluto creare un eroe perché nasca il bene dal male... perché dal dolore prenda origine l'amore. Il coraggio dell'amore diviene il più elevato e sublime racconto di un'anima che esiste e resiste nell'indifferenza degli uomini, in un eroico "mezzogiorno di fuoco" dove Angelo Ambrosino, perdente e abbandonato dall'Onnipotente Dio agli occhi del gelido mondo, non getta via la Stella d'Oro che Lui gli ha donato... perché quella stella reca l'immagine di suo figlio nell'alba vittoriosa di una nuova vita.

Community building: logiche e strumenti di management Francesco Longo,Sara Barsanti,2022-01-27T00:00:00+01:00

Casa e Ospedali di Comunità, Welfare di Comunità, Infermiere di Comunità, co-production degli utenti sono le nuove visioni per lo sviluppo dei servizi socio-sanitari. Cosa vuol dire concretamente disegnare e gestire un lavoro di comunità a livello locale, sia in ambito sanitario, sia in ambito sociale? Quali sono le logiche e gli strumenti manageriali da attivare? Per rispondere a queste domande occorre avere un framework nitido sull'approccio di community building, una conoscenza degli strumenti gestionali possibili e una familiarità con i casi di successo già attivi. Il community building sperimenta forme di partecipazione attiva di attori di natura diversa, volte a innovare le politiche pubbliche e favorire processi collettivi. La comunità locale viene concettualizzata come un insieme di reti sociali che possono essere naturali o costruite, formali o informali. Esse hanno natura e caratteristiche diverse, pertanto richiedono approcci gestionali distinti e specifici. Obiettivo del presente libro è operazionalizzare il framework valoriale del community building per offrire a practitioner, policymaker e studiosi un quadro concettuale e un portafoglio di strumenti e leve manageriali di riferimento, che rendano possibile organizzare e gestire questo approccio. L'analisi di numerose good practice italiane e internazionali di community building permette di disporre di esemplificazioni pratiche a cui ispirarsi.
