The Eastern Gate Sudeep Chakravarti, 2022-01-06 Traders, Pushers, Soldiers, Spies. A pivot for India's Act-East policy. The gateway to a future of immense possibilities from hydrocarbons to regional trade over land and water that could create a new Silk Route. A bulwark against China. A cradle of climate change dynamics and migration. 'Northeast' India, the appellation with which India's far-east is known, is all this and more. Alongside hope and aspiration, it is also home to immense ethnic and communal tension, and a decades-old Naga conflict and the high-profile peace process that involves four gateway states—Nagaland, Manipur, Arunachal Pradesh and Assam—and several million people. It's among the most militarized zones in the world. It's a playground of corruption and engineered violence. Only real peace, and calm in both Myanmar and Bangladesh, will unlock this Eastern gate. A keen observer and frequent chronicler of the region, Sudeep Chakravarti has for several years offered exclusive insights into the Machiavellian—Chanakyan—world of the Naga and other conflicts and various attempts to resolve these. He now melds the skills of a journalist, analyst, historian and ethnographer to offer inside stories and a ringside view to the tortuous, no-holds-barred attempts at resolving conflict. Employing a 'dispatches' style of storytelling, and interviews with rebel leaders, politicians, bureaucrats, policymakers, security specialists and operatives, gunrunners, 'narcos', peace negotiators and community leaders, Chakravarti's narrative provides a definitive guide to the transition from war to peace, even as he keeps a firm gaze on the future. *The Eastern Gate* is a tour de force that captures this story of our times.

Northeast India Bhagat Oinam, Dhiren A. Sadokpam, 2018-05-11 Northeast India is a multifaceted and dynamic region that is constantly in focus because of its fragile political landscape characterized by endemic violence and conflicts. One of

the first of its kind, this reader on Northeast India examines myriad aspects of the region - its people and its linguistic and cultural diversity. The chapters here highlight the key issues confronted by the Northeast in recent times: its history, politics, economy, gender equations, migration, ethnicity, literature and traditional performative practices. The book presents interlinkages between a range of socio-cultural issues and armed political violence while covering topics such as federalism, nationality, population, migration and social change. It discusses debates on development with a view to comprehensive policies and state intervention. With its a nuanced and wide-ranging overview, this volume makes new contributions to understanding a region that is critical to the future of South Asian geopolitics. The book will be of great interest to scholars and researchers of contemporary Northeast India as well as history, political science, area studies, international relations, sociology and social anthropology. It will also appeal to those interested in public administration, regional literature, cultural studies, population studies, development studies and economics. The Threat Lilia Giugni, 2022-11-17 Why has the digital revolution been damaging for so many women? And what can be done about it? *The Threat* explores today's digital capitalism through the prism of the women who are harmed by it globally. Some of them are victimised through digital devices. Others are exploited while producing them. And some don't even have access to the Internet, but are brutally raped in wars funded by the minerals that make our tablets work. With the help of individuals' stories and interviews, activist and academic Dr Lilia Giugni explores how millions of women across the world are violated, exploited and marginalised due to processes of technological change. She unpacks the tight intersections between technology, patriarchy and capitalism - exposing the profit-driven market in which our digital devices are designed and built, and the patriarchal society that shapes who gets to use them and how. Above all, Lilia Giugni gives us very practical ideas to help us take back the tech: turning technology into a truly emancipatory force and a leverage to create a better and more just future for women and for all. 'A brilliant and engaging exposé of how the forces of capitalism and patriarchy penetrate our digital world - and what women can do to fight back.' Hannah Jewell, author of ;100 Nasty Women of History

Dariali: The 'Caspian Gates' in the Caucasus from Antiquity to the Age of the Huns and the Middle Ages Eberhard Sauer, 2020-04-30 The Huns, invading through Dariali Gorge on the modern-day border between Russia and Georgia in AD 395 and 515, spread terror across the late antique world. Was this the prelude to the apocalypse? Prophecies foresaw a future Hunnic onslaught, via the same mountain pass, bringing about the end of the world. Humanity's fate depended on a gated barrier deep in Europe's highest and most forbidding mountain chain. Centuries before the emergence of such apocalyptic beliefs, the gorge had reached world fame. It was the target of a planned military expedition by the Emperor Nero. Chained to the dramatic sheer cliffs, framing the narrow passage, the mythical fire-thief Prometheus suffered severe

punishment, his liver devoured by an eagle. It was known under multiple names, most commonly the Caspian or Alan Gates. Featuring in the works of literary giants, no other mountain pass in the ancient and medieval world matches Dariali's fame. Yet little was known about the materiality of this mythical place. A team of archaeologists has now shed much new light on the major gorge-blocking fort and a barrier wall on a steep rocky ridge further north. The walls still standing today were built around the time of the first major Hunnic invasion in the late fourth century - when the Caucasus defenses feature increasingly prominently in negotiations between the Great Powers of Persia and Rome. In its endeavor to strongly fortify the strategic mountain pass through the Central Caucasus, the workforce erased most traces of earlier occupation. The Persian-built bastion saw heavy occupation for 600 years. Its multi-faith medieval garrison controlled Trans-Caucasian traffic. Everyday objects and human remains reveal harsh living conditions and close connections to the Muslim South, as well as the steppe world of the north. The Caspian Gates explains how a highly strategic rock has played a pivotal role in world history from Classical Antiquity into the twentieth century.

Economic Development of Caricom Winston H. Griffith,2021-10-12 The early pioneers of development attributed the poor economic and social conditions in less developed nations to cultural and environmental elements. Some argued that their small size was also a contributing element. In the latter decades of the twentieth century proponents of the neoclassical counterrevolution shifted the focus to the dirigiste policies of governments. Taking a heterodox approach, however, this study argues that the persistent low level of development in CARICOM nations is due to their being utilized as global agricultural and manufacturing production platforms, their enduring colonial economic and social structures that have slowed down economic transformation, the negative attitudes of classes, the anti-development policies of some governments and, since the human element provides the motor forces that ultimately drive development, their failure to accumulate an adequate pool of knowledge skills that are now dominating production processes in the new global economy.

Wars From Within: Understanding And Managing Insurgent Movements Albrecht Schnabel,Rohan Gunaratna,2014-10-30 Wars from Within brings together an international and multidisciplinary group of academics and practitioner-researchers specializing in the study of insurgent movements in order to provide a deeper understanding of the violent manifestations of insurgencies in different parts of the world. In doing so, the book adopts both a functional and regional approach. Firstly,

thematic chapters discuss the typology of insurgencies (ethnopolitical, religious and ideological), past and potential responses to them, as well as the impact of advance communication technology on insurgent activity. The book then presents a series of case studies assessing the successes and failures of managing contemporary insurgencies. These are drawn from European, Asian and Middle Eastern insurgencies, as well as the global al-Qaeda network that typifies the post-9/11 challenge posed by internationally operating terrorist organizations. The case studies highlight factors and conditions that trigger, escalate, de-escalate and ultimately end insurgent campaigns. The book concludes with an assessment of how the international community at large has responded and should respond to insurgencies in the future.
