O impacto do planeamento do sector de energia eléctrica angolano no processo de integração regional da África Austral

João de Jesus Afonso Domingos Neto, 2014-09-12 O impacto do planeamento do sector de energia eléctrica angolano no processo de integração regional da África Austral, é a estratégia que nós delineámos para que Angola, face à desestruturação da sua política macroeconómica, se insira no processo de integração na região. Na prossecução deste objectivo, após análise do sector em questão, delineámos como factor determinante deste processo a reestruturação da política tarifária versus planeamento, na medida em que ela é o garante de toda a política do sector e, por conseguinte, sendo parte integrante da política macroeconómica influenciará sobre a mesma e vice-versa. Este trabalho pretende identificar como a política tarifária versus política macroeconómica joga em simultâneo para o equilíbrio interno e externo de Angola e, conseqüentemente, para o processo de integração regional. Palavras chaves: planeamento, sistema tarifário, financiamento e investimento, dívida pública, estabilização e integração regional.

A Ciência da Alma: O Equilíbrio entre a Energia, a Vida, a Mente, a Alma, o Espírito e Deus Daniel Marques,

Energia's Research Adventures Jacques L. Koko Ph.D., 2022-06-12 By means of fictional characters and storytelling, the book examines non-renewable and renewable energy sources through the lenses of a variety of research methodologies. It sheds light on the meaning of research, portrays different tactics for designing and conducting research in the social sciences, both in quality and quantity, inductively and deductively. It translates the great diversity that research cultures or traditions nestle. It utilizes fiction to discuss a set of qualitative and quantitative research methods for data collection, including the techniques of self-examination, diary or journal keeping, observation, interview, survey, and experiment. It also explains strategies for data analysis that encompass content analysis, narrative analysis, comparative analysis (independent t-test, paired-sample t-test, and one-way analysis of variance), correlation analysis, regression analysis, time-series analysis, and factor analysis. Energia's research adventures confirm the significance of diversity and moderation not only in the realm of research methodologies, but also in the human use and history of non-renewable and renewable energies. By means of fiction, the book examines the daunting journey of the humankind through the fossil fuels, solar, wind, and water energy

sources in the perspective of yin and yang. The message for the reader is simple. In our quest of answers for the many questions we face daily in existence, we need to balance and embrace diversity and moderation mindfully in the processes and outcomes of our investigations for the sake of a healthy human environment and nature. There may not be any narrow one-size-fits-all solution to the resilient existential issues of energy facing our environment and its species. Existential queries usually imply a broad stream of multiple potential solutions, each of which presents both advantages and disadvantages.
