**Local Public Finance in Europe** Bernard Dafflon,2002-01-01 '...the book contains a good deal of useful information about local government finance in Europe.' - John Fender, Local Government Studies '...I would like to thank you for publishing the great book Local Public Finance in Europe. It is a rare source of institutional information and also great insights on the subject.' - Andrey Timofeev, Georgia State University, US 'In respect of the hard budget constraint imposed by the stability pact for Maastricht...and the fact that European central governments can no longer bail out sub-federal obligations for more than 3% deficit to GNP annually and 60% debt to GDP...the volume edited by B. Dafflon is important and highly welcome.... Insofar, it represents an interesting and important milestone in the evaluation of the success of local budget rules in European countries.' - C.A. Schaltegger, Kyklos Most countries apply some form of restrictions to local government budgeting and borrowing, but in various forms and to varying degrees. These restrictions are considered necessary components of a fiscal federalism involving some sort of central government control in local affairs, a design which can be termed 'administrative federalism'. In this comprehensive book Bernard Dafflon introduces the reader to the institutional complexities of fiscal controls in European local public finance. The authors comprehensively explore the issues of government budgeting and borrowing, with the ultimate aim of understanding how mechanisms of fiscal discipline are established and function. Ten European countries are scrutinised on the basis of ten key issues including local budgetary policy-making, the policy effects of local budget deficits and public debt, the rules of amortisation and debt instalment, whether extensive fiscal controls promote budget accountability and discipline, and how the Maastricht criteria concerning deficit and debt can be implemented. They go on to highlight the complicated mix of rules, administrative routines and co-operative arrangements through which each country implements their individual budget controls. Although these arrangements have been successful in avoiding serious fiscal imbalance in the last twenty years, the authors argue that their

impact on the broader goals of the government sector remains a more contentious question. This book offers a broad understanding of the rich institutional variations and elaborate fiscal designs in Europe from a comparative perspective. It will be welcomed by political scientists, public sector managers and economists, and scholars, practitioners and advanced students of public policy and fiscal studies.

**Local Public Finance** René Geissler,Gerhard Hammerschmid,Christian Raffer,2021-04-20 This book is based upon a comparative public administration research project, initiated by the Hertie School of Governance (Germany) and the Bertelsmann Foundation (Germany) and supported by a network of researchers from many EU countries. It analyzes both the regimes and the practices of local fiscal regulation in 21 European countries. The book brings together key findings of this research project. The regulatory discussion is not limited to the prominent issue of fiscal rules but focuses on every component of regulation. Beyond this, the book covers affiliated topics such as the impact of regulation for local governments, evolution of regulation, administrative costs and crisis prevention. The various book chapters throughout provide a broad picture of local public finance regulation in theory and in practice, using different theoretical and national lenses for the analysis. Furthermore, the authors investigate the effects of budgetary constraints and higher-level regulatory efforts on local governments and on democracy and public services in every European country. This book fills a gap with respect to the lack of discussion on local government finance from an international, comparative perspective and, in particular, the regulation of local public finance. With its mix of authors, this book will be useful for practitioners as well as for scholars and for theory-driven research.

Die Bildungssysteme Europas Hans Döbert,Wolfgang Hörner,Botho von Kopp,Lutz R. Reuter,2017-07-03 Autoren und Herausgeber können mit der vierten Auflage dieses Handbuchs auf eine lange Erfolgsgeschichte der Bildungssysteme Europas zurückblicken; seit 2002 sind vier deutschsprachige und zwei englischsprachige Ausgaben erschienen. Die aktualisierte und in Teilen neu erarbeitete vierte Auflage der Bildungssysteme Europas beschreibt in dieser Form bisher einmalig die Bildungssysteme aller souveränen Staaten Europas. Als einziger der sechs europäischen Zwergstaaten wurde der Vatikanstaat nicht berücksichtigt, da seine einzelnen exterritorialen Bildungseinrichtungen kein geschlossenes Bildungssystem darstellen. Autonome, aber abhängige Gebiete wurden nur dann explizit berücksichtigt, wenn sich ihr

Bildungssystem deutlich von dem des jeweiligen Staates unterscheidet. Derzeit trifft das nur auf die Färöer zu. Somit enthält der Band die Beschreibung und Analyse von insgesamt 50 Bildungssystemen, erarbeitet von mehr als 70 Bildungsexperten, die durch eine entsprechende Sachkompetenz in ihren Staaten oder international ausgewiesen sind. Die Länderbeiträge sind jeweils so gegliedert, dass sie historische Entwicklungslinien aufzeigen, Reformen im Bildungssystem und ihre Kontextbedingungen beschreiben, die Organisation des jeweiligen Schulsystems sowie das System der allgemein- und berufsbildenden Schulen analysieren, aktuelle Probleme wie die Integration der Flüchtlinge und Asylsuchenden in das Bildungssystem thematisieren und Entwicklungsperspektiven des jeweiligen Bildungssystems aufzeigen. Die Herausgeber streben mit dem Band nicht nur eine systematische Verbesserung der Informationslage über Bildung in den einzelnen Staaten an, sondern durch eine Verknüpfung von Deskription und analysegeleiteter, problemorientierter Darstellung auch eine hinreichende Tiefe der Analysen und damit die Ermöglichung des Vergleichs.

**Asset Pricing, Real Estate and Public Finance over the Crisis** A. Carretta, G. Mattarocci, 2013-02-03 The current financial crisis started from the US real estate market and after, though the increase of risk premium requested by investors and due to the lack of liquidity of all financial markets, it became a world financial crisis. A detailed analysis during the crisis focuses attention on asset management, the real estate and public sector.

*Peasants and Soldiers* Giulio Ongaro, 2016-11-03 Early-modern Venice is predominantly remembered as a maritime power, yet historians have become increasingly interested in its political and military aspirations within the Italian mainland. Adding to the growing literature on this subject, Giulio Ongaro's book addresses the practical management of the Venetian military apparatus in this period. Focusing on two provinces - Vicenza and Brescia - he interrogates a broad spectrum of primary source documents produced by these rural communities that illuminate Venetian military activities between the mid-sixteenth century and the end of the War of Candia in 1670. From the production of the saltpeter, the construction of the fortresses, the supplying and the training of the rural militia and the quartering of troops, this book shows how essential military activities were managed and overseen at the local level. In so doing, it demonstrates how local autonomy over the management of Venetian military apparatus - particularly from an economic point of view - did not necessarily conflict with wider, ongoing processes of state building or moves towards the centralization of particular public functions. Indeed the state appeared to encourage local élites (initially urban, then rural) to take a leading role in overseeing the localised management of military tasks. The result was a system that both supported the resilience of the local economy (both public and private), and which strengthened and improved the Republic's military assets, allowing it to remain the only Italian state free from the domination of European monarchies.
