Die Akte Tengelmann und das mysteriöse Verschwinden des Milliardärs Karl-Erivan Haub Liv von Boetticher, 2023-05-30 Die Geschichte liest sich wie ein Hollywood-Thriller, ist aber wahr: Am 7. April 2018 verschwindet der deutsch-amerikanische Milliardär Karl-Erivan Haub im Gletschergebiet am Matterhorn. Der bestens trainierte Extremsportler hinterlässt keine einzige Spur, keinen Hilferuf, kein Zeichen eines Überlebenskampfes. Im Oktober 2018 wird die Suche nach ihm offiziell eingestellt, seine Leiche wird nie gefunden. Ein Bruder Haubs lässt den Unternehmer für tot erklären, was seine Macht in einem Firmenimperium sichert, zu dem unter anderem OBI, KiK und Teile von Zalando gehören. Die Investigativjournalistin Liv von Boetticher hat den Fall jahrelang recherchiert. Obwohl ihr jede Menge Steine in den Weg gelegt wurden, erhielt sie Zugang zu streng vertraulichen Akten privater Ermittler. Sie lassen den Schluss zu: Der Verschwundene könnte noch leben – und zwar in Russland. Viel spricht dafür, dass der frühere Chef des Tengelmann-Imperiums seit Jahren in äußerst dubiose Geschäfte in Russland verstrickt und vermutlich deswegen auf das Radar der amerikanischen Bundespolizei FBI und der CIA geraten war. Eine spannende Lektüre aus der Welt von Reichen, die sich mit den falschen Leuten eingelassen haben.

*Opening Up Education* Toru Iiyoshi, M.S. Vijay Kumar, 2010-09-24 Experts discuss the potential for open education tools, resources, and knowledge to transform the economics and ecology of education. Given the abundance of open education initiatives that aim to make educational assets freely available online, the time seems ripe to explore the potential of open education to transform the economics and ecology of education. Despite the diversity of tools and resources already available—from well-packaged course materials to simple games, for students, self-learners, faculty, and educational institutions—we have yet to take full advantage of shared knowledge about how these are being used, what local innovations are emerging, and how to learn from and build on the experiences of others. *Opening Up Education* argues that we must develop not only the technical capability but also the intellectual capacity for transforming tacit pedagogical knowledge into commonly usable and visible knowledge: by providing incentives for faculty to use (and contribute to) open education goods, and by looking beyond institutional boundaries to connect a variety of settings and open source entrepreneurs. These essays

by leaders in open education describe successes, challenges, and opportunities they have found in a range of open education initiatives. They approach—from both macro and micro perspectives—the central question of how open education tools, resources, and knowledge can improve the quality of education. The contributors (from leading foundations, academic institutions, associations, and projects) discuss the strategic underpinnings of their efforts first in terms of technology, then content, and finally knowledge. They also address the impact of their projects, and how close they come to achieving a vision of sustainable, transformative educational opportunities that amounts to much more than pervasive technology. Through the support of the Carnegie Foundation for the Advancement of Teaching, an electronic version of this book is openly available under a Creative Commons license at The MIT Press Web site, <http://mitpress.mit.edu>. The Digital City Germaine R. Halegoua,2020-01-21 Shows how digital media connects people to their lived environments Every day, millions of people turn to small handheld screens to search for their destinations and to seek recommendations for places to visit. They may share texts or images of themselves and these places en route or after their journey is complete. We don't consciously reflect on these activities and probably don't associate these practices with constructing a sense of place. Critics have argued that digital media alienates users from space and place, but this book argues that the exact opposite is true: that we habitually use digital technologies to re-embed ourselves within urban environments. The Digital City advocates for the need to rethink our everyday interactions with digital infrastructures, navigation technologies, and social media as we move through the world. Drawing on five case studies from global and mid-sized cities to illustrate the concept of "re-placeing," Germaine R. Halegoua shows how different populations employ urban broadband networks, social and locative media platforms, digital navigation, smart cities, and creative placemaking initiatives to turn urban spaces into places with deep meanings and emotional attachments. Through timely narratives of everyday urban life, Halegoua argues that people use digital media to create a unique sense of place within rapidly changing urban environments and that a sense of place is integral to understanding contemporary relationships with digital media.

Trame nascoste AA. VV.,2021-10-07T00:00:00+02:00 Le teorie della cospirazione hanno guadagnato negli ultimi anni un crescente spazio nel linguaggio quotidiano e nella comunicazione dei media e della politica. Come l'altra faccia di una stessa medaglia, le notizie di cronaca si accompagnano alle fake news, la verità alla post-verità, l'informazione alla controinformazione, i discorsi delle istituzioni alla dietrologia. Se "tutto il mondo è un palcoscenico", come già insegnava Shakespeare, le teorie della cospirazione sono il racconto del suo retroscena: ogni società, non importa quanto illuminata ritenga di essere, ha il proprio lato in ombra popolato da nemici, reali o immaginati. È un antimondo che si cela dietro la realtà che ci è più familiare. Attraverso lo sguardo di studiosi di diverse discipline, questo libro porta alla luce le "trame nascoste" al centro delle molte teorie della cospirazione che circolano oggi in Italia, da quelle dei no-vax e dei negazionisti della Shoah a quelle sui cambiamenti climatici e sui contatti con gli alieni, da quelle dei terrapiattisti e dei romanzi di Umberto Eco fino a quelle sulla sostituzione etnica dovuta alle immigrazioni e sui rischi per la salute legati all'alimentazione. Queste teorie, sostenute con convinzione o aspramente criticate, sono un fenomeno sociale e culturale sempre più rilevante che anima l'immaginario collettivo, crea movimenti di protesta, indirizza l'opinione pubblica. Il cospirazionismo è ormai uno dei grandi miti della contemporaneità, un patrimonio di narrazioni controverse e alternative che riflettono le paure, i dubbi e le aspettative del nostro tempo.

*Educating Children and Young People in Care* Sonia Jackson, Claire Cameron, Graham Connelly, 2015-05-21 Children and young people in care rarely match the academic achievements of their peers and policy and procedures to address this inequality have not yet remedied the problem. Drawing on ideas from social pedagogy, the authors present a new approach - learning placements and caring schools. They show that education and care must be considered integral to both out of home placements and schools. Packed with practice examples, it includes chapters on early childhood education and care, as well as alternatives to school and higher education, covering everything from birth up to the age of 25. It highlights the potential benefits of a range of learning opportunities, from drama and outdoor activities, to bedtime stories and mentoring as well as providing support for teachers in their role as carer. Chapters include key points, case studies, practice points and useful resources. This is a unique evidence-informed practical guide for students and professionals in the fields of social work, social care, psychology and education.

Future Internet infrastructures research is therefore a must. The Future Internet Assembly (FIA) is a successful conference that brings together participants of over 150 research projects from several distinct yet interrelated areas in the European Union Framework Programme 7 (FP7). The research projects are grouped as follows: the network of the future as infrastructure connecting and orchestrating the future Internet of people,

computers, devices, content, clouds and things; cloud computing, Internet of Services and advanced software engineering; the public-private partnership projects on Future Internet; Future Internet Research and Experimentation (FIRE). The 26 full papers included in this volume were selected from 45 submissions. They are organized in topical sections named: software driven networks, virtualization, programmability and autonomic management; computing and networking clouds; internet of things; and enabling technologies and economic incentives.

5G Radio Access Network Architecture Sasha Sirotkin, 2020-12-07 Discover how the NG-RAN architecture is, and isn't, ready for the challenges introduced by 5G 5G Radio Access Network Architecture: The Dark Side of 5G explores foundational and advanced topics in Radio Access Network (RAN) architecture and why a re-thinking of that architecture is necessary to support new 5G requirements. The distinguished engineer and editor Sasha Sirotkin has included numerous works written by industry insiders with state of the art research at their disposal. The book explains the relevant standards and technologies from an academic perspective, but also explains why particular standards decisions were made and how a variety of NG-RAN architecture options could be deployed in real-life networks. All major standards and technologies associated with the NG-RAN architecture are discussed in this book, including 3GPP, O-RAN, Small Cell Forum, IEEE, and IETF. Readers will learn about how a re-design of the RAN architecture would ensure that 5G networks can deliver their promised throughput and low latency KPIs consistently and sustainably. The book is structured as follows: An overview of the market drivers of the NG-RAN architecture, like spectrum models, 5G-relevant regulatory considerations, and 5G radio interface technical requirements An overview of the 5G System, from the core network, to the RAN, to the radio interface protocols and physical layer, with emphasis on how these are different compared to 4G Release-15 RAN architectures defined in 3GPP, O-RAN, and Small Cell Forum RAN architecture evolution in Release-16 and Release-17 Enabling technologies, like virtualization, open source technologies, multi-access edge (MEC) computing, and operations, administration, and management (OAM) NG-RAN deployment considerations, objectives, and challenges, like costs, spectrum and radio propagation considerations, and coverage Perfect for network designers and operators who require a solid understanding of the NG-RAN architecture, 5G Radio Access Network Architecture also belongs on the bookshelves of network engineers who aim to increase their understanding of the standards and technologies relevant to the NG-RAN architecture.
