*Das Ende der Schöpfung?* John Casadesus, 2016-12-15 Das Ende der Schöpfung beinhaltet eine umfassende, detaillierte und topaktuelle Dokumentation sämtlicher Klimafakten (Stand 2016), die den durch den Menschen verursachten Klimawandel zweifelsfrei beweisen. Zudem werden die vielfältigen Gefahren einer fortschreitenden Erderwärmung aufgezeigt bis hin zur Vernichtung der Schöpfung. Durch folgende Punkte zeichnet sich dieses Buch aus: a) Alle Klimafakten beruhen auf seriösen und international anerkannten Quellen der Klimawissenschaft. b) Große, übersichtliche Bilder und Graphiken dienen zur Veranschaulichung der Fakten, darunter 50 farbige Abbildungen. c) Eine klare, übersichtliche Gliederung des umfangreichen Stoffes sowie das Hervorheben wichtiger Absätze erleichtert das Lesen und die Orientierung. d) Das Buch ist ausschließlich auf wissenschaftlichen Fakten aufgebaut. Damit erhält der Leser ein einzigartiges Klimalexikon, das ihn sachlich und fachlich über die topaktuelle Faktenlage des Klimawandels informiert. In Band 2 folgt dann unter dem Untertitel Die Chancen u.a. eine ausführliche Bestandsaufnahme der emissionsfreien Energiequellen. Dies umfasst sowohl den aktuellen Stand der Technik und Anwendung als auch die wirtschaftlichen und politischen Möglichkeiten, die Erderwärmung mit Hilfe dieser Technologien zu begrenzen. U.a. werde ich dort auf die große Chance der Menschheit eingehen, mit einer Kombination aus Zukunftsinvestitionen, Innovationen, technologischem Fortschritt, intelligenter Energieeffizienz, kluger Kooperation und sinnvoller Koordination, nur kleinen Einschränkungen des Komforts und der Lebensweise sowie einer zielgerichteten Gesetzgebung die globale Erderwärmung zu begrenzen.

**China's Influence on Non-Trade Concerns in International Economic Law** Paolo Davide Farah, Elena Cima, 2016-10-14 This volume examines the range of Non-Trade Concerns (NTCs) that may conflict with international economic rules and proposes ways to protect them within international law and international economic law. Globalization without local concerns can endanger relevant issues such as good governance, human rights, right to water, right to food, social, economic, cultural and environmental rights, labor rights, access to knowledge, public health, social welfare,

consumer interests and animal welfare, climate change, energy, environmental protection and sustainable development, product safety, food safety and security. Focusing on China, the book shows the current trends of Chinese law and policy towards international standards. The authors argue that China can play a leading role in this context: not only has China adopted several reforms and new regulations to address NTCs; but it has started to play a very relevant role in international negotiations on NTCs such as climate change, energy, and culture, among others. While China is still considered a developing country, in particular from the NTCs' point of view, it promises to be a key actor in international law in general and, more specifically, in international economic law in this respect. This volume assesses, taking into consideration its special context, China's behavior internally and externally to understand its role and influence in shaping NTCs in the context of international economic law.

**The Politics of Nuclear Energy in Western Europe** Wolfgang C. Müller, Paul W. Thurner, 2018-01-26 This volume investigates nuclear energy policies in Western Europe over the entire post-war period, but with special attention to the two most recent decades. The comparative analytical perspective draws on the interplay between voters' attitudes, challenging movements, party competition, and coalition formation. Spanning more than 60 years and 16 countries, the researchers examine the underlying causal processes leading to the observed varieties of Western European nuclear energy policies. Based on a mixed methods approach using both structured case studies as well as quantitative analyses, the study shows that the nature of party competition under given institutional contexts is a key-driver for, as a rule, tactically motivated governmental policy changes and stability, respectively. Part I introduces the practical and theoretical relevance of the topic. It outlines the reasoning of the major scientific contributions with regard to nuclear energy policies, and offers a theoretical alternative to the previous literatures that has been predominantly movements-oriented. Additionally, it provides core economic and political indicators of the changing role of nuclear energy in the countries. Part II consists of seven in-depth case studies where the outlined theoretical perspective is applied. Part III consists of a general summary, short narratives of the countries not covered in case studies, qualitative comparison and an assessment of the factors for policy change from multivariate analysis.

**Lonely Planet Sardinia** Gregor Clark, 2022-11 Lonely Planet's Sardinia is our most comprehensive guide that extensively covers all the region has to offer, with recommendations for both popular and lesser-known experiences. Explore Cagliari's Il Castello, find a secluded cove on the Costa Smeralda, and walk the shores of Golfo di Orosei; all with your trusted travel companion. Inside Lonely Planet's Sardinia Travel Guide: What's NEW in this edition? Up-to-date information - all businesses were rechecked before publication to ensure they are still open after 2020's COVID-19 outbreak NEW top experiences feature - a visually inspiring collection of Sardinia's best experiences and where to have them Planning tools for family travellers - where to go, how to save money, plus fun stuff just for kids NEW pull-out, passport-size 'Just Landed' card\*

with wi-fi, ATM and transport info - all you need for a smooth journey from airport to hotel Highlights and itineraries help you tailor your trip to your personal needs and interests Eating & drinking in Sardinia - we reveal the dishes and drinks you have to try Sardinia's beaches - whether you're looking for relaxation or activities, we break down the best beaches to visit and provide safety information Colour maps and images throughout Insider tips to save time and money and get around like a local, avoiding crowds and trouble spots Honest reviews for all budgets - eating, sleeping, sightseeing, going out, shopping, hidden gems that most guidebooks miss Cultural insights give you a richer, more rewarding travel experience - history, people, music, landscapes, wildlife, politics Over 34 maps Covers Cagliari & the Sarrabus, Iglesias & the Southwest, Oristano & the West, Alghero & the Northwest, Olbia, the Costa Smeralda & Gallura, Nuoro & the East The Perfect Choice: Lonely Planet's Sardinia, our most comprehensive guide to Sardinia, is perfect for both exploring top sights and taking roads less travelled. About Lonely Planet: Lonely Planet is a leading travel media company, providing both inspiring and trustworthy information for every kind of traveller since 1973. Over the past four decades, we've printed over 145 million guidebooks and phrasebooks for 120 languages, and grown a dedicated, passionate global community of travellers. You'll also find our content online, and in mobile apps, videos, 14 languages, armchair and lifestyle books, ebooks, and more, enabling you to explore every day. 'Lonely Planet guides are, quite simply, like no other.' □ New York Times 'Lonely Planet. It's on everyone's bookshelves; it's in every traveller's hands. It's on mobile phones. It's on the Internet. It's everywhere, and it's telling entire generations of people how to travel the world.' □ Fairfax Media (Australia)

**Agriculture and climate change** Food and Agriculture Organization of the United Nations,2019-04-15 This publication presents the achievements of the International Alliance on Climate-Smart Agriculture project, which include capacity development, training, information-sharing and several country studies. The project notably contributed to feasibility studies in Botswana, Ecuador and Ethiopia, as well as a case study on Italy that showcased conservation agriculture as a successful approach to overcoming soil fertility loss and erosion in 15 regions. The publication demonstrates how the project has laid the foundations for a strong knowledge community to support climate-smart agriculture (CSA) implementation across countries and regions, thereby contributing to international climate commitments and sustainable development in the field of agriculture and food security. The International Alliance on Climate-Smart Agriculture project was funded by the Ministry of Environment, Land and Sea of Italy (IMELS) and implemented by FAO, in order to advance knowledge-sharing, learning and partnership-building around the CSA approach and to create a Global Alliance for Climate-Smart Agriculture (GACSA).

*Laboratorio Expo* Salvatore Veca (a cura di),2015-10-22T00:00:00+02:00 This volume of *The Annali* is meant to collect among some the most significant outcomes of the research activities having characterised the “adventure of ideas” of *Laboratorio Expo* during the two-year period 2013-2015. The project ‘*Laboratorio Expo*’ has been conceived and structured

in 2012. Its research programs had been presented in June 2013 and all activities launched in September of that year, thanks to an agreement between the Giangiacomo Feltrinelli Foundation and the company Expo Milano 2015 SpA. In the first part of the volume, Scientific research for a sustainable development, the outcomes of the research have been described and discussed, divided into the different subject areas of the complex and articulated activity carried out within the project 'Laboratorio Expo'. The second part, Problems, ideas and proposals, is made up of a wide range of different contributions provided by distinguished researchers working in research and academic Institutions for the development of this project and the sharing of ideas. In the Appendix, we have included both an accurate report of the all activities carried out in the two-year period 2013-2015 and the Charter of Milan, the cultural legacy of Expo Milano 2015, that has been coordinated and drafted by Laboratorio Expo, under the supervision of the Italian Minister of Agriculture, Maurizio Martina and of the Italian government. Laboratorio Expo is based on a very simple idea: developing the research and the sharing of ideas within the international scientific community around the central theme of this 2015 Universal Exhibition held in Milan. Within the Laboratorio, the theme 'Feeding the Planet, Energy for Life' has been developed and articulated through four main subject areas. And with these four areas of investigation, all based on the assessment and analysis of the many faces of sustainability and its intrinsic plural dimensions, Laboratorio Expo worked as a public space where reflections, content experiences, practices, and perspectives could be shared, all scientifically based on the Expo's main theme.

**Footprint and Entrepreneurship** Aldo Alvarez-Risco, Subramanian Senthilkannan Muthu, Shyla Del-Aguila-Arcentales, 2023-01-29 This book highlights the relevant and timely global change movement: green entrepreneurship. Presented in this book is relevant literature and academic knowledge. The book is expected to support in creating more green entrepreneurship initiatives in collaboration with the UN Sustainable Development Goals.

Italy Taxation Laws and Regulations Handbook Volume 1 Corporate Taxation: Strategic Information and Regulations IBP, Inc., 2017-12 The posthumously published collection Hermit in Paris draws together an array of Italo Calvino's autobiographical writings that provide an illuminating and unexpectedly intimate portrait of one of the postwar era's most inventive and fascinating writers. In these pages, Calvino recounts his experiences in Italy's antifascist resistance, pays homage to his influences, traces the evolution of his literary style, and, in one of the book's most humorous and entertaining sections, provides a wry commentary on his travels in the United States in 1959 and 1960.

**Recommendation and Search in Social Networks** Özgür Ulusoy, Abdullah Uz Tansel, Erol Arkun, 2015-02-12 This edited volume offers a clear in-depth overview of research covering a variety of issues in social search and recommendation systems. Within the broader context of social network analysis it focuses on important and up-coming topics such as real-time event data collection, frequent-sharing pattern mining, improvement of computer-mediated communication, social tagging information, search system personalization, new detection mechanisms for the identification of online user groups, and many

more. The twelve contributed chapters are extended versions of conference papers as well as completely new invited chapters in the field of social search and recommendation systems. This first-of-its kind survey of current methods will be of interest to researchers from both academia and industry working in the field of social networks.

*Italy Mining Laws and Regulations Handbook Volume 1 Strategic Information and Regulations* IBP, Inc., 2016-05-06 Sure, everyone gets sick sometimes, but do you realize that plenty of those folks also die slow, unpleasant deaths from diseases that stumped even the experts at top-notch (still privately run) hospitals? That's right: There are plenty of illnesses that even physicians have never heard about. Nodding Disease, Alice in Wonderland Syndrome, and Cutaneous Horn (yes, you grow a horn) are all featured here in pithy, energetic entries. You won't have to worry about socialized medicine if you have this book—even if your doc could see you within a month, you might die due to his ignorance. Lucky for you and your loved ones, Ian Landau (who has no medical training but is a hell of a researcher) includes: Descriptions of each disease Background and history How to diagnose yourself and others Suggested treatments Prevention methods The book is not for the faint of heart, as it probably could cause cardiac arrest. (And you ain't coming back from that without Ian's help.)

*IL COGLIONAVIRUS SECONDA PARTE LE VITTIME* ANTONIO GIANGRANDE, Rappresentare con verità storica, anche scomoda ai potenti di turno, la realtà contemporanea, rapportandola al passato e proiettandola al futuro. Per non reiterare vecchi errori. Perché la massa dimentica o non conosce. Denuncio i difetti e caldeggio i pregi italiani. Perché non abbiamo orgoglio e dignità per migliorarci e perché non sappiamo apprezzare, tutelare e promuovere quello che abbiamo ereditato dai nostri avi. Insomma, siamo bravi a farci del male e qualcuno deve pur essere diverso!

*Ecoreati. I nuovi delitti contro l'ambiente* Claudio Bovino, Roberto Codebò, Alessio Scarcella, 2015-09-10 L'entrata in vigore, il 29 maggio 2015, della legge 22 maggio 2015, n. 68 ha una portata storica per la tutela dell'ambiente in Italia. La legge infatti introduce nel Codice Penale un nuovo Titolo, il Titolo VI-bis, con nuovi cinque delitti ambientali: Inquinamento ambientale Disastro ambientale Delitti colposi contro l'ambiente Traffico di materiali ad alta radioattività, Impedimenti al controllo da parte di chi non vuole accertamenti. Sono altresì previste la confisca obbligatoria del profitto del reato (scatta sempre in caso di condanna o patteggiamento) e fattispecie aggravanti per associazione a delinquere di stampo mafioso, la condanna al ripristino e tempi di prescrizione raddoppiati ma anche la possibilità del ravvedimento operoso (con relativi sconti di pena). Pur tra luci e ombre, non mancando i punti controversi e, come evidenziato dallo stesso Ministro dell'Ambiente Galletti, la necessità di potenziare l'attività di controllo, si tratta di un provvedimento fondamentale. Nel presente ebook tre storici autori Wolters Kluwer, Claudio Bovino e Roberto Codebò, avvocati, e Alessio Scarcella, Consigliere della Corte di Cassazione, presentano ad una ad una le nuove figure delittuose esaminando in dettaglio le complesse interazioni tra le norme, le circostanze aggravanti, il funzionamento del ravvedimento operoso e le novità su raddoppio dei termini di prescrizione e causa di estinzione delle contravvenzioni. Completano l'ebook il Testo del provvedimento e le Linee

guida del Massimario della Corte di Cassazione sull'applicazione e i primi dubbi relativi alla Legge n. 68/2015. STRUTTURA

*I Governi italiani dal 25 aprile 1943* Santo La Rosa, 2017-06-21 L'aspirazione precipua di questo studio, era quella di fare un po' di luce sulle ragioni dell'origine infausta del nostro colossale debito pubblico e i motivi del suo continuo aumento. Lo studio parte dal 25 aprile 1943, giorno della caduta del governo Mussolini analizzando tutti i governi che si sono succeduti da questa data fino ai giorni nostri.

*Crede disobbedire combattere* Marco Cappato, 2017-10-12 Non cambi il mondo, e non difendi la democrazia, facendo sempre quello che ti dicono di fare. Occorre assumersi la responsabilità di contravvenire a leggi ingiuste senza aspettare che qualcuno gentilmente lo conceda. L'obiettivo non è violare le regole, ma cambiarle, la cosa giusta da fare quando la legge si scontra con il vissuto delle persone, trascurando disegualanze rese ancora più profonde dalle proibizioni. È questo che ha fatto Marco Cappato accompagnando in Svizzera dj Fabo, aiutandolo a porre fine alla sua sofferenza a costo di essere perseguito penalmente nel nostro Paese. Ed è questo - ha dichiarato - che farà ancora, per difendere il diritto di tutti di essere liberi di sorridere, fino alla fine. Eutanasia e fine vita, dunque, ma anche droghe, sesso, internet, genetica, scienza e diritti umani: contro le molte norme che in diversi campi minacciano la libertà e criminalizzano comportamenti diffusi e realtà sociali ineliminabili, Cappato si batte da anni con gli strumenti della disobbedienza civile e della nonviolenza - che indica non una semplice assenza di violenza, ma la costante opera attiva per convertire la violenza nel suo opposto - seguendo le orme di illustri personalità come Gandhi e di compagni di viaggio come Pannella. Intrecciando pratica e teoria, la sua storia radicale e le sue azioni - dall'arresto a Manchester per la campagna antiproibizionista alla difesa della ricerca sul genoma e le staminali, alla battaglia contro l'informazione manipolata e la limitazione della libertà digitale -, spiega oggi in questo libro perché disobbedire (civilmente) è lo strumento indispensabile per chi vuole migliorare il sistema e difendere la libertà di tutti, cominciando dai settori, la scienza in primis, dove la presenza dello Stato spesso non è soltanto inutile, ma controproducente. E perché occorre farlo in prima persona: assumendoci la responsabilità delle nostre azioni, sperimentando alternative, creando conoscenza.

*Patrimoni da svelare per le Arti del futuro* AA. VV., 2016-12-04T00:00:00+01:00 Gli atti del Convegno Patrimoni da svelare per le arti del futuro - tenuto all'Accademia di Belle Arti di Napoli dal 13 al 15 giugno 2013 e promosso dal Miur,

sotto l'Alto Patronato del Presidente della Repubblica - si collegano al volume Accademie/Patrimoni di Belle Arti, a cura di Giovanna Cassese, edito da Gangemi nello stesso anno, la prima ricognizione unitaria sui patrimoni materiali e immateriali delle istituzioni di Alta Formazione Artistica. Le Accademie sono da sempre luogo eminente di dibattito sulle arti e ganglio fondamentale nel sistema dell'arte, in cui memoria, identità e futuro si intersecano per formare artisti, designer, scenografi, restauratori ed esperti di didattica dell'arte. Alla mission di formazione universitaria, di didattica, ricerca e produzione, fondata sul laboratorio in cui conoscenza, competenza e capacità esaltano l'eccellenza dei saperi della mano, tra tradizione e innovazione, si unisce quella di essere insieme patrimonio della nazione, perché le Accademie sono cariche di storia e di know-how, di beni materiali e immateriali. Le tre giornate di studio riportano l'attenzione sulle Accademie e i loro preziosi patrimoni, nati nei secoli per la formazione degli artisti: quadrerie, gipsoteche, biblioteche, archivi storici, gabinetti di stampe e disegni, raccolte di sculture, lastre incise, antiche foto o raccolte di arte contemporanea, arredi e preziosi strumenti di interesse storico; un patrimonio da svelare, tutelare, salvaguardare e valorizzare, irrinunciabile testimonianza di civiltà, nonché patrimonio ineludibile per una moderna didattica delle arti, che apre anche nuovi orizzonti di ricerca e intervento nelle politiche di salvaguardia dei beni culturali del nostro Paese. Il convegno nasce dal lavoro del Tavolo tecnico permanente del MIUR sui Patrimoni nel quale sono coinvolte le Accademie italiane, 20 statali e 5 storiche legalmente riconosciute, ed ha affrontato questioni metodologiche, temi connessi alla salvaguardia, valorizzazione e restauro, il legame tra patrimonio, didattica dell'arte e nuove tecnologie, con il coinvolgimento di rappresentanti MiBACT, MAE, UNESCO, ICOM, CNR e di molte altre Istituzioni, oltre che di studiosi, storici dell'arte, docenti e restauratori. L'ultima parola è stata poi dei veri protagonisti, gli artisti, che si sono interrogati sul "futuro del classico", ovvero sull'importanza delle testimonianze del passato per la creatività avvenire e per il futuro della formazione artistica. Interventi di: Marisa Albanese, Maria Grazia Bellisario, Gabriella Bocconi, Giorgio Bonsanti, Gregorio Botta, Eugenio Carlomagno, Roberto Cassanelli, Giovanna Cassese, Angela Cipriani, Giorgio Bruno Civello, Biancaneve Codacci Pisanelli, Silvia Costa, Guido Curto, Marisa Dalai Emiliani, Fernando dalla Chiesa, Gaetano Daniele, Armando De Stefano, Stefano De Stefano, Paola Del Vescovo, Ignazio Di Bella, Marco Di Capua, Fabio Donato, Andrea Emiliani, Luigi Ficacci, Luigi Fiorentino, Luciano Formica, Mario Franco, Eleonora Frattarolo, Cristina Frulli, Giuseppe Furlanis, Maria Antonella Fusco, Gian Luca Galletti, Omar Galliani, Mauro Giancaspro, Corinna Giudici, Augusto Giuffredi, Sebastiano Guerrera, Daniele Jalla, Anna Vittoria Laghi, Rocco Lazzaro, Marco Mancini, Riccardo Mazzarino, Gioia Mori, Luigi Nicolais, Marco Nocca, Anty Pansera, Virgilio Piccari, Luca Pignatelli, Paolo Rosa, Valter Rosa, Camilla Roversi Monaco, Anna Russo, Sileno Salvagnini, Lucio Alberto Savoia, Sergio Sciarelli, Vittorio Sgarbi, Aurora Spinosa, Gabriella Spizzuoco, Maria Luisa Storchi, Giuseppe Sylos Labini, Paola Taddei, Gloria Vallese, Francesca Valli, Fabrizio Vona, Luigi Zangheri, Francesco Ziosi.

Il cielo oltre le polveri Valentina Petrini, 2022-02-10T00:00:00+01:00 È l'unica prospettiva di lavoro e quindi di vita. È un

mostro sorpassato dai tempi. È una grande impresa italiana. È uno scandalo nazionale. È l'Ilva: fin dalla fondazione un'azienda considerata strategica per il nostro Paese, un'industria siderurgica con alle spalle quasi settant'anni di storia. Ma che ha visto tragedie come quella di Francesco Zaccaria, finito in mare con la cabina della sua gru durante una tempesta; e quella di Alessandro Morricella, consumato vivo da una colata incandescente; e molte altre. Periodicamente, singoli eventi emergono nella cronaca: contaminazione ambientale, malattie, vittime sul lavoro. Ma dietro le notizie e le vicissitudini giudiziarie si staglia, più vasta e apparentemente senza fine, la maledizione di un'intera città, Taranto bella, avvelenata e impaurita, Taranto che si chiude in casa nei «Wind Days». A ciascuno il suo dramma, per ciascuno la stessa domanda: come cambiare il corso di questa storia? Valentina Petrini è cresciuta proprio a Taranto, in un quartiere operaio a ridosso dell'Ilva dove le polveri si posano sui balconi delle case e sui giochi dei bambini. Si è trasferita a Roma per costruire una carriera. Torna sui luoghi della sua infanzia per fare i conti con il grande racconto nero dell'Ilva. Lo compone in queste pagine con sensibilità e con forza, parlando con i testimoni e i parenti delle vittime, interpellando professionisti e istituzioni, seguendo i dibattimenti in aula, interrogando il suo stesso passato. E scrive un libro necessario, intenso e vivo, dopo il quale non sarà più possibile dire «non sapevo».

*Io scelgo il mio successo* Anna Paola Sabatini, 2014-07-10 Questo volume tratta di un tema centrale nel panorama educativo quale quello dell'orientamento scolastico. Si vuole proporre un'opportunità di riflessione attraverso la rivisitazione di un'attività che ha visto depotenziarsi i principali effetti positivi di cui sarebbe in realtà portatrice. L'orientamento, per essere positivamente funzionale al successo formativo necessita di un'impostazione rinnovata funzionale al conseguimento da parte dei ragazzi di competenze di autorientamento e legata ad un approccio permanente, precoce, interistituzionale e fortemente collegato con il mondo del lavoro.

**Appennino bike-tour** Sebastiano Venneri, 2022-06-21 Un itinerario cicloturistico in 43 tappe a cavallo dell'Appennino, dalla Liguria alla Sicilia. - Prefazione di Francesco Guccini - Disegnato sfruttando vie secondarie e strade bianche, il percorsosi snoda attraverso meravigliosi borghi al di fuori dei circuiti turistici più frequentati e invita il cicloturista a immergersi nella natura e nel paesaggio. Esempio concreto di transizione ecologica realizzata, il progetto del percorso ha coinvolto Legambiente e sponsor che hanno dotato le tappe di punti attrezzati al servizio dei ciclisti. Fra itinerari affascinanti e poco conosciuti, tanti tratti non eccessivamente impegnativi e accessibili a tutti.
