Balkan and South Slavic Enclaves in Italy Thede Kahl,Iliana Krapova,Giuseppina Turano,2018-07-26 This volume is a collection of new writings dealing with some of the Balkan linguistic varieties spoken in north-eastern, central and southern Italy. It brings together twenty-two papers, some of which investigate the mutual influences between each of these Balkan and South Slavic language varieties and their neighbouring Italian dialects. Other contributions study common tendencies which do not just pertain to local contacts, but which are of greater significance for the history of linguistic and cultural contacts in Italy. All of the chapters here present new empirical findings and reflect the breadth and diversity of current research in the fields of areal linguistics, language variation, Balkan dialectology, language contact, types of Balkan convergences, types of structure transfers, the borrowing of structural patterns, and directions of grammaticalisation.

Molecular Mechanisms of Synaptogenesis Alexander Dityatev,Alaa El-Husseini,2006-11-24 This book provides a new compilation of information that link changes in the basic structure of synapses and brain diseases. The book shows that specific secreted proteins, and short peptide mimicking the function of neural cell adhesion molecules can significantly enhance the formation of synapses in the brain. It describes recent advances in research that lay necessary scientific groundwork to develop pharmacological treatments.

Diversity in Contact Nataliya Levkovych,2023-11-20 The contributions in the edited volume deal with different aspects of language contact which were hitherto not or not sufficiently considered in linguistic research. The impact of the colonial

languages Polish and German on the structures of the written varieties of Latvian is surveyed and compared. The opposite case – the impact of indigenous languages of Nigeria and Ghana on the colonial language English – is scrutinized from the perspective of the nexus of language and culture. Language contact in a diasporic context is examined in the case study on Jordanian Chechen. The effects of language contact on the lexicon and grammar of Basque are analyzed. In the in-depth study on Maltese adpositions, the influence of the contact language Italian is a central theme. The morphosyntax of place names is analyzed for the contact languages which typically arise in colonial contexts – Pidgins and Creoles. In the typological study dealing with areal phonology, languages of Europe are investigated revealing that the role of language contact is crucial for the distribution of phonological phenomena. The novel nature and new strands of research in the contributions call for further investigations and form a new component in language-contact theory.

Slavic on the Language Map of Europe Andrii Danylenko, Motoki Nomachi, 2019-10-08 Conceptually, the volume focuses on the relationship of the three key notions that essentially triggered the inception and subsequent realization of this project, to wit, language contact, grammaticalization, and areal grouping. Fully concentrated on the areal-typological and historical dimensions of Slavic, the volume offers new insights into a number of theoretical issues, including language contact, grammaticalization, mechanisms of borrowing, the relationship between areal, genetic, and typological sampling, conservative features versus innovation, and socio-linguistic aspects of linguistic alliances conceived of both synchronically and diachronically. The volume integrates new approaches towards the areal-typological profiling of Slavic as a member of several linguistic areas within Europe, including SAE, the Balkan Sprachbund and Central European groupings(s) like the Danubian or Carpathian areas, as well as the Carpathian-Balkan linguistic macroarea. Some of the chapters focus on structural affinities between Slavic and other European languages that arose as a result of either grammatical replication or borrowing. A special emphasis is placed on contact-induced grammaticalization in Slavic micro-languages

Plagues, Poisons, and Potions William G. Naphy, 2002 With the 16th and 17th Century outbreaks of the Plague, came the arrests and executions of many hospital workers who were accused of conspiring to spread the disease. *Plagues, Poisons and Potions* contains a detailed study of this fascinating phenomenon associated with the Plague. It examines the courts and the part played by torture, as well as considering the socio-economic conditions of the workers, highlighting an early modern form of 'class warfare'.

Synaptic Plasticity Michael R. Kreutz, Carlo Sala, 2012-02-17 This book introduces the current concepts of molecular mechanisms in synaptic plasticity and provides a comprehensive overview of cutting-edge research technology used to investigate the molecular dynamics of the synapses. It explores current concepts on activity-dependent remodeling of the synaptic cytoskeleton and presents the latest ideas on the different forms of plasticity in synapses and dendrites. Synaptic Plasticity in Health and Disease not only supplies readers with extensive knowledge on the latest developments in research, but also with important information on clinical and applied aspects. Changes in spine synapses in different brain disease states, so-called synaptopathies, are explained and described by experts in the field. By outlining basic research findings as well as physiological and pathophysiological impacts on synaptic plasticity, the book represents an essential state-of-the-art work for scientists in the fields of biochemistry, molecular biology and the neurosciences, as well as for doctors in neurology and psychiatry alike.

Diachronic Slavonic Syntax Björn Hansen, Jasmina Grković-Major, Barbara Sonnenhauser, 2018-03-05 The book is dedicated to the study of the causes and mechanisms of syntactic change in Slavonic languages, including internally motivated syntactic change, syntactic change under contact conditions (structural convergence, pattern replication, shift-induced transfer etc.): It also explores metalinguistic factors such as ideologically driven selection and propagation of syntactic structures.

Die Präsenz der romanischen Literaturen in der 1655 nach Wien verkauften Fuggerbibliothek Alfred Noe, 1997 Die Rezeption von Originaltexten der romanischen Literaturen, insbesondere der Lyrik, hat bisher in der hauptsächlich mit Übersetzungen beschäftigten Sekundärliteratur relativ wenig Beachtung gefunden. Die Aufnahme dieser Texte über Vertonungen soll in dem hier rekonstruierten Bestand an profaner Vokalmusik in romanischen Sprachen und den möglicherweise daraus abgeleiteten deutschen Versionen dokumentiert werden. Von den über 15.000 registrierten Liedanfängen werden über 3.700 ihren Autoren zugewiesen und in einem speziellen Index zugänglich gemacht, wobei über 1.000 präzise Nachweise erstmals hier dem bisherigen Stand der Forschung hinzugefügt werden. Die Untersuchung von Umfang und Tiefe der Rezeption von italienischer Literatur im deutschen Sprachraum kann sich fortan mit den hier verzeichneten über 14.000 Liedanfängen auf die konkrete Basis einer im Detail rekonstruierten Sammlung stützen.

Military Culture and Popular Patriotism in Late Imperial Austria Laurence Cole, 2014-07-03 *Military Culture and Popular Patriotism in Late Imperial Austria* examines the interplay between popular patriotism and military culture in late imperial Austria. Laurence Cole suggests that two main questions should be asked regarding the western half of the

Habsburg Monarchy during the period from the mid-nineteenth century to the outbreak of war in 1914. Firstly, how far did imperial Austrian society experience a process of militarization comparable to that of other European countries? Secondly, how far did the military sphere foster popular patriotism in the multinational state? Various manifestations of military culture, including hero cults and, above all, military veterans associations, provide the main subject for analysis in this volume. After exploring the historical development of military culture in the Habsburg Monarchy, Cole explains how the long reign of Emperor Franz Joseph I constituted a decisive phase in the militarization of Austrian society, with the dynasty and state emphasizing the military's role as the locus of loyalty. Popular manifestations of military culture, such as the hero cult surrounding Field Marshal Radetzky and military veterans associations, complemented the official agenda in many respects. However, veterans associations in particular constituted a political mobilization of the lower middle and lower classes, who asserted their own interests and position in civil society, as is shown by case studies of regions of the Austrian state with significant Italian-speaking populations (Trentino and the Littoral). State attempts to assert greater control of veterans activities led to national and political opposition at a time when tensions over 'militarism' and foreign policy increased. Military Culture and Popular Patriotism in Late Imperial Austria thus raises the question of whether the military was really a bulwark of the multinational state or rather a polarizing force in imperial Austrian society.
