Sweet Greens Markus Schein, Ole Werner, Gregor Zimmermann, 2004 Entwürfe per Knopfdruck? Der Sweet Greens Generator macht's möglich! Das vorliegende Buch stellt ein Computerprogramm vor, in dem der Nutzer einzelne Entwurfparameter festlegt und dem Computer damit den Konstruktionsrahmen vorgibt, innerhalb dessen dieser operiert. Ergebnis sind immer neue Varianten einer Grashügellandschaft, mit immer neuen Varianten einer partiellen Überdachung. Der Arbeitsbericht des Kooperationsprojekts von Produktdesignern und Architekten der Universitäten Kassel und Eindhoven dokumentiert neben dem experimentellen Entwurfsprozess die prototypische Umsetzung eines vom Computer errechneten Entwurfs. Anschauliche Abbildungen unterstützen den verständlich erläuterten theoretischen und praktischen Hintergrund. Das Buch richtet sich sowohl an ein Fachpublikum aus diversen Gestaltungsdisziplinen und der Informatik, als auch an interessierte Laien.

The German Greens Margit Mayer, John Ely, 1998 The Greens have been not only a political force and social conscience for Germany before reunification and after but also an inspiration to political groups and movements in many other countries. The Greens have raised the issues of ecology, gender, and grassroots democracy in protest against government. They have also had the rare opportunity to try converting themselves into a political party that works within the system. This is a book about their paradoxical situation and about the dilemmas all advocates of change face when they become powerful enough to negotiate with the status quo. The critical essays by German social scientists and activists also provide a detailed picture of the dynamics of the German Greens—where their support has come from, The nature of the competing factions, And The place of feminism. The editors provide a substantial introduction. The flavor and texture of the Greens—including their raucous public arguments and their innovative campaign tactics—are suggested by the political posters included in the book and by a whole section of primary documents. The documents And The essays (except for one originally written in English) have been translated from German. The result is to make available to English-speaking readers a view of a complex movement whose very name and color have become synonymous with social action in favor of the environment And The empowerment of people. Author note: Margit Mayer is Professor of Politics at the Free University of Berlin. She has also

taught at the New School for Social Research And The University of California, Santa Cruz. John Ely is a long-time commentator on social movements in Germany.

The Greens in British Politics James Dennison, 2016-11-18 This book explains how the Greens went from obscurity to England's third largest party in just one year, quadrupling their vote share and securing their place in Britain's refigured party system on the way. Sophisticated quantitative analyses of the Greens' voters and members as well as interviews with all of the leading party insiders are used to explain how internal dynamics, changing political opportunities and a forgotten portion of the electorate resulted in an unprecedented 'Green Surge' that defied decades of British party membership decline and a lack of historic far left electoral success in the UK. Not only does James Dennison untangle a fascinating political case study but he also shines a light on how technological, attitudinal and demographic changes are reshaping politics and forcing us to question many of our previous assumptions about political parties and how voters choose.

The Left Libertarianism of the Greens Kire Sharlamanov, 2023-09-04 This book offers a systematic and multifaceted

analysis of the Greens on the levels of political philosophy, political concepts, social movement, political parties, and political ideology. The originality of the book lies in the determination of the political philosophy of the Greens as left libertarianism. Such a determination of the Greens can already be found in the writings of Herbert Kitschelt, but while he only makes a cursory mention of it, this book offers a detailed elaboration of the points of contact between left-libertarianism and the Greens. The book also attempts to explain the acceptance of left-libertarianism by the Greens with social processes in Western Europe, the emergence of a new middle class and post-materialist values. At the same time, the book examines the relationship between the left-libertarian political philosophy of the Greens and the organizational structure of the Green parties, their relationship to the state, and to democracy.

What Do Greens Believe? Joe Smith, 2013-08-29 'The world has enough for everybody's need, but not enough for one person's greed' Gandhi Greens are driven by a concern with the fate of future generations and the natural world on which we all depend. They argue that theirs is the only way of ensuring the survival of a sustainable planet. The case they make is powerful, emotive, urgent and politically controversial. In the space of a couple of decades, Greens have shaped an influential movement. Issues such as climate change and biodiversity loss are now familiar and widely accepted. The challenge for Greens today is to turn mainstream rhetoric into meaningful action. In this readable and wide-ranging introduction, Joe

Smith summarizes the historical roots of the Green movement and some of the main intellectual building blocks of Green thinking. He goes on to consider whether they have the appetite and potential to 'change the world'.

The Fading of the Greens Anna Bramwell, 1994-01-01 In this sequel to her successful *Ecology in the 20th Century*, Anna Bramwell provides a witty and controversial analysis of the failure to create a new politics. Neither a Green text nor a political history, it focuses on the development of Green parties and ideology since 1945, and on the cultural context in which they developed in England, Germany and the USA. An environmental expert and policy-maker, Bramwell examines the shift from lonely conservative ecologists, fighting a losing battle against the emphasis on growth and reconstruction, to the emergence of 'deep' ecologism and a revulsion against the increasing industrialisation of the West. She explores the paradox of a movement hostile to orthodox science yet inextricably bound to science for its justification, its rationale and its values.
