The Fairy-Tale Vanguard Stijn Praet,2019-07-08 Ever since its early modern inception as a literary genre unto its own, the fairy tale has frequently provided authors with a textual space in which to reflect on the nature, status and function of their own writing and that of literature in general. At the same time, it has served as an ideal laboratory for exploring and experimenting with the boundaries of literary convention and propriety. While scholarship pertaining to these phenomena has focused primarily on the fairy-tale adaptations and deconstructions of postmodern(ist) writers, this essay collection adopts a more diachronic approach. It offers fairy-tale scholars and students a series of theoretical and literary-historical expositions, as well as case studies on English, French, German, Swedish, Danish, and Romanian texts from the seventeenth to the twenty-first century, by authors as diverse as Marie-Catherine d'Aulnoy, Rikki Ducornet, Hans Christian Andersen and Robert Coover.

Nun halten die beiden sich gegenseitig für des Mordes schuldig und sind entschlossen, noch in dieser Nacht die Wahrheit herauszufinden. Was ist wirklich auf dem Berg passiert? Im geistigen Wettstreit zwischen den beiden scheint die Kette der Ereignisse nach und nach enthüllt zu werden. Doch wird sie das wirklich? Und werden beide die Wohnung am nächsten Tag lebend verlassen?

Rural Poverty and IRDP Sudip Chakraborty,1999 In recent years there has been considerable debate in India on the efficacy of IRDP in mitigating rural poverty. The government agencies like Planning Commission, Reserve Bank of India,

National Bank for Agricultural and Rural Development have been conducting several evaluative research studies, all over India, since the inception of the programme from the Sixth Five Year Plan. Those studies have presented a rosy picture of the success of IRDP. The line of judgement adopted by these studies were mere calculation of the proportion of households which have crossed poverty line by comparing pre-IRDP and post-IRDP income figures. This methodology, however, fails to make an adjustment for inflation, changes in family size, internal payment of loan, access to common property resources, availability of potable water, health and educational facilities which significantly influence the living condition of the poor. The studies made by different research organizations, individuals, institutions differ on different points. But the common considerations underlying all these studies is the failure to a large extent of this massive anti-poverty programme. The present study is a clear deviation from the earlier studies on two points. Firstly, a new methodology of Typological approach is adopted to assess the impact. Secondly, there is an attempt to restructure the present IRDP by way of an inter-industry model of the Leontief type. The findings will prove an essential reading not only to the academics but also to the planners, policy makers and government agencies.
