La valutazione della ricerca scientifica: indicatori, qualità e impatto Giovanna Loggia, 2013-06-12 «La realizzazione di un sistema di valutazione della qualità della ricerca è un passo ineludibile per qualsiasi Paese che voglia continuare ad investire in conoscenza ed in innovazione e che intenda essere realmente competitivo sul piano globale. Nella costruzione di questo sistema non può mancare la “valutazione della valutazione”, entrando nel merito delle procedure adottate dagli Organismi preposti alla funzione e degli aspetti metodologici che le hanno caratterizzate. Anche in questo ambito, ugualmente fondamentale per la realizzazione di un valido sistema di valutazione della ricerca pubblica, saranno necessari testi, studi, articoli, saggi che come questo prodotto da Giovanna Loggia dovranno essere semplici, diretti, idonei ad essere strumenti agili di approfondimento di problematiche estremamente importanti per il futuro stesso della ricerca nel nostro Paese» dalla “Introduzione” di Guglielmo Trupiano

Prosperetti,2020-10-02 Die Beiträge von 62 Autoren aus zehn Ländern vermitteln ein Spiegelbild der zentralen und aktuellen Themen des Arbeits- und Sozialrechts, die die Gesetzgebung und sozialpolitische Diskussion in den einzelnen Ländern, auf europäischer Ebene und in UN-Organisationen prägen. Weitere wichtige Beiträge sind dem Haftungsrecht gewidmet. Damit wird dem Themenspektrum Rechnung getragen, das Fuchs in seiner wissenschaftlichen, beratenden und forensischen Tätigkeit behandelt hat. Die Autoren legen großen Wert auf die dogmatische Analyse der Rechtsmaterien, häufig verbunden mit einer rechtsvergleichenden Perspektive Die Einbeziehung ökonomischer und sozialpolitischer Fragestellungen verleiht dem Werk darüber hinaus einen interdisziplinären Charakter.

Methodik und Richtlinien für die Konstruktion von laseradditiv gefertigten Leichtbaustrukturen Jannis Kranz,2017-07-07 Die laseradditive Fertigung bietet durch ihre hohe geometrische Gestaltungsfreiheit insbesondere für Leichtbauanwendungen in der Luftfahrt großes Potential. Vor diesem Hintergrund erfolgt im Rahmen der Arbeit die Entwicklung von Konstruktionsrichtlinien für die verfahrensgerechte Bauteilkonstruktion und ihre Übertragung auf eine Methodik für die Konstruktion mittels laseradditiver Fertigung hergestellter Leichtbaustrukturen. Das Vorgehen wird anhand von zwei Bauteilen aus der Luftfahrtindustrie erarbeitet und demonstriert.

Nähesprachliches Italienisch im Ruhrgebiet und in Catania Judith Kittler,2015-08-31 Im Fokus dieser Untersuchung steht das nähesprachliche Italienisch von im Ruhrgebiet ansässigen Italienern, die aus Catania stammen. Es werden Unterschiede

der Sprechweisen in Lautung und Prosodie herausgefiltert und damit messbar gemacht. Die Besonderheiten der phonetischen wie prosodischen Variation werden darüber hinaus mit denjenigen einer Sprechergruppe aus der Herkunftsprovinz Catania verglichen, um dialektale, innovative sowie kontaktbedingte Merkmale des Italienischen in der Migration beschreiben zu können. Auf der Webseite des Verlages werden zusätzlich Transkriptionen und Sprechproben aus dem RuhrCat-Korpus zur Verfügung gestellt (siehe Links im Tab Überblick bzw. Overview).

The Soils of Italy Edoardo A.C. Costantini, Carmelo Dazzi, 2013-03-29 The Soils of Italy is the first comprehensive book on Italian pedology in seventy years. Taking advantage of the authors' large experience and of the most up-to-date information and technology, this book treats the main soil types of Italy, their diffusion, their functions, ecological use, and the threats to which they are subjected during centuries of intensive management. It also deals with future scenarios of the relationships between soil science and other disciplines, such as urban development, medicine, economics, sociology, and archaeology. The description of the soils is accompanied by a complete set of data, pictures and maps, including benchmark profiles. Factors of soil formation are also treated, making use of new, unpublished data and elaborations. The book also includes a history of pedological research in Italy, spanning over a century.

Tunnels and Underground Cities. Engineering and Innovation Meet Archaeology, Architecture and Art Daniele Peila, Giulia Viggiani, Tarcisio Celestino, 2019-04-17 Tunnels and Underground Cities: Engineering and Innovation meet Archaeology, Architecture and Art contains the contributions presented at the World Tunnel Congress 2019 (Naples, Italy, 3-9 May 2019). The use of underground space is continuing to grow, due to global urbanization, public demand for efficient transportation, and energy saving, production and distribution. The growing need for space at ground level, along with its continuous value increase and the challenges of energy saving and achieving sustainable development objectives, demand greater and better use of the underground space to ensure that it supports sustainable, resilient and more liveable cities. This vision was the source of inspiration for the design of the logos of both the International (ITA) and Italian (SIG)

Tunnelling Association. By placing key infrastructures underground - the black circle in the logos - it will be possible to preserve and enhance the quality of the space at ground level - the green line. In order to consider and value underground space usage together with human and social needs, engineers, architects, and artists will have to learn to collaborate and develop an interdisciplinary design approach that addresses functionality, safety, aesthetics and quality of life, and adaptability to future and varied functions. The 700 contributions cover a wide range of topics, from more traditional subjects connected to technical challenges of design and construction of underground works, with emphasis on innovation in tunneling engineering, to less conventional and archetypically Italian themes such as archaeology, architecture, and art. The book has the following main themes: Archaeology, Architecture and Art in underground construction; Environment sustainability in underground construction; Geological and geotechnical knowledge and requirements for project implementation; Ground improvement in underground constructions; Innovation in underground engineering, materials and equipment; Long and deep tunnels; Public communication and awareness; Risk management, contracts and financial aspects; Safety in underground construction; Strategic use of underground space for resilient cities; Urban tunnels. Tunnels and Underground Cities: Engineering and Innovation meet Archaeology, Architecture and Art is a valuable reference text for tunneling specialists, owners, engineers, architects and others involved in underground planning, design and building around the world, and for academics who are interested in underground constructions and geotechnics.

Strategic Environmental Assessment: Integrating Landscape and Urban Planning Fabio Cutaia, 2016-07-20 This book explores the opportunities offered by Strategic Environmental Assessment in the context of guaranteeing the synchronized integration of landscape (in all its aspects) within urban plans, thereby helping to overcome the constraints of rigidly framed, sector-focused laws and a purely aesthetic concept of landscape. In pursuit of this goal, various scholars have previously attempted to construct arrays of indicators relating to the different conceptions of "landscape". This book critically examines the most complete proposals of this nature, systematizing and comparing them and, finally, offering some guidelines with respect to their codification within specific application protocols. After opening chapters exploring the origins of the problem and analysing the European normative frame for Strategic Environmental Assessment, two case studies are described and discussed. A model is then presented for the evaluation of the effects of urban plans on landscape, including in cultural and perceptual terms. The author demonstrates that, when suitably employed, Strategic Environmental Assessment can indeed facilitate the integration of environmental, economic, and social sustainability into urban planning.
