Crony Capitalism in the Middle East Ishac Diwan,Adeel Malik,Izak Atiyas,2019-05-23 The popular uprisings in 2011 that overthrew Arab dictators were also a rebuke to crony capitalism, diverted against both rulers and their allied businessmen who monopolize all economic opportunities. While the Middle East has witnessed a growing nexus between business and politics in the wake of liberalization, little is discussed about the nature of business cronies, the sectors in which they operate, the mechanisms used to favour them, and the possible impact of such crony relations on the region's development. Combining inputs from leading scholars in the field, *Crony Capitalism in the Middle East: Business and Politics from Liberalization to the Arab Spring* presents a wealth of empirical evidence on the form and function of this aspect of the region. Crony Capitalism in the Middle East is unique in both its empirical focus and comparative scale. Analysis in individual chapters is empirically grounded and based on fine-grained data on the business activities of politically connected actors furnishing, for the first time, information on the presence, numerical strength, and activities of politically connected entrepreneurs. It also substantially enhances our understanding of the mechanisms used to privilege connected businesses, and their possible impact on undermining the growth of firms in the region. It offers a major advance on our prior knowledge of Middle Eastern political economy, and constitutes a distinct contribution to the global literature on crony capitalism and the politics of development. The book will be an essential resource for students, researchers, and policymakers alike.

The Making of a Transnational Capitalist Class William K. Carroll,2013-04-04 Throughout the world, there has been a growing wave of interest in global corporate power and the rise of a transnational capitalist class, triggered by economic and political transformations that have blurred national borders and disembedded corporate business from national domiciles. Using social network analysis, William Carroll maps the changing field of power generated by elite relations among the world's largest corporations and related political organizations. Carroll provides an in-depth analysis that spans

the three decades of the late 20th and early 21st century, when capitalist globalization attained unprecedented momentum, propelled both by the transnationalization of accumulation and by the political paradigm of transnational neoliberalism. This has been an era in which national governments have deregulated capital, international institutions such as the World Trade Organization and the World Economic Forum have gained prominence, and production and finance have become more fully transnational, increasing the structural power of capital over communities and workers. Within this context of transformation, the book charts the making of a transnational capitalist class, reaching beyond national forms of capitalist class organization into a global field, but facing spirited opposition from below in an ongoing struggle that is also a struggle over alternative global futures.

Decline of the Corporate Community Eelke M. Heemskerk, 2007 Traditionally, much of big business in the industrialized Western world has been organized around particular corporate societies—notoriously referred to as “old boy” networks. With the recent drift toward a more liberal market economy, however, these networks have been showing signs of decline—in some cases, all but disappearing. Eelke M. Heemskerk combines formal network analysis and interviews with key members of the corporate elite in order to examine how this decline has affected Dutch capitalism. Even in a liberal market economy, however, corporate directors need social networks to communicate and coordinate their strategic decisions, and *Decline of the Corporate Community* considers the shift of the corporate elite to the new private and informal circles where networking takes place.

The Power of Corporate Networks Thomas David, Gerarda Westerhuis, 2014-08-27 Corporate networks, the links between companies and their leaders, reflect a country’s economic organization and its corporate governance system. Most research on corporate networks focuses on individual countries or particular time periods, however, making fruitful comparisons over longer periods of time difficult. This book provides a unique long-term analysis of the rise, consolidation, decline, and occasional re-emergence of these networks in fourteen countries across North and South America, Europe, and Asia in the 20th and early 21st centuries. In this volume, the editors bring together the most internationally well-known specialists to investigate the long-term development of corporate networks. Using a combination of quantitative and qualitative research approaches, the authors describe the main developments and changes in the corporate network over time by focusing on important network indicators in benchmark years, and identify historical explanations for these developments. This unique,

long-term perspective allows readers insight into how and why national corporate networks have evolved over time.

Hegemonic Transitions, the State and Crisis in Neoliberal Capitalism Yildiz Atasoy,2009-01-08 More than 15 years have passed since the end of the Cold War, but uncertainty persists in the political-economic shaping of the world economy and state system. Although many countries have institutionalized neoliberal policies since the mid-1970s, these policies have not taken hold to the same degree, nor have their effects been uniform across all countries. Nevertheless there has been widespread deepening of inequalities, and, therefore, scepticism towards the neoliberal project. Uncertainty prevails not only in the relations between states, but also in the relations between forces of capital, citizens, and political power within states. Moreover, there is conceptual confusion in our understanding of the events and processes of neoliberal global transformation. This collection of essays provides a comprehensive theoretical and empirical examination of neoliberal restructuring as a complex political process. In an effort to penetrate and clarify this complexity, the book explores the connections between the economy, state, society, and citizens, while also offering current examples of resistance to neoliberalism. The book provides a forum for rethinking politics that represents a turn to societal forces as essential not only to the uncovering of this complexity but also to the formulation of democratic possibilities beyond global hegemonic projects. The book does not seek to produce a new model for social change, nor does it dwell on the spatial aspects of modernity's new form or the emergence of a new state hegemony (China) or new forms of rule (empire) in managing the world capitalist economy. Instead, the book argues that an understanding of hegemonic transformations requires the problematization of global power as embedded in historically specific social relations.

Diversity in the Power Elite Richard L. Zweigenhaft,G. William Domhoff,2006-04-07 This book looks systematically at the extent to which Jews, women, African Americans, Latinos, Asians and gay men and lesbians have entered the higher circles of power that constituted what sociologist C. Wright Mills called 'the power elite.' It examines why and how the power elite has diversified, the pathways taken by those who have entered the power elite, and the effect this diversification has had on the way power works in the United States.

Corporate Networks and Corporate Control Ralph M. Faris, 1991-11-30 A central question of power structure research-- Who controls corporations?--is addressed in this sustained investigation that specifically focuses on the formal ties among Delaware Valley Fortune 500 and Fortune 50 ranked corporations. Faris identifies 48 multi-interlocking corporations and provides empirical evidence on the nature and extent of their interlocking directorates in such areas as policy-setting groups, socio-cultural organizations, and religious denominations. The volume contains clear expositions of three distinct theoretical models of corporate control. User-friendly graphs and tables make the interlocking connections particularly accessible.
