Humanistic Foundation of Criminal Law Xingliang Chen, 2023-03-04 This book uses humanity-rationality and experience and the freedom of human will as a theoretical perspective to examine the basic framework of criminal law theories constructed by the criminal classic school and the criminal empirical school. The author puts forward the principle of the duality of rationality and experience of humanity and affirms the determinism of human behavior in the ontological sense and the freedom of will in the axiological sense. From this point of view, this book examines the humanistic foundations of crime and punishment, legislation and justice.

Confiscation and Destruction Ugur Ungor,Mehmet Polatel,2011-06-09 This is the first major study of the mass sequestration of Armenian property by the Young Turk regime during the 1915 Armenian genocide. It details the emergence of Turkish economic nationalism, offers insight into the economic ramifications of the genocidal process, and describes how the plunder was organized on the ground. The interrelated nature of property confiscation initiated by the Young Turk regime and its cooperating local elites offers new insights into the functions and beneficiaries of state-sanctioned robbery. Drawing on secret files and unexamined records, the authors demonstrate that while Armenians suffered systematic plunder and destruction, ordinary Turks were assigned a range of property for their progress.

Murder in Our Midst Romayne Smith Fullerton,Maggie Jones Patterson,2021-01-04 Crime stories attract audiences and social buzz, but they also serve as prisms for perceived threats. As immigration, technological change, and globalization reshape our world, anxiety spreads. Because journalism plays a role in how the public adjusts to moral and material upheaval, this unease raises the ethical stakes. Reporters can spread panic or encourage reconciliation by how they tell these stories. Murder in our Midst uses crime coverage in select North American and Western European countries as a key to

examine culturally constructed concepts like privacy, public, public right to know, and justice. Working from close readings of news coverage, codes of ethics and style guides, and personal interviews with almost 200 news professionals, this book offers fertile material for a provocative conversation. We use our findings to divide the ten countries studied into three media models; we explore what the differing coverage decisions suggest about underlying attitudes to criminals and crime, and how justice in a democracy is best served. Today, journalists' work can be disseminated around the world without any consideration of whether what's being told (or how) might dissolve cultural differences or undermine each community's right to set its own standards to best reflect its citizens' values. At present, unique reporting practices persist among our three models, but the internet and social media threaten to dissolve distinctions and the cultural values they reflect. We need a journalism that both opens local conversations and bridges differences among nations. This book is a first step in that direction--

Applying International Humanitarian Law in Judicial and Quasi-Judicial Bodies Derek Jinks, Jackson N. Maogoto, Solon Solomon, 2014-07-01 The work analyzes the impact and implementation of international humanitarian law in judicial and quasi-judicial bodies. Moreover, acknowledging the high impact domestic jurisdictions have in the configuration of international law, the book does not rest only in an analysis of the international jurisprudence, but delves also into the question of how domestic courts relate to international humanitarian law issues.

The Bigger They Are... Donald R. Durbin, Jr., 2000-12 The book is about my great grandfather, Will Burfening, the son of German immigrants. The story tells of his lifelong battle with the Chicago, St. Paul, Minneapolis and Omaha Railroad Company in Minneapolis. He fought to keep his home and land, which he had settled under the Homestead Act of 1862. The book chronicles the story behind a landmark case of the American justice system. Over time, his court battles included state and federal district courts, the Minnesota State Supreme Court and the United States Supreme Court. Even the President of the United States became involved!

Law Reform in Developing and Transitional States Timothy Lindsey, 2007 This informative book examines examples of law reform projects in post-socialist and post-authoritarian states in Asia, identifies common problems, and proposes analytical frameworks for understanding them.

Emerging Market Economies and Financial Globalization Leonardo E. Stanley, 2018-03-15 In the past, foreign shocks arrived to national economies mainly through trade channels, and transmissions of such shocks took time to come into effect. However, after capital globalization, shocks spread to markets almost immediately. Despite the increasing macroeconomic dangers that the situation generated at emerging markets in the South, nobody at the North was ready to

acknowledge the pro-cyclicality of the financial system and the inner weakness of “decontrolled” financial innovations because they were enjoying from the “great moderation.” Monetary policy was primarily centered on price stability objectives, without considering the mounting credit and asset price booms being generated by market liquidity and the problems generated by this glut. Mainstream economists, in turn, were not majorly attracted in integrating financial factors in their models. External pressures on emerging market economies (EMEs) were not eliminated after 2008, but even increased as international capital flows augmented in relevance thereafter. Initially economic authorities accurately responded to the challenge, but unconventional monetary policies in the US began to create important spillovers in EMEs. Furthermore, in contrast to a previous surge in liquidity, funds were now transmitted to EMEs throughout the bond market. The perspective of an increase in US interest rates by the FED is generating a reversal of expectations and a sudden flight to quality. Emerging countries’ currencies began to experience higher volatility levels, and depreciation movements against a newly strong US dollar are also increasingly observed. Consequently, there are increasing doubts that the “unexpected” favorable outcome observed in most EMEs at the aftermath of the Global Financial Crisis (GFC) would remain.

Islamic Fundamentalist Terrorism, 1979-95 E. O'Ballance, 1996-11-04 The Iranian Connection is the network of embassies and diplomatic staffs spread throughout the world that support Islamic Fundamentalist terrorism, controlled by 'Dept 15', in Tehran, the Iranian government denying all implication. When he came to power in 1979, Ayatollah Khomeini used terrorism to consolidate his position, realised its potential, and exploited it to further his dream to 'March to Jerusalem', by assassinating his enemies, supporting like-minded national terrorist groups, causing huge explosions at Israeli embassies, organising aircraft hijacking and hostage-taking. The Iranian Connection is supporting insurrection in Algeria and the Israeli Occupied Territories, the object being to install governments that will rule according to the Koran and Muslim custom.
