Mario Monti's Impossible Mission Giglio Reduzzi,2012-07-04 For TIME magazine picturing an Italian guy on the front cover of its international edition, with no disparaging intentions, is a rare event by itself and one of great pride for us, who are the man's fellow citizens. Our pleasure reaches the climax when we find out the person in the picture is our Premier and the caption is: Can this man save Europe? Mind you: Europe, not Italy, as one could expect. Under the conditions, writing about him, however shortly, becomes irresistible for a man, like me, who lives on bread and politics. Too bad that I am known to being frank. In fact my frankness obliges me to write that, in my modest opinion (and, to quote Winston Churchill, I have a lot to be modest about), the answer to TIME caption is: I wish he could. And that is why I am calling this essay: Mario Monti's Impossible Mission.

From Berlusconi to Monti Anna Bosco,Duncan McDonnell,2012 In 2011, Silvio Berlusconi's government fell amid a severe financial crisis that called into question the sustainability of Italy's enormous public debt. But Italy's entire political class suffered a downgrade at the hands of Europe, the markets, national elites, and many Italian citizens. From the beginning of 2011, the parties appeared weak and lacking in any vision, capable only of reacting poorly to events and interpreting them within the tired pro-/anti-Berlusconi frame that had dominated politics for two decades. Throughout the year, those shaping the key events came from outside the main parties: the president of the Republic, Giorgio Napolitano; the new president of the European Central Bank, Mario Draghi; the leader of Confindustria, Emma Marcegaglia; the new mayors of Milan and Naples; the promoters of the referendums in June; and, last but by no means least, the European Union, foreign leaders, and the markets. In November, the downgrade of Italy's parties was made official by the installation of a technocratic government, led by Mario Monti. By the year's end, it therefore seemed clear that while the Third Republic had not yet begun, the Second was breathing its last.

International Licensing Agreements Michala Meiselles,Hugo Wharton,2018-10-02 Like any contract, an international licensing agreement spells out the rights and obligations of the contracting parties, manages potential risks and supplies a contingency plan for each party in the event the contractual relationship breaks down. However, international licensing of intellectual property, software or technology confronts the contracting parties with its own distinct challenges. When planning, drafting and negotiating such agreements, it is imperative to know exactly what core issues need to be addressed.

This book provides this know-how in an easy-to-use, clear and concise fashion. This expert guide to the complex world of international licensing agreements brings together all the essential materials needed when dealing with such agreements and covers the following: • business models that may be used by the contracting parties; • standard provisions encountered in an array of international licensing agreements; • analysis of the key clauses in various international licensing agreements inter alia trademark, software, franchise and technology licences with provisions as affected by jurisdiction; • effect of competition law in a variety of jurisdictions; • ensuring trademark protection at both national and international levels; • clear explanation of key franchising terminology and disclosure rules; and • effect of international dispute resolution rules in a range of jurisdictions. Alongside detailed contract analysis, the book details numerous case studies from an array of industries, with detailed commentary. Practitioners operating within or representing medium to large firms who normally have to prepare or provide advice on international licence arrangements will quickly find this reference material indispensable. The book's thorough analysis of this complex area will also be welcomed by professionals working for universities, industry, interest groups, government departments and international organisations.

Aesthetic Capitalism Eduardo de la Fuente,Peter Murphy,2014-06-26 Aesthetic Capitalism debates the social aesthetics of contemporary economic processes. The book connects modern cultural dynamics with the workings of contemporary capitalism. It explores art and the new spirit of capitalism; visual culture and the experience economy; aesthetics and organisations; the art of fiscal management; capitalism without myth; and architecture in the age of aesthetic capitalism. Contributors include: Peter Murphy, Eduardo de la Fuente, Antonio Strati, Ken Friedman, Dominique Bouchet, Anders Michelsen, David Roberts, Carlo Tognato

The Evolution of European Competition Law Hanns Ullrich,2006-01-01 Professor Ullrich is thoughtful and attracted star scholars from many countries, so the papers and discussion are provocative and introduce recent economic thinking, although many are written by lawyers. . . The text is lucid and interesting, the thought innovative and anyone seriously interested in competition policy should read these papers and the comments with pleasure. Valentine Korah, World Competition This collection of papers and comments deserves to be widely read, and it should appeal to academics and practitioners alike. The great mix of topics and the variety of views offered make this a very stimulating contribution to the discussion of the new paradigm of EC competition law, the more economic approach, and its implications for the application and interpretation of the various EU antitrust rules. Thomas Eilmansberger, European Law Journal The editor should be congratulated for bringing together this diverse group of scholars whose spirited disagreements remind one of the many challenges faced in exploring the role and function of competition law. Giorgio Monti, European Review of Contract Law With contributions from leading scholars from all over Europe and the US, this book covers the major areas of substantive

competition law from an evolutionary perspective. The leitmotiv of the book has been to assess the dividing line between safeguarding and regulating competition, which it does by reviewing the following subjects: foundations of competition policy in the EU and the US strategic competition policy the evolution of European competition law from a national (Italian) perspective the block exemption of vertical agreements after four years the new Technology Transfer Block Exemption cooperative networking mergers in the media sector abuse of market power concepts of competition in sector specific regulation competition, regulation and systems coherence efficiency claims in EU competition law and sector specific regulation. The Evolution of European Competition Law will be of great interest to lawyers, economists, academics, judges and public officials working in the fields of competition law and policy.

International Antitrust Law & Policy: Fordham Corporate Law 2002 Barry E. Hawk, 2003 This volume contains articles and panel discussions delivered during the Thirty-Ninth Annual Fordham Competition Law Institute Conference on International Antitrust Law & Policy. About the Proceedings: Every October the Fordham Competition Law Institute brings together leading figures from governmental organizations, leading international law firms and corporations and academia to examine and analyze the most important issues in international antitrust and trade policy of the United States, the EU and the world. This work is the most definitive and comprehensive annual analysis of international antitrust law and policy available anywhere. The chapters are revised and updated before publication, where necessary. As a result, the reader receives up-to-date practical tips and important analyses of difficult policy issues. The annual volumes are an indispensable guide through the sea of international antitrust law. The Fordham Competition Law Proceedings are acknowledged as simply the most definitive US/EC annual analyses of antitrust/competition law published. Each annual edition sets out to explore and analyze the areas of antitrust/competition law that have had the most impact in that year. Recent hot topics include antitrust enforcement in Asia, Latin America: competition enforcement in the areas of telecommunications, media and information technology. All of the chapters raise questions of policy or discuss new developments and assess their significance and impact on antitrust and trade policy.

Fiscal Policy, Economic Adjustment, and Financial Markets Mr. Mario Monti, 1989-06-15 Edited by Mario Monti, this volume contains the proceedings of a seminar that was held in Milan at the Centre for Financial and Monetary Economics, Università Luigi Bocconi. Participants included government officials, academicians, and economists; they provide a many-faceted view of fiscal policy at the domestic level and in the broader context of international policy coordination.

International Business Marios I. Katsioloudes, Spyros Hadjidakis, 2007 'International Business' covers international business issues from a multinational perspective. Each chapter features the reverse perspective case that provides material for discussion and/or case analysis from a global perspective not necessarily that of the US.

International Business Marios Katsioloudes, Spyros Hadjidakis, 2007-03-15 Traditionally, international business (IB) texts survey the field from a USA perspective, going on to compare the USA to the rest of the business world. This text addresses IB from a purely multinational perspective. International Business is examined from the USA angle, going on to address IB issues from other countries' perspectives, what we call the "Reverse Perspective." The authors interview business executives and politicians from a number of countries including the USA, Canada, Mexico, Brazil, Colombia, Argentina, India, Hong Kong, Taiwan, China, Japan, South Korea, Germany, Italy, and Russia. These interviews are incorporated at appropriate points in the text providing first-hand information and practical insight. Cases include: Air Arabia, Gap, Diebold Inc, Matsushita, AMSUPP, NIKE, China Eastern Airlines, Luton & Dunstable Hospital, Harley Davidson, Cassis de Dijon, Green investments in Belize, Chicago Food and Beverage Company, Advanced Software Analytics

Oracles, Heroes or Villains George E. Shambaugh, 2019-09-19 IMF Managing Director Christine Lagarde declared central bankers and finance ministers to be the heroes of recent economic crises for taking corrective action while national politicians squabbled. What enabled them to do so? In the wake of Brexit, chaotic trade policies in the United States, and resurgent nationalism around the world, national politicians are quarrelling again, meanwhile the markets are roiling. Can we again depend on economic technocrats to save the day for these national politicians and the rest of us? What happens if they fail or, perhaps worse, go too far? In this timely book, Shambaugh answers these questions using recent economic crises in Argentina, the United States and Europe as case studies for analysing the intersections of power, politics and markets. By specifying the interactions between political uncertainty, market intervention, and investor risk, Shambaugh predicts how economic technocrats manage market behaviour by shifting expectations regarding what national politicians will do and whether their policies will be effective.

Psychoanalytic Reflections on Politics Eszter Salgó, 2013-11-07 *Psychoanalytic Reflections on Politics: Fatherlands in mothers' hands* is a playful exploration of how people's desires, fantasies, and emotions shape political events and social phenomena. It highlights the mythical sources of today's political projects, the power of political imagination, and the function of symbolism in political thought. Eszter Salgó argues that the driving force for the formation of political communities is fantasy - 'illusions' in a Winnicottian sense, 'phantasies' in a Lacanian sense, 'phantoms' as described by Nicolas Abraham and Maria Torok, and 'dreams' as interpreted by Sándor Ferenczi. She introduces the metaphor of the 'fantastic family' as a symbolic representation of political communities, both to reflect on people's deeply felt desire to find in public life the resolution, love, and wholeness of early childhood, and to unveil the political elite's readiness to don the mask of the 'ideal parent'. The book is divided into two parts. The first part of the book explores the theories of Donald Winnicott and Jacques Lacan: the matrimony on the stage of politics between the 'good-enough mother' and the Symbolic Father which inaugurates the story of democracy's 'fantastic family'. The second part presents the 'fantastic families' of selected countries

such as Hungary, Italy, and the world community to explain the proliferation of cosmogony projects, and to document the failure of the political elites to offer a satisfactory performance of their maternal and paternal functions. *Psychoanalytic Reflections on Politics: Fatherlands in mothers' hands* presents a new way of considering the art of politics, based on the understanding that people perceive reality through imagination and unconscious fantasy. It will be of interest to psychoanalysts, and academics from across the disciplines of politics, psychology, anthropology, sociology, philosophy, literature, and art.

From Marks & Spencer to X Holding Dennis Manolito Weber, Bruno da Silva, 2011-01-01 The book deals with European law aspects of two European Court of Justice cases concerning cross-border tax relief claims and the decisions which have been criticized for lack of clarity and for breach of the freedom of establishment (Article 49 TFEU). The papers collected in the book cover the following issues: the underlying tax obstacles which exist for companies operating in more than one Member State; potential for tax avoidance; prevention of double use of losses (the 'no possibilities' test); disadvantages that arise as a consequence of the parallel exercise of fiscal sovereignty; the concept of 'balanced allocation of taxing powers'; meaning of 'final losses'; the 'Bosal fix'; cash-flow disadvantages of having to carry losses forward; deduction of currency losses; deduction-and-recapture rules; and VAT grouping.

The Technocratic Challenge to Democracy Eri Bertsou, Daniele Caramani, 2020-03-09 This book represents the first comprehensive study of how technocracy currently challenges representative democracy and asks how technocratic politics undermines democratic legitimacy. How strong is its challenge to democratic institutions? The book offers a solid theory and conceptualization of technocratic politics and the technocratic challenge is analyzed empirically at all levels of the national and supra-national institutions and actors, such as cabinets, parties, the EU, independent bodies, central banks and direct democratic campaigns in a comparative and policy perspective. It takes an in-depth analysis addressing elitism, meritocracy, de-politicization, efficiency, neutrality, reliance on science and distrust toward party politics and ideologies, and their impact when pitched against democratic responsiveness, accountability, citizens' input and pluralist competition. In the current crisis of democracy, this book assesses the effects of the technocratic critique against representative institutions, which are perceived to be unable to deal with complex and global problems. It analyzes demands for competent and responsible policy making in combination with the simultaneous populist resistance to experts. The book will be of key interest to scholars and students of comparative politics, political theory, policy analysis, multi-level governance as well as practitioners working in bureaucracies, media, think-tanks and policy making.

Der Binnenmarkt und das Europa von morgen Mario Monti, 1997 Dieses Buch, in dem die bisherige Entwicklung des Binnenmarktes zusammengefaßt wird, ist ein unentbehrliches Nachschlagewerk zur Binnenmarktpolitik der Europäischen Kommission. In der Schriftreihe Single Market Review erscheinen 39 Studien mit ausführlichen Informationen über einzelne

Wirtschaftszweige (die Liste der nur in englischer Sprache erschienenen Einzelbände kann Anhang C, S. 176, entnommen werden).

Diese Entwicklung nahm ihren Anstoß in Person des ehemaligen Wettbewerbskommissars Mario Monti Ende der 90er-Jahre des vorigen Jahrhunderts. Der more economic approach führte im Bereich der Kartelle durch die neue VO 1/2003 zum Übergang vom Erlaubnisvorbehalt hin zur Legalausnahme und bedeutete damit einen Systemwechsel. Die Gruppenfreistellungsverordnungen und die Fusionskontrolle wurden ebenfalls dem neuen Ansatz angepasst. Kurz darauf zeichnete sich auch eine Überarbeitung der Herangehensweise an Art. 82 EGV ab. Im Juli 2005 erschien der Bericht der Economic Advisory Group for Competition Policy (EAGCP) An economic approach to Article 82. Im Dezember 2005 veröffentlichte die Kommission schließlich ein Diskussionspapier zur Anwendung des Artikel 82 auf Behinderungsmissbrauch. Dieses Diskussionspapier beinhaltet den Aufruf zur öffentlichen Erörterung und hat das Ziel vor Augen, später in Leitlinien zur Anwendung des Artikel 82 EGV zu führen. In der Fachwelt stieß das Diskussionspapier auf hohes Interesse und führte zu mehr als 100 Stellungnahmen, die bei der Kommission eingingen. Diese Arbeit soll zunächst einen Überblick über die wichtigsten verschiedenen wettbewerbspolitischen Leitbilder verschaffen. Danach wird auf die bisher praktizierte Interpretation von Art. 82 EGV und das ihr zugrunde liegende Leitbild eingegangen. Bestandteil d

Major Nation-States in the European Union J. Richard Piper, 2015-09-25 Integrating the study of individual European nation-states within the framework of the European Union, this unique new text is essentially two books in one: a book on the EU and a comparative introduction to European politics. This text provides more value to students by combining two texts in one, but engages student interest and facilitates learning through a variety of useful features. Role-playing exercises encourage participation and test students' critical thinking skills, while an emphasis on the people behind the politics humanizes material and provides lively insights into contemporary European politics and society. To ensure student understanding, there is extensive material comparing and contrasting EU states to one another and to the United States, a thorough glossary at the end of the book, and an abundance of examples, tables, charts, and graphs to illustrate and extend the discussions.

The Oxford Handbook of Italian Politics Erik Jones, Gianfranco Pasquino, 2015 The Oxford Handbook of Italian Politics provides a comprehensive look at the political life of one of Europe's most exciting and turbulent democracies. Under the hegemonic influence of Christian Democracy in the early post-World War II decades, Italy went through a period of rapid growth and political transformation. In part this resulted in tumult and a crisis of governability; however, it also gave rise to innovation in the form of Eurocommunism and new forms of political accommodation. The great strength of Italy lay in its constitution; its great weakness lay in certain legacies of the past. Organized crime--popularly but not exclusively associated with the mafia--is one example. A self-contained and well entrenched 'caste' of political and economic elites is another. These weaknesses became apparent in the breakdown of political order in the late 1980s and early 1990s. This ushered in a combination of populist political mobilization and experimentation with electoral systems design, and the result has been

more evolutionary than transformative. Italian politics today is different from what it was during the immediate post-World War II period, but it still shows many of the influences of the past.
