Die Akte Glyphosat Helmut Burtscher-Schaden,2017-09-01 Glyphosat ist überall: in Äckern, auf Feldern und in Flüssen. Wir essen es im Brot, trinken es im Bier und tragen es im Körper. Macht aber nichts, beruhigen die Zulassungsbehörden und Hersteller: Der Unkrautvernichter sei bestens untersucht und sicher. Stimmt nicht, widerspricht die WHO und stufte Glyphosat 2015 als wahrscheinlich krebserregend für den Menschen ein.Doch wie konnten die Zulassungsbehörden jahrzehntelang auf Basis derselben Tierstudien keine Hinweise auf eine krebserregende Wirkung erkennen, die laut den Krebsforschern der WHO ausreichende Beweise liefern? Auf der Suche nach Antworten begibt sich Helmut Burtscher-Schaden in diesem investigativen und spannenden Buch auf eine Reise durch die US-amerikanischen Behörden-Archive der 1970er und 80er Jahre und analysiert die verfügbaren Dokumente aus dem gegenwärtigen Europäischen Zulassungsverfahren. Die Details, die er rund um die geheimen Studien der Hersteller ans Licht bringt, eröffnen erschreckende Einblicke in die Verstrickungen zwischen Industrie, privaten Prüfinstituten und Kontrollbehörden. Sie entlarven ein System, das die Hersteller dabei unterstützt, Gefahren und Risiken ihrer Produkte herunterzuspielen. Letztendlich bleibt die Frage: Wem lassen unsere Regierungen mehr Schutz angedeihen – Konzerninteressen oder unserer Gesundheit?

Europe's Malaise Francesco Duina,Frédéric Merand,2020-10-07 Europe is struggling. Its challenges include weak economic growth, demographic trends that undermine the sustainability of social and other programs, migration, Brexit, the unfinished euro architecture and much more. This volume of Research in Political Sociology seeks to adopt a 'longer' view to make sense of Europe's current 'malaise'.

Progresses in Artificial Intelligence and Neural Systems Anna Esposito,Marcos Faundez-Zanuy,Francesco Carlo Morabito,Eros Pasero,2020-07-09 This book provides an overview of the current advances in artificial intelligence and neural

nets. Artificial intelligence (AI) methods have shown great capabilities in modelling, prediction and recognition tasks supporting human-machine interaction. At the same time, the issue of emotion has gained increasing attention due to its relevance in achieving human-like interaction with machines. The real challenge is taking advantage of the emotional characterization of humans' interactions to make computers interfacing with them emotionally and socially credible. The book assesses how and to what extent current sophisticated computational intelligence tools might support the multidisciplinary research on the characterization of appropriate system reactions to human emotions and expressions in interactive scenarios. Discussing the latest recent research trends, innovative approaches and future challenges in AI from interdisciplinary perspectives, it is a valuable resource for researchers and practitioners in academia and industry.

How the World Remade Hollywood Ed Glaser,2022-03-07 For decades, filmmakers worldwide have been remaking Hollywood movies in colorful ways. They've chronicled a singing and dancing Hannibal Lecter in India, star-crossed lovers aboard the doomed Nigerian ship Titanic, a Japanese expedition to the planet of the apes, and an uncivil war in Turkey between Captain America and a mobbed-up Spider-Man. Most of these films were low budget and many were unauthorized, but all of them were fantastic--and lately have begun to resurface thanks to cherry-picked YouTube clips. But why and how were they made in the first place? This book tells the little-known stories of the wily filmmakers who made an Italian 007 flick by casting Sean Connery's tradesman brother, produced a Turkish space opera by stealing a print of Star Wars for its effects footage, and transported a full-fledged Terminator to the present day--not from a post-apocalyptic future, but from the vibrant mythology of Indonesia. Their stories reveal more than mere imitations; they demonstrate the fascinating ways ideas evolve as they cross borders.

Italy's Contemporary Politics James L. Newell,2020-12-17 In early 2020 Italy was a country whose political parties stood as significant obstacles in the way of resolution of its social and economic problems. The purpose of this book is to help the reader to understand how Italian politics had reached this point. It does this by tracing the most significant processes of political, economic and social change to have marked Italian history in recent years back to their roots in the Italian political system as it emerged at the end of the Second World War. Starting with the restoration of democracy, the volume discusses the post-war party system and how it came under increasing pressure from the mid-1970s. From there it discusses the political upheavals of the early 1990s and the transformations they led to, the rise and fall of Silvio Berlusconi, and the watershed election of 2018. In short, the book provides a narrative. Narratives tell us who we are, where we have come from, where we are now and where we are going. Without them, we cannot make sense of the world. At the end of this narrative, if it has done its job properly, Italian politics and current affairs should 'make sense' if before they seemed confusing.

Sorting the Beef from the Bull Richard Evershed,Nicola Temple,2016-02-25 Horsemeat in burgers was hard to swallow, but there are far more sinister culinary crimes afoot... Chicken eggs that haven't come from chickens, melamine in

infant's milk in China, nut shells in spices – these are just some examples of the food fraud that has occurred in recent years. As our urban lifestyle takes us further and further away from our food sources, there are increasing opportunities for dishonesty, duplicity and profit-making short-cuts. Food adulteration, motivated by money, is an issue that has spanned the globe throughout human history. Whether it's a matter of making a good quality oil stretch a bit further by adding a little extra 'something' or labelling a food falsely to appeal to current consumer trends – it's all food fraud, and it costs the food industry billions of dollars each year. The price to consumers may be even higher, with some paying for these crimes with their health and, in some cases, their lives. *Sorting the Beef from the Bull* is a collection of food fraud tales from around the world. It explains the role of science in uncovering some of the century's biggest food scams, and explores the arms race between food forensics and fraudsters as new methods of detection spur more creative and sophisticated means of committing the crimes. This book equips us with the knowledge of what is possible in the world of food fraud and shines a light on the shady areas of our food supply system where these criminals lurk.

Machine Learning on Commodity Tiny Devices Song Guo, Qihua Zhou, 2022-11-24 This book aims at the tiny machine learning (TinyML) software and hardware synergy for edge intelligence applications. It presents on-device learning techniques covering model-level neural network design, algorithm-level training optimization, and hardware-level instruction acceleration. Analyzing the limitations of conventional in-cloud computing would reveal that on-device learning is a promising research direction to meet the requirements of edge intelligence applications. As to the cutting-edge research of TinyML, implementing a high-efficiency learning framework and enabling system-level acceleration is one of the most fundamental issues. This book presents a comprehensive discussion of the latest research progress and provides system-level insights on designing TinyML frameworks, including neural network design, training algorithm optimization and domain-specific

hardware acceleration. It identifies the main challenges when deploying TinyML tasks in the real world and guides the researchers to deploy a reliable learning system. This volume will be of interest to students and scholars in the field of edge intelligence, especially to those with sufficient professional Edge AI skills. It will also be an excellent guide for researchers to implement high-performance TinyML systems.

Applications in Electronics Pervading Industry, Environment and Society Francesco Bellotti, Miltos D.

Grammatikakis, Ali Mansour, Massimo Ruo Roch, Ralf Seepold, Agusti Solanas, Riccardo Berta, 2024-01-12 This book provides a thorough overview of cutting-edge research on electronics applications relevant to industry, the environment, and society at large. It covers a broad spectrum of application domains, from automotive to space and from health to security, while devoting special attention to the use of embedded devices and sensors for imaging, communication, and control. The book is based on the 2023 ApplePies Conference, held in Genoa, Italy, in September 2023, which brought together researchers and stakeholders to consider the most significant current trends in the field of applied electronics and to debate visions for the future. Areas addressed by the conference included information communication technology; biotechnology and biomedical imaging; space; secure, clean, and efficient energy; the environment; and smart, green, and integrated transport. As electronics technology continues to develop apace, constantly meeting previously unthinkable targets, further attention needs to be directed toward the electronics applications and the development of systems that facilitate human activities. This book, written by industrial and academic professionals, represents a valuable contribution in this endeavor.

The Politics of Polarisation Anna Bosco, Susannah Verney, 2022-08-22 Focusing on Italy, Spain and Greece, this book explores the extent of polarisation, as well as its causes, characteristics and consequences. It investigates varied manifestations of polarised politics including leader polarisation, policy polarisation and affective polarisation as well as providing case studies of polarised elections taking place at multiple levels. In recent years, polarisation has been a key feature of South European politics. Deep antagonism has moved party leaders against each other, hindered parliamentary and governmental cooperation, and triggered a cascade effect of harsh divisions among elites and citizens. Beyond the left-right axis, the chapters in this volume highlight multiple dimensions around which parties and voters polarise: the split around sovereign bailouts in Greece, the territorial cleavage in Spain, the divisions around immigration and European integration in Italy. This volume offers essential understanding of the specific features of polarisation in different national contexts and the consequences for political competition and government instability. The chapters in this book were originally published as a special issue of South European Society and Politics.

New Paths for Selecting Political Elites Giulia Sandri, Antonella Seddone, 2021-05-15 This book provides a cross-country study of the consequences of the expansion of intra-party democracy, the trend towards more inclusive methods of selection for party candidates and leaders, and the impact of these on political elites in terms of sociopolitical profile and patterns of

careers. It explores the link between political organizations and political elites, by studying the role of parties in parliamentary and political selection and its impact on the political leadership appointed. Putting an emphasis on primary elections, it analyses the party elites that emerge from those selection processes and those democratized organizational settings. It focuses not only on the analysis of the processes through which party elites are selected and the consequences at the level of the party but also at the level of party elites themselves, i.e. what impact party primaries have on the characteristics parties' candidates and leaders. The book offers a theoretical, comparative, and empirical account of the internal electoral processes of parties and their impact on political recruitment. This book will be of key interest to scholars and students of political elites, political parties and party systems, electoral politics, democracy, populism, and leadership, and more broadly to comparative politics.

Laboratorio Expo Salvatore Veca (a cura di), 2015-10-22T00:00:00+02:00 This volume of The Annali is meant to collect among some the most significant outcomes of the research activities having characterised the "adventure of ideas" of Laboratorio Expo during the two-year period 2013-2015. The project 'Laboratorio Expo' has been conceived and structured in 2012. Its research programs had been presented in June 2013 and all activities launched in September of that year, thanks to an agreement between the Giangiacomo Feltrinelli Foundation and the company Expo Milano 2015 SpA. In the first part of the volume, Scientific research for a sustainable development, the outcomes of the research have been described and discussed, divided into the different subject areas of the complex and articulated activity carried out within the project 'Laboratorio Expo'. The second part, Problems, ideas and proposals, is made up of a wide range of different contributions provided by distinguished researchers working in research and academic Institutions for the development of this project and the sharing of ideas. In the Appendix, we have included both an accurate report of the all activities carried out in the two-year period 2013-2015 and the Charter of Milan, the cultural legacy of Expo Milano 2015, that has been coordinated and drafted by Laboratorio Expo, under the supervision of the Italian Minister of Agriculture, Maurizio Martina and of the Italian government. Laboratorio Expo is based on a very simple idea: developing the research and the sharing of ideas within the international scientific community around the central theme of this 2015 Universal Exhibition held in Milan. Within the Laboratorio, the theme 'Feeding the Planet, Energy for Life' has been developed and articulated through four main subject areas. And with these four areas of investigation, all based on the assessment and analysis of the many faces of sustainability and its intrinsic plural dimensions, Laboratorio Expo worked as a public space where reflections, content experiences, practices, and perspectives could be shared, all scientifically based on the Expo's main theme.

Innovations, Reinvented Politics and Representative Democracy Agnès Alexandre-Collier,Alexandra Goujon,Guillaume Gourgues,2020-04-07 This volume focuses on the issue of change in democratic politics in terms of experimental or actual innovations introduced either within political parties or outside the party system, involving citizen participation and mobilization. Including a wide and diverse range of alternatives in the organization of groups, campaigning, conducting initiatives and enhancing practices, they not only question the relevance of traditional institutions in representing citizens' values and interests, but also share a common goal which is precisely - and perhaps paradoxically - to reshape and invigorate representative democracy This book is of key interest to scholars and students of party politics, elections/electoral studies, social movement and democratic innovations and more broadly to comparative politics, political theory and political sociology.

The Resistible Corrosion of Europe's Center-Left After 2008 Georg Menz,2022-09-30 This book examines and explains the Center-Left's political decline since 2008, whilst analyzing the factors that account for its sagging electoral and popular support, losing voters both to the Far-Left, the Far-Right, and abstentions. Focusing on the era since the 2008 financial crisis in particular, while also charting the historical genealogy that led to the current impasse, the book examines how, when and why the collapse of Europe's Center-Left occurred. Moving beyond existing and slightly dated accounts, the

contributors explore why Social Democrats lack compelling answers to pressing current policy challenges. Faced with a decline in its core clientele, namely blue-collar workers, the Center-Left is being outflanked and risks permanently jeopardizing its erstwhile status as representing a catch-all party. Exploring one of the more pressing and timely political puzzles of the contemporary political scene in Europe, the book identifies six factors that have driven the decline of the Left and examines them systematically across eight countries: France, the United Kingdom, Germany, Sweden, Italy, Austria, the Netherlands, and Denmark. This book will be of particular interest to both scholars and students of social democracy, political parties, and the politics of the Left and more broadly to those interested in European and comparative politics, governance, and contemporary history.

Electronics for Microwave Backhaul Vittorio Camarchia, Marco Pirola, Roberto Quaglia, 2016-03-31 This timely new resource presents an overview of the electronics of mobile network backhaul. Infrastructure planning, architecture evolution, digital controls, and countermeasures are all presented highlighting the building blocks of specific backhaul features. Tx and Rx design and antenna requirements are covered while examining the overall construction of the microwave radio hardware blocks. Single blocks are explored: the antenna, the analog transmitter and receiver, and the modem, recalling the most important aspects of transport networks and microwave link dimensioning. Essential theory is provided for each hardware block with an emphasis on present solutions. Authored by academic and industrial experts in the field, development and design engineers will benefit from the practical guidance in solving realistic issues and providing useful tips throughout the design process. This book guides readers through the historical evolution of microwave radios and the components of the next generation of mobile networks.

The Exceptional Case of Post-Bailout Portugal Elisabetta De Giorgi, José Santana-Pereira, 2021-09-30 This book explores the argument that Portugal has been an exception to the trend of political upheaval and electoral instability across Southern Europe following the financial crisis and the bailout period. It does so by mapping and exploring in-depth three key dimensions: the governmental arena, the party system and citizens' political attitudes. The five chapters in this edited volume show that a number of factors combine to make Portugal not only a very stimulating case study, but also an exception within the South European panorama: the stability of its party system, and that of the mainstream parties' electoral support in particular; the quick recovery of political attitudes after the end of the bailout period (2011-2014); the absence of competitive populist challengers until 2019, despite high levels of populist attitudes amongst the citizenry; the successful and stable union between anti-austerity parties supporting the socialist government (dubbed the 'Contraption') and its adoption of an 'austerity by stealth' model. This book shows that it is possible to combine critical junctures and political stability, responsiveness and responsibility, through the study of one of the most intriguing cases in Southern Europe in the last decades. The Exceptional Case of Post-Bailout Portugal will be of interest to students, researchers and scholars of Political

Science and European Studies. The chapters in this book were originally published as a special issue of the journal, South European Society and Politics.
