The Political Economy of Italy's Decline Andrea Lorenzo Capussela, 2018-04-05 Italy is a country of recent decline and long-standing idiosyncratic traits. A rich society served by an advanced manufacturing economy, where the rule of law is weak and political accountability low, it has long been in downward spiral alimented by corruption and clientelism. From this spiral has emerged an equilibrium as consistent as it is inefficient, that raises serious obstacles to economic and democratic development. The Political Economy of Italy's Decline explains the causes of Italy's downward trajectory, and explains how the country can shift to a fairer and more efficient system. Analysing both political economic literature and the history of Italy from 1861 onwards, The Political Economy of Italy's Decline argues that the deeper roots of the decline lie in the political economy of growth. It places emphasis on the country's convergence to the productivity frontier and the evolution of its social order and institutions to illuminate the origins and evolution of the current constraints to growth, using institutional economics and Schumpeterian growth theory to support its findings. It analyses two alternative reactions to the insufficient provision of public goods: an opportunistic one – employing tax evasion, corruption, or clientelism as means to appropriate private goods – and one based on enforcing political accountability. From the perspective of ordinary citizens and firms such social dilemmas can typically be modelled as coordination games, which have multiple equilibria. Self-interested rationality can thus lead to a spiral, in which several mutually reinforcing vicious circles lead society onto an inefficient equilibrium characterized by low political accountability and weak rule of law. The Political Economy of Italy's Decline follows the gradual setting in of this spiral as it identifies the deeper causes of Italy's decline.

Controversies in the Contemporary World Adriano Fabris, Giovanni Scarafile, 2019-08-07 Inspired by Marcelo Dascal's theory of controversies, this volume includes studies in the theory of controversies, studies of the history of controversy forms and their evolution, and case-studies of particular historical and current controversies. The purpose of this volume is to identify a taxonomy of controversies and also to sense a line of development for the phenomenon of controversies itself. At the same time, we want to ask ourselves about the impact and the spread of controversies in the contemporary world, eminently intended as a heuristic element facilitating knowledge. For all these reasons, the fundamental aim of the volume is to provide the reader with a selection of current theoretical and practical perspectives on controversies, and to offer a broad

picture of the complex range of definitions, meanings and practices connected to them.

Milan Undone John Gagné,2021-01-01 A new history of how one of the Renaissance's preeminent cities lost its independence in the Italian Wars. In 1499, the duchy of Milan had known independence for one hundred years. But the turn of the sixteenth century saw the city battered by the Italian Wars. As the major powers of Europe battled for supremacy, Milan, viewed by contemporaries as the "key to Italy," found itself wracked by a tug-of-war between French claimants and its ruling Sforza family. In just thirty years, the city endured nine changes of government before falling under three centuries of Habsburg dominion. John Gagné offers a new history of Milan's demise as a sovereign state. His focus is not on the successive wars themselves but on the social disruption that resulted. Amid the political whiplash, the structures of not only government but also daily life broke down. The very meanings of time, space, and dynasty—and their importance to political authority—were rewritten. While the feudal relationships that formed the basis of property rights and the rule of law were shattered, refugees spread across the region. Exiles plotted to claw back what they had lost. *Milan Undone* is a rich and detailed story of harrowing events, but it is more than that. Gagné asks us to rethink the political legacy of the Renaissance: the cradle of the modern nation-state was also the deathbed of one of its most sophisticated precursors. In its wake came a kind of reversion—not self-rule but chaos and empire.

Putting Tradition into Practice: Heritage, Place and Design Giuseppe Amoruso,2017-07-19 This book gathers more than 150 peer-reviewed papers presented at the 5th INTBAU International Annual Event, held in Milan, Italy, in July 2017. The book represents an invaluable and up-to-date international exchange of research, case studies and best practice to confront the challenges of designing places, building cultural landscapes and enabling the development of communities. The papers investigate methodologies of representation, communication and valorization of historic urban landscapes and cultural heritage, monitoring conservation management, cultural issues in heritage assessment, placemaking and local identity enhancement, as well as reconstruction of settlements affected by disasters. With contributions from leading experts, including university researchers, professionals and policy makers, the book addresses all who seek to understand and address the challenges faced in the protection and enhancement of the heritage that has been created.

Handbook of Organised Crime and Politics Felia Allum,Stan Gilmour,2019 This multidisciplinary Handbook examines the interactions that develop between organised crime groups and politics across the globe. This exciting original collection highlights the difficulties involved in researching such relationships and shines a new light on how they evolve to become pervasive and destructive. This new Handbook brings together a unique group of international academics from sociology, criminology, political science, anthropology, European and international studies.

Smart Planning: Sustainability and Mobility in the Age of Change Rocco Papa,Romano Fistola,Carmela Gargiulo,2018-06-12 This book offers an overview of sustainability and urban mobility in the context of urban planning -

topics that are of considerable interest in the development of smart cities. Environmental sustainability is universally recognized as a fundamental condition for any urban policy or urban management activity, while mobility is essential for the survival of complex urban systems. The new opportunities offered by innovations in the mobility of people, goods and information, as well as radically changing interactions and activities are transforming cities. Including contributions by urban planning scholars, the book provides an up-to-date picture of the latest studies and innovative policies and practices in Italy, of particular interest due to its spatial, functional and social peculiarities. Sustainability and mobility must form the basis of “smart planning” – a new dimension of urban planning linked to two main innovations: procedural innovation in the management of territorial transformations and the technological innovation of the generation, processing and distribution of data (big data) for the creation of new digital environments such as GIS, BIM, models of augmented and mixed reality, useful for describing changes in human settlement in real time.

International Handbook on Shareholders’ Agreements Sebastian Mock, Kristian Csach, Bohumil Havel, 2018-05-07
Shareholders’ Agreements have a growing influence on the general understanding of corporate law since they bind not only the shareholders but also affect the constitution of the corporation and can have a severe impact on capital markets. Therefore, Shareholders’ Agreements are more and more subject to regulation in corporate, capital market and also insolvency law on the national, the European and the international level. This handbook provides a general examination of conceptual questions of Shareholders’ Agreements and provides an analysis of the regulation of Shareholders’ Agreements in European and international law and of the national law of more than 20 jurisdictions. Readers will get a general understanding of the theoretical and practical problems involved with Shareholders’ Agreements and detailed information on the regulation of Shareholders’ Agreements in several jurisdictions and the applicable law in the case of transnational corporations and cross-border transactions.

Proceedings of the 1st International and Interdisciplinary Conference on Digital Environments for Education, Arts and Heritage Alessandro Luigini, 2019-03-22
This book gathers peer-reviewed papers presented at the 1st International and Interdisciplinary Conference on Digital Environments for Education, Arts and Heritage (EARTH2018), held in Brixen, Italy in July 2018. The papers focus on interdisciplinary and multi-disciplinary research concerning cutting-edge cultural heritage informatics and engineering; the use of technology for the representation, preservation and communication of cultural heritage knowledge; as well as heritage education in digital environments; innovative experiments in the field of

digital representation; and methodological reflections on the use of IT tools in various educational contexts. The scope of the papers ranges from theoretical research to applications, including education, in several fields of science, technology and art. EARTH 2018 addressed a variety of topics and subtopics, including digital representation technologies, virtual museums and virtual exhibitions, virtual and augmented reality, digital heritage and digital arts, art and heritage education, teaching and technologies for museums, VR and AR technologies in schools, education through digital media, psychology of perception and attention, psychology of arts and communication, as well as serious games and gamification. As such the book provides architects, engineers, computer scientists, social scientists and designers interested in computer applications and cultural heritage with an overview of the latest advances in the field, particularly in the context of science, arts and education.

Cultural, Theoretical, and Innovative Approaches to Contemporary Interior Design Crespi, Luciano,2020-02-07 Interior design can be considered a discipline that ranks among the worlds of art, design, and architecture and provides the cognitive tools to operate innovatively within the spaces of the contemporary city that require regeneration. Emerging trends in design combine disciplines such as new aesthetic in the world of art, design in all its ramifications, interior design as a response to more than functional needs, and as the demand for qualitative and symbolic values to be added to contemporary environments. Cultural, Theoretical, and Innovative Approaches to Contemporary Interior Design is an essential reference source that approaches contemporary project development through a cultural and theoretical lens and aims to demonstrate that designing spaces, interiors, and the urban habitat are activities that have independent cultural foundations. Featuring research on topics such as contemporary space, mass housing, and flexible design, this book is ideally designed for interior designers, architects, academics, researchers, industry professionals, and students.

Air Transport - A Tourism Perspective Anne Graham, Frederic Dobruszkes,2019-02-15 Air Transport: A Tourism Perspective provides rigorous insights into the current complexities, synergies and conflicts within air transportation and tourism, presenting a balanced, comprehensive, contemporary, and global analysis that thoroughly examines the links between theory and practice. The book offers readers a multi-sector, global perspective on the practical implications of the link between air transport and tourism. By using a novel approach, it systematically explores the successive stages of a tourist's trip-investigating reasons for flying, the airport experience, airline industry structures, competition and regulation, and air transportation and destination interrelationships. In addition, the book explores current and salient debates on such issues as the influence of traveling to visit friends and family, the role of charters versus low cost carriers, public subsidies to support airport development, and much more. Presents insights from an international team of expert contributors with proven research and publication experience in their specialty area Includes cutting-edge analyses based on original research that identifies emerging research directions and policy and managerial implications Utilizes a multidisciplinary approach to fully explore theoretical and policy concepts and their effect on air transportation and tourism development Provides case

studies from around the globe in each chapter

The Transformation of Private Law - Principles of Contract and Tort as European and International Law Maren Heidemann,

Islamic Political Theology Massimo Campanini, Marco Di Donato, 2021-05-11 Can we affirm that a political theology exists in Islam? This apparently simple question is the core of Massimo Capanini and Marco Di Donato's edited collection of essays. Considering the wide range of meanings of political theology this book contains essays written by different authors having their own, specific, and specialized, point of view on the topics, from Shia and Sunni political thought, to Islamic classic philosophy, and philosophers until arriving at contemporary Muslim thinkers.

New Challenges and Opportunities in Physics Education Marilena Streit-Bianchi, Marisa Michelini, Walter Bonivento, Matteo Tuveri, 2023-12-01 This book is invaluable for teachers and students in high school and junior college who struggle to understand the principles of modern physics and incorporate scientific methods in their lessons. It provides interactive and multidisciplinary approaches that will help prepare present and future generations to face the technological and social challenges they will face. Rather than using a unidirectional didactic approach, the authors - scientists, philosophers, communication experts, science historians and science education innovators - divide the book into two parts; the first part, "Communicating Contemporary Physics", examines how new physics developments affect modern culture, while the second part, "Digital Challenges for Physics Learning", covers physics education research using ICT, plus the experiences of classroom teachers and a range of ideas and projects to innovate physics and STEM teaching.

Framing History in East-Central Europe and Beyond Ferdinand Kühnel, Nedžad Kuč, Marija Wakounig, During the 1970s today's Austrian Federal Ministry of Education, Science and Research (Bundesministerium für Bildung, Wissenschaft und Forschung, BMBWF) supported the founding of the Center for Austrian Studies at the University of Minnesota in Minneapolis and the Austrian Chair at Stanford University in California. These foundations were the initial incentives for the worldwide 'spreading' of similar institutions; currently, nine Centers for Austrian and Central European Studies exist in seven countries on three continents. The funding of the Ministry enables to connect senior scholars with young scholars, to help young PhD students, to participate in and to benefit from the scientific connection of experienced researchers, and to get in touch with the national scientific community by 'sniffing scientific air', as the Austrians like to say. Furthermore, it aims to avoid prejudices, and to spread a better understanding and knowledge about Austria and Central Europe by promoting scientific exchange.

A Mindful Divorce Armando Cecatiello, 2018-10-03 The end of a relationship is always a difficult moment that inevitably brings suffering to the former partners, children and all the people close to the couple in crisis. If we add resentment, desire for revenge and anger, the mix can become explosive and make life impossible for everyone. If we view crisis and divorce as

a possibility to begin a new life, we can solve the problems in a different and constructive manner, and often even make life better. This book is meant for married or unmarried couples involved in a family crisis and who seek a successful method to find shared and lasting solutions to their problems, considering the interests of all parties involved. It is also geared for professionals wanting a full picture of the Collaborative Process: lawyers, psychologists, social workers and all those who deal with conflict in general and family crisis in particular. They will find in Collaborative Process an innovative, non-judicial method to solve a conflict. There is no battle to win: true victory is finding shared solutions together that benefit all, children included. Armando Cecatiello, Divorce Lawyer, Mediator and Writer, has handled divorce cases both in the courtroom and outside of the judicial system for over 20 years. Specialized in Collaborative Process as well as a trainer in this innovative method, he has vast experience in all matters of family law where he employs a conscious and sustainable approach.

Religion, Law and the Politics of Ethical Diversity Claude Proeschel, David Koussens, Francesco Piraino, 2021-03-31 This book provides a multidisciplinary and comparative look at the contemporary phenomenon of conscientious objection or contestation in the name of religion and examines the key issues that emerge in terms of citizenship and democracy. These are analysed by looking at the different ways of challenging or contesting a legal obligation on the grounds of religious beliefs and convictions. The authors focus on the meaning of conscientious objection which asserts the legitimacy of convictions - in particular religious convictions - in determining the personal or collective relevance of the law and of public action. The book begins by examining the main theoretical issues underlying conscientious objection, exploring the implications of the protection of freedom of conscience, the place of religion in the secular public sphere and the recognition and respect of ethical pluralism in society. It then focuses on the question of exemptions and contestations of civil norms, using a multidisciplinary approach to highlight the multiple and diverse issues surrounding them, as well as the motives behind them. This book will be of great interest to scholars, specialists and graduate and advanced undergraduate students who are interested in issues of religious diversity. Researchers and policymakers in think-tanks, NGOs and government units will find the volume useful in identifying key issues in understanding the phenomenon of conscientious objection and its implications in managing ethical diversity in contemporary societies.

Advances in Design and Digital Communication Nuno Martins, Daniel Brandão, 2020-10-22 This book reports on research findings and practical lessons featuring advances in: digital and interaction design; graphic design and branding; design strategies and methodologies; design education; society and communication in design practice; and other related areas. Gathering the proceedings of the 4th International Conference on Digital Design and Communication, Digicom 2020, held virtually on November 5-6, 2020, the book describes cutting-edge perspectives on and analysis of and solutions to challenges digital communication is currently presenting to society, institutions and brands. It offers a timely guide and a source of inspiration for designers of all kinds, including graphic, digital and web designers, UI, UX and social media

designers, and to researchers, advertisers, artists, and entrepreneurs, as well as brand or corporate communication managers.

The International Distribution Agreement Marco Mastracci, 2020-11-01 With the ever-increasing interconnection between markets, businesses and individuals from all over the globe, professionals are asked to develop a greater interest in the international implications of contracts. This book focuses attention on the distribution agreement, one of the most widely used contractual schemes in the practice of international exchanges, providing a analysis and information on the issues that should be considered by the practitioner when drafting, interpreting or executing an international agreement. Issues relating to the choice of the governing law, the competent court, the validity or invalidity of some clauses, the impact that the language of the contract may have, as well as the different meaning and scope of application of some principles, such as good faith and le estoppel, are analyzed from a transnational perspective, highlighting how the same issue can be regulated differently depending on the regulatory framework that governs it. In this second edition, the distribution relationship has been evaluated mainly across the legal systems of the European Union, the United States and Latin America, while not missing references to other regulatory frameworks, which are highlighted in correspondence with particular issues.

As recognized, adventure as skillfully as experience just about lesson, amusement, as well as contract can be gotten by just checking out a books **Milano 2016** along with it is not directly done, you could admit even more concerning this life, on the order of the world.
