Mesurer le bien-être régional et local pour les politiques publiques OECD,2014-11-13 Ce rapport dresse un tableau complet du bien-être dans 362 régions de l'OCDE à travers un examen des aspects les plus importants qui déterminent la vie des personnes : l'emploi, le revenu, le logement, la santé, l'accès aux services, l'environnement, la sécurité et l'engagement civique.

Manuale dell'anticorruzione e della trasparenza Claudio Contessa,Alessio Ubaldi,2021-12-10T10:39:00+01:00 L'Opera - indirizzata a RPCT, studenti di master universitari e professionisti - si ripropone di analizzare la copiosa produzione normativa, nazionale e sovranazionale, in tema di prevenzione della corruzione e trasparenza amministrativa, ripercorrendo il fitto tracciato di prassi e giurisprudenza, secondo un approccio dogmatico e, al tempo stesso, immediatamente operativo. L'Opera è suddivisa in quattro Sezioni: la prima affronta l'impianto complessivo della legge n. 190/2012, esaminato da una pluralità di angoli visuali. La seconda offre una ricognizione - sistematica e schematica - delle principali indicazioni metodologiche fornite dall'Autorità, organizzata per specifici ambiti e processi operativi. La terza è dedicata al tema della trasparenza amministrativa, proattiva e reattiva. L'ultima Sezione si concentra sui versanti della vigilanza, delle sanzioni e delle responsabilità connesse al mancato rispetto della disciplina in analisi. Merita sottolineare che la scelta di individuare gli Autori e i Curatori fra ambiti assai diversi (l'Accademia, le Magistrature, l'Amministrazione, l'Avvocatura) conferisce all'Opera stessa una straordinaria ricchezza di prospettive.

Electronic Government and the Information Systems Perspective Andrea Kó,Enrico Francesconi,2016-08-06 This book constitutes the refereed proceedings of the 5th International Conference on Electronic Government and the Information Systems Perspective, EGOVIS 2016, held in Porto, Portugal, in September 2016, in conjunction with DEXA 2015. The 22 revised full papers presented together with three invited talk were carefully reviewed and selected from 27 submissions. The papers are organized in the following topical sections: e-government cases - legal issues; e-government cases - technical issues; open data and transparency; knowledge representation and modeling in e-government; intelligent systems in e-government; e-government research and intelligent systems; e-government data and knowledge management; identity management in e-government.

Governance Indicators Helmut K. Anheier,Matthias Haber,Mark A. Kayser,2018 As difficult as it might seem to define governance, it appears to be that much more difficult to measure it. Since the World Bank Institute launched the Worldwide Governance Indicators in the late 1990s, the governance indicators field has flourished and experienced significant advances in terms of methodology, data coverage and quality, and policy relevance. Other major initiatives have added to a momentum

that propelled research on governance indicators seen in few other academic fields in the economic and social sciences. Given these developments and the prominence and policy relevance the field of governance indicator research has achieved, the time is ripe to take stock and ask what has been accomplished, what the shortcomings and potentials might be, and what steps present themselves as a way forward. This volume-- the fifth edition in an annual series tackling different aspects of governance around the world-- assesses what has been achieved, identifies strengths and weaknesses of current work, and points to issues that need to be tackled in order to advance the field, both in its academic importance as well as in its policy relevance. In short, the contributions to this volume explore the scope of existing governance indices and indicator frameworks, elaborate on current challenges in measuring and analysing governance, and consider how to overcome them.

Mistrust: Why Losing Faith in Institutions Provides the Tools to Transform Them Ethan Zuckerman, 2021-01-19 The rise of mistrust is provoking a crisis for representative democracy—solutions lie in the endless creativity of social movements. From the Tea Party to Occupy Wall Street, and from cryptocurrency advocates to the #MeToo movement, Americans and citizens of democracies worldwide are losing confidence in what we once called the system. This loss of faith has spread beyond government to infect a broad swath of institutions—the press, corporations, digital platforms—none of which seem capable of holding us together. The dominant theme of contemporary civic life is mistrust in institutions—governments, big business, the health care system, the press. How should we encourage participation in public life when neither elections nor protests feel like paths to change? Drawing on work by political scientists, legal theorists, and activists in the streets, Ethan Zuckerman offers a lens for understanding civic engagement that focuses on efficacy, the power of seeing the change you make in the world. Mistrust introduces a set of levers—law, markets, code, and norms—that all provide ways to move the world. Zuckerman helps readers understand what relationships they want to have with existing institutions—Do they want to hold them responsible and make them better? Overthrow them and replace them with something entirely new? While some contemporary leaders weaponize mistrust to gain power, activists can use their mistrust to fuel something else. Today, many people are passionate about making positive change in the world, but they feel like the right ways to make change are disempowering and useless. Zuckerman argues that while it may be reasonable to dispense with politics as usual, we must not give up on changing the world. Often the best way to make that change is not to pass laws—it's to change minds. Mistrust is a guidebook for those looking for new ways to participate in civic life, as well as a fascinating explanation of how we've arrived at a moment where old ways of engagement are failing us.

[International E-Government Development](#) Laura Alcaide Muñoz, Manuel Pedro Rodríguez Bolívar, 2017-11-08 This book provides an examination of e-Government frameworks and maturity stages in governments around the world, including an overview of the legal frameworks that have supported them. Divided into three sections, the first part of this book analyses the theoretical context of current policies, codes of best practice and their implementation. The second section presents case

studies which bring key issues to the fore including open government, privacy protection, social media, democracy, systems failures, innovations in inter-organizational e-government projects, and open data systems. The authors demonstrate the importance of the successful implementation of e-Government for improving managerial efficiency, public service delivery and citizen engagement, with special attention given to developing countries. The book concludes by drawing out the lessons learned from the latest research and recommending solutions for improving the implementation of e-Government in the future, thereby helping to achieve more transparent, participative and democratic societies. This book will provide an invaluable resource for researchers, policy-makers, public managers, international organizations and technical experts.

Socialtotalitarismo SILVIO MARESCA ,2021-08-03 Gli enormi e dispotici monopoli privati che dominano la scena digitale, in primis Facebook e Google, hanno acquisito una dimensione, un potere, una pervasività, una tale disponibilità di informazioni personali su miliardi di utenti da delineare un vero e proprio neo-totalitarismo. Nel "Socialtotalitarismo", le piattaforme online chiudono la visuale di ciascuno sui saperi, sulle ideologie, sul branco che meglio si conformano alle sue preferenze e pregiudizi, producendo tribalizzazione, radicalizzazione, sfaldamento di ogni "verità", razionalità e coesione sociale. Se l'Occidente si destasse dal sonno della ragione democratica che ha portato a questa rapidissima conquista del mondo da parte di una manciata di padroni privati potrebbe esplorare delle vie d'uscita: una nuova e vigorosa politica antitrust; il divieto di raccolta e trattamento di informazioni personali che non siano espressamente fornite dall'utente; il riconoscimento della natura di bene comune del web e delle sue principali infrastrutture e funzioni; l'imposizione di un "design etico" delle piattaforme online, che vieti ogni manipolazione, induzione di dipendenza, e moderi i "contagi emotivi". Il Digital Act, in discussione nella UE, è un'epocale salto di qualità nei tentativi di regolare democraticamente il capitalismo digitale. Ma è debole la decisione UE di non contrastare il diritto alla raccolta e trattamento di illimitate informazioni personali, e la rinuncia all'introduzione di limiti antitrust forti.

The State of Open Data Davies, Tim,Walker, Stephen B.,Rubinstein, Mor,2019-05-22 It's been ten years since open data first broke onto the global stage. Over the past decade, thousands of programmes and projects around the world have worked to open data and use it to address a myriad of social and economic challenges. Meanwhile, issues related to data

rights and privacy have moved to the centre of public and political discourse. As the open data movement enters a new phase in its evolution, shifting to target real-world problems and embed open data thinking into other existing or emerging communities of practice, big questions still remain. How will open data initiatives respond to new concerns about privacy, inclusion, and artificial intelligence? And what can we learn from the last decade in order to deliver impact where it is most needed? The State of Open Data brings together over 60 authors from around the world to address these questions and to take stock of the real progress made to date across sectors and around the world, uncovering the issues that will shape the future of open data in the years to come.

Cyber Law in Italy Giovanni Ziccardi, 2020-01-14 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical guide to cyber law - the law affecting information and communication technology (ICT) - in Italy covers every aspect of the subject, including intellectual property rights in the ICT sector, relevant competition rules, drafting and negotiating ICT-related contracts, electronic transactions, privacy issues, and computer crime. Lawyers who handle transnational matters will appreciate the detailed explanation of specific characteristics of practice and procedure. Following a general introduction, the book assembles its information and guidance in seven main areas of practice: the regulatory framework of the electronic communications market; software protection, legal protection of databases or chips, and other intellectual property matters; contracts with regard to software licensing and network services, with special attention to case law in this area; rules with regard to electronic evidence, regulation of electronic signatures, electronic banking, and electronic commerce; specific laws and regulations with respect to the liability of network operators and service providers and related product liability; protection of individual persons in the context of the processing of personal data and confidentiality; and the application of substantive criminal law in the area of ICT. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Italy will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative law in this relatively new and challenging field.

Data Cultures in Higher Education Juliana E. Raffaghelli, Albert Sangrà, 2023-03-07 This collection focuses on the role of higher education institutions concerning datafication as a complex phenomenon. It explores how the universities can develop data literac(ies) shaping tomorrow skills and “formae mentis” to face the most deleterious effects of datafication, but also to engage in creative and constructive ways with data. Notably, the book spots data practices within the two most relevant sides of academics’ professional practice, namely, research and teaching. Hence, the collection seeks to reflect on faculty’s

professional learning about data infrastructures and practices. The book draws on a range of studies covering the higher education response to the several facets of data in society, from data surveillance and the algorithmic control of human behaviour to empowerment through the use of open data. The research reported ranges from literature overviews to multi-case and in-depth case studies illustrating institutional and educational responses to different problems connected to data. The ultimate intention is to provide conceptual bases and practical examples relating to universities' faculty development policies to overcome data practices and discourses' fragmentation and contradictions: in a nutshell, to build "fair data cultures" in higher education.
