The Social Dynamics of Open Data Francois van Schalkwyk, G Verhulst, 2017-12-17 The Social Dynamics of Open Data is a collection of peer reviewed papers presented at the 2nd Open Data Research Symposium (ODRS) held in Madrid, Spain, on 5 October 2016. Research is critical to developing a more rigorous and fine-combed analysis not only of why open data is valuable, but how it is valuable and under what specific conditions. The objective of the Open Data Research Symposium and the subsequent collection of chapters published here is to build such a stronger evidence base. This base is essential to understanding what open data's impacts have been to date, and how positive impacts can be enabled and amplified. Consequently, common to the majority of chapters in this collection is the attempt by the authors to draw on existing scientific theories, and to apply them to open data to better explain the socially embedded dynamics that account for open data's successes and failures in contributing to a more equitable and just society.

Computational Science and Its Applications - ICCSA 2023 Workshops Osvaldo Gervasi, Beniamino Murgante, Ana Maria A. C. Rocha, Chiara Garau, Francesco Scorza, Yeliz Karaca, Carmelo M. Torre, 2023-06-28 This nine-volume set LNCS 14104 - 14112 constitutes the refereed workshop proceedings of the 23rd International Conference on Computational

Science and Its Applications, ICCSA 2023, held at Athens, Greece, during July 3-6, 2023. The 350 full papers and 29 short papers and 2 PHD showcase papers included in this volume were carefully reviewed and selected from a total of 876 submissions. These nine-volumes includes the proceedings of the following workshops: Advances in Artificial Intelligence Learning Technologies: Blended Learning, STEM, Computational Thinking and Coding (AAILT 2023); Advanced Processes of Mathematics and Computing Models in Complex Computational Systems (ACMC 2023); Artificial Intelligence supported Medical data examination (AIM 2023); Advanced and Innovative web Apps (AIWA 2023); Assessing Urban Sustainability (ASUS 2023); Advanced Data Science Techniques with applications in Industry and Environmental Sustainability (ATELIERS 2023); Advances in Web Based Learning (AWBL 2023); Blockchain and Distributed Ledgers: Technologies and Applications (BDLTA 2023); Bio and Neuro inspired Computing and Applications (BIONCA 2023); Choices and Actions for Human Scale Cities: Decision Support Systems (CAHSC-DSS 2023); and Computational and Applied Mathematics (CAM 2023).

New Metropolitan Perspectives Francesco Calabrò, Lucia Della Spina, María José Piñeira Mantiñán, 2022-08-24 The book aims to face the challenge of post-COVID-19 dynamics toward green and digital transition, between metropolitan and return to villages' perspectives. It presents a multi-disciplinary scientific debate on the new frontiers of strategic and spatial planning, economic programs and decision support tools, within the urban-rural areas networks and the metropolitan cities. The book focuses on six topics: inner and marginalized areas local development to re-balance territorial inequalities; knowledge and innovation ecosystem for urban regeneration and resilience; metropolitan cities and territorial dynamics; rules, governance, economy, society; green buildings, post-carbon city and ecosystem services; infrastructures and spatial information systems; cultural heritage: conservation, enhancement and management. In addition, the book hosts a Special Section: Rhegion United Nations 2020-2030. The book will benefit all researchers, practitioners and policymakers interested in the issues applied to metropolitan cities and marginal areas.

Digital Media and Grassroots Anti-Corruption Alice Mattoni, 2024-05-02 Delving into a burgeoning field of research, this enlightening book utilises case studies from across the globe to explore how digital media is used at the grassroots level to combat corruption. Bringing together an impressive range of experts, Alice Mattoni deftly assesses the design, creation and use of a wide range of anti-corruption technologies.

Il fenomeno open data Collectif, 2017-03-07 Nell'affascinante mondo della cultura open, dopo software open source, standard aperti, open access e open content, il fenomeno dei dati aperti rappresenta l'ultima frontiera e forse anche quella attualmente più strategica. Alla fine degli anni 2000 si è infatti aperto il dibattito sull'importanza della disponibilità e libera diffusione di dati "crudi" (anche e soprattutto da parte del settore pubblico) così da poter aumentare il potenziale informativo e comunicativo della conoscenza condivisa figlia della rivoluzione digitale. Ci si è presto accorti che la possibilità di raccogliere, gestire e riutilizzare quantità di dati sempre maggiori e sempre più dense di correlazioni porta la necessità di

alcune riflessioni di carattere sia giuridico che tecnologico. In questo libro, in ottica divulgativa, si cerca di presentare le principali questioni emergenti, tracciando un quadro normativo completo e fornendo alcune essenziali linee guida.

La pubblica amministrazione digitale. Appunti per gli operatori della P.A. Mario Canton,2017-07-07 Ho iniziato a scrivere questo libro seguendo un corso di aggiornamento lavorativo sulla digitalizzazione nella Pubblica Amministrazione durante il quale ho cercato pervicacemente di dare un senso al profluvio di normativa dalla quale sono stati «investiti» gli operatori per attuare la tanto decantata «rivoluzione digitale» nella P.A. Così, per sintetizzare questa esperienza formativa e per venire incontro alle esigenze di altri nella medesima situazione, ho pensato di scrivere - mettendoli in ordine - questi appunti, che certamente non saranno fondamentali da un punto di vista operativo, ma spero che lo siano almeno da un punto di vista concettuale. Facendosi un'idea della problematica, potrebbe aumentare la fiducia in sé stessi e nella propria capacità di cambiare - lentamente e faticosamente - le situazioni in essere e potrebbe anche diminuire il senso di isolamento e di scoraggiamento a fronte di risorse sempre limitate. Questi gli argomenti trattati: - la digitalizzazione nella P.A.; - la transizione dal cartaceo; - la documentazione; - i problemi di sicurezza; - la riusabilità; - il concetto di documento (cartaceo e informatico); - il protocollo informatico; - la protezione dei dati personali; - l'archivio (cartaceo e digitale); - il documento informatico sin dall'origine; - i flussi documentali e la loro analisi; - l'identità digitale; - la posta elettronica certificata; - gli amministratori di sistema; - il piano triennale di informatizzazione della P.A.; - una esperienza pratica di attuazione; - una appendice contenente il testo integrale del Codice dell'Amministrazione Digitale (nella sua ultima versione) e delle Regole Tecniche dell'AgID.

Essays on the Economic Consequences of Mandatory IFRS Reporting around the world Ulf

Brüggemann,2011-08-31 Ulf Brüggemann discusses and empirically investigates the economic consequences of mandatory switch to IFRS. He provides evidence that cross-border investments by individual investors increased following the introduction of IFRS.

La pubblica amministrazione digitale 2 Mario Canton,2018-07-07 Trascorso un anno dalla pubblicazione della prima edizione di «La pubblica amministrazione digitale» sono state introdotte talmente tante novità da necessitare un «aggiornamento» di quegli appunti per gli operatori della P.A. per passare in rassegna le «novità» e analizzare lo «stato di fatto» del processo di digitalizzazione nazionale. La più grande fra le novità è senza dubbio l'entrata in vigore a gennaio 2018 del nuovo Codice dell'Amministrazione Digitale (c.d. CAD 4.0). In questa edizione non vengono riportati tutti i contenuti della prima edizione, che rimangono indispensabili premesse sui concetti di base coinvolti nella «digitalizzazione della P.A.» e a cui si rimanda per ogni utile approfondimento. Qui vengono passati in rassegna concetti e azioni che risultano premesse indispensabili per l'aderenza al nuovo CAD e al Piano Triennale dell'Informatizzazione della P.A.

Handbook of Accounting and Public Governance Giuseppe Grossi,Jarmo Vakkuri,2024-02-12 Expertly navigating the

complex relationships between accounting and the development of hybridized public governance, this erudite Handbook critically analyses the most pressing challenges and limitations currently facing accounting and public governance research. Comprehensively drawing intricate links between accounting, public governance and hybridization, it conceptualizes the role of accounting by looking at the current and prospective needs of hybridized public governance.

Implementing Integrated Reporting Cristiana Bernardi, 2020-02-29 Sustainability, the environment, corporate accountability, social justice, integration – these are the buzzwords of our century. This book takes readers on a journey through the landscape of standard-setting giants and corporate reporting paradigms through the eyes of two companies that have taken very different paths toward integrated thinking. Both stories provide new insights into the transition to integrated reporting, as envisaged by the International Integrated Reporting Council (IIRC), and how integrated reporting is reshaping our views on transparency. However, the top-down approach adopted in studies of integrated reporting in practice has left many questions unanswered: Is it effective? How does it evolve into established practice? Is it just another management fad? This bottom-up critique answers all these questions and one more: Could integrated reporting become the corporate reporting norm? We shall see. Given its depth of coverage, the book appeals to IIRC academic community, participants in integrated reporting networks, and others interested in integrated reporting.

Hybrid Economic-Environmental Accounts Valeria Costantini, Massimiliano Mazzanti, Anna Montini, 2013-03-07 National Accounting Matrices of Environmental Accounts (NAMEA) tables are used to analyze a range of environmental pressures and economic data resulting from consumption and production patterns – helping us gain a far better notion of the consequences of individuals', households' and firms' actions for the world we live in. This book deals with the increasingly complex issues of hybrid environmental and economic accounts. The perspective of environmental accounting for the analysis of the relationships between the economic and environmental systems, especially regarding the satellite accounts like NAMEA, is relatively recent, and partly derives from the conceptual and applied deficits that have emerged during the setting up of green GDP or GNP measures as alternative measures of accounting. NAMEA provides a comprehensive and integrated picture of the economic system in association with the environmental system (physical pressures such as emissions) by a sector classification. This book is an integrated collection of complementary papers that revolve around the issue of environment-economic accounting. In the first part a historical background and empirical issues related to the NAMEA-type table definitions and estimations open the book, followed by some applications and analyses mainly applied to a sub-national level. The second part opens the window to international case studies for different EU countries and studies with methodological insights. These policy-oriented, original works are primarily from an applied perspective, although theoretical aspects are also fully developed. The book should be of use to Environmental and Ecological economics students and researchers, as well as those studying the more general field of Environment studies.

Fundraising e comunicazione per la politica Raffaele Picilli, Marina Ripoli, 2017-07-21T00:00:00+02:00 Oggi più che mai la politica italiana ha bisogno di riacquistare credibilità parlando il linguaggio della trasparenza, non solo nella costruzione del consenso, ma anche nella raccolta delle risorse finanziarie utili a sostenere un progetto politico. Il fundraising, non la semplice ricerca di fondi, rappresenta uno strumento pressoché nuovo per la politica italiana che, aggregando e coinvolgendo sostenitori, garantendo la fidelizzazione dei donatori/elettori, permette a partiti e movimenti politici di contare su basi solide e su un radicamento reale nella società. La comunicazione è un tassello fondamentale di questo processo. Comunicare la politica in modo coerente, trasparente, credibile può contribuire a ricostruire quel patto fiduciario oramai debole e svilito alla base della nostra democrazia, ed è questa la condizione necessaria affinché il fundraising possa diffondersi ed avere successo. Partendo dunque dal modello statunitense di Obama, gli autori descrivono le tecniche e i principi del fundraising politico. Tornando poi allo scenario italiano, ripercorrono l'evoluzione storica della disciplina normativa sul finanziamento pubblico ai partiti e analizzano le strategie di raccolta fondi attualmente utilizzate in Italia. Arricchisce il volume un'indagine qualitativa tra esponenti politici, accademici e professionisti della comunicazione politica sullo stato dell'arte e le prospettive del fundraising nel nostro Paese.

Il volume offre un ampio quadro rappresentativo dei nuovi scenari culturali, sociali ed economici che il Covid ha determinato durante l'anno appena trascorso e attraverso saggi e approfondimenti, come sempre accompagnati e supportati da dati certi e aggiornati, affronta gli aspetti legati all'attualità e alle problematiche emerse con forza nella fase congiunturale, spingendo però la riflessione anche alle strategie che dovranno guidare la nuova, impegnativa stagione di ripartenza che si prospetta per il settore culturale e per il Paese tutto. Nello scenario scosso dalla grave crisi pandemica che ci ha colpito e che è ancora presente ad ogni livello nella nostra quotidianità, è fondamentale disegnare e ricostruire un orizzonte di speranza e di sviluppo. Una delle chiavi per la fase di ripresa che si apre sarà la capacità di valorizzare in maniera innovativa il nostro patrimonio culturale e tutta l'economia legata alla creatività e alla bellezza. Network, Smart and Open Rita Lamboglia, Andrea Cardoni, Renata Paola Dameri, Daniela Mancini, 2018-02-04 This book presents a collection of original research papers addressing the relationship between information systems (IS) and innovation. "Open", "Smart" and "Network" are three keywords that are currently guiding information systems (IS) innovation, enhancing IS potentialities and their ability to support decision-making processes. The book discusses the relevance of these three new concepts in connection with technological and organizational innovations (i.e. cloud, smart technologies and networking), and the role they play in the development of accounting and management information systems. The book's primary aim is to investigate how these innovations could influence information systems (with a particular focus on accounting and management information systems) by enhancing their information potentialities and improving accounting methodologies, performance measurement systems, data management, information systems architectures, and external and internal reporting. The book is based on a selection of the best papers—original double-blind reviewed contributions—presented at the 2016 Annual Conference of the Italian Chapter of the Association for Information Systems (AIS).

Modulo Enti Locali - Bilanci Gestione Controllo Servizi Antonino Borghi, Piero Criso, Giuseppe Farneti, 2012-06-19 Il volume fornisce una chiave d'accesso alla complessa gestione dell'ente locale, in relazione a macro-settori di attività di massima importanza quali: - Bilancio - Gestione finanziaria - Programmazione e controllo - Revisione - Valutazione del personale e dei dirigenti - Forme di gestione dei servizi pubblici locali. L'edizione 2012 si caratterizza per un'ampia rivisitazione delle parti relative alla gestione dei servizi pubblici locali tramite organismi partecipati, oltre al consueto aggiornamento dei contenuti alla luce delle disposizioni della manovra finanziaria 2012, e i vari decreti e di altri interventi legislativi in materia emanati fino al 26 aprile 2012, tenendo conto anche dei più significativi orientamenti ministeriali e pronunce giurisprudenziali. I saggi e le analisi statistiche presenti nel volume disegnano un quadro ricco e approfondito di ciò che accade nei territori, nella società, sul fronte delle politiche pubbliche e sul versante dell'impresa culturale, di chi, cioè, produce cultura in Italia. La lettura dello scenario che emerge ci dice che occorrono impetuose politiche di incremento del consumo culturale, che cerchino di mobilitare più risorse possibili, sia di tipo pubblico sia di provenienza privata. I temi in agenda, che il Rapporto mette in evidenza, sono molti: dare seguito alla normativa speciale per le imprese culturali e creative, una risorsa decisiva anche per l'economia del Paese; continuare nelle politiche di incentivo alla programmazione; defiscalizzare i consumi culturali; ampliare il raggio di azione di Art bonus e di App18; incrementare gli investimenti in cultura per la conservazione e per la produzione culturale. La crescita dell'Italia passa anche attraverso la cultura. E attraverso la cultura possiamo dare un contributo complessivo al miglioramento dell'Italia, alla sua reputazione internazionale, alla sua consapevolezza di Paese ricco di storia e di un patrimonio culturale fra i primi al mondo, all'accompagnamento di processi economici di grande rilevanza. Tutto questo non può essere fatto con una sola legge di bilancio. Occorrono programmazione, convinzione, continuità.
