*ProPublica* Michel Anteby, Philippe Bertreau, Charlotte Newman, 2012 Stephen Engelberg, ProPublica's managing editor, entered the organization's newsroom located in lower Manhattan on September 16, 2008. He knew a historical financial debacle was happening at his doorstep yet that none of his journalists were covering that beat. It would take much effort to get up to speed on the story. Uncovering what caused the recent turmoil in financial markets and Lehman's failure would require skills, knowledge of financial services, and connections within the industry. ProPublica had been created only a year earlier as an independent, non-profit newsroom focused on investigative journalism. It was now fully staffed with close to 30 members, including journalists who had joined partly because of the promise of editorial latitude they were offered. As Engelberg weighed his various options, he knew all the major U.S. newsrooms were heading full speed to allocate resources covering the developing debacle. ProPublica needed to live up to the public's expectations. Should he assign the story to one of his journalists and, if so, whom? Alternatively should he hire new talent? In that case who would be a good fit? Moreover, how might this impact ProPublica's model and culture? Learning Objective: How to motivate employees? How to create institutional change? How to manage professionals?

**Richard Tofel**, 2017 Richard Tofel was the founding general manager of ProPublica from 2007-2012, and became president on January 1, 2013. At ProPublica, he has responsibility for all non-journalism operations, including communications, legal, development, finance and budgeting, and human resources. Before ProPublica, he was assistant publisher of The Wall Street Journal and, earlier, an assistant managing editor of the paper, vice president, corporate communications for Dow Jones & Company, and an assistant general counsel of Dow Jones. In this interview, Tofel discusses the following topics: the initial idea for a non-profit investigative reporting organization; the creation and building of ProPublica; early successes of ProPublica; defining impact for ProPublica and investigative journalism overall; working with foundations to measure impact; building a secure funding future for ProPublica.

**The ProPublica Model** Brent Gardner-Smith, Charles N. Davis, University of Missouri--Columbia. School of Journalism, 2011 This journalism master's project includes a professional work component and an analysis component. The professional work component details the author's experiences working as an intern at ProPublica Investigative Reporting. Includes field notes and examples of work. In the analysis component the author examines the inner workings of ProPublica

through interviews with Richard Tofel, general manager and Eric Umansky, senior editor, plus excerpts from a podcast with Stephen Engleberg, managing editor. Includes a literature review, transcripts of interviews and podcast excerpts, and an analysis article entitled: Journey to Aspen Journalism.

**The Grifter's Club** Sarah Blaskey, Caitlin Ostroff, Nicholas Nehamas, Jay Weaver, 2020-08-04 'Many of the world's great leaders request to come to Mar-a-Lago in Palm Beach. They like it. I like it. We're comfortable.' - Donald Trump A bit too comfortable, perhaps. Donald Trump's opulent Palm Beach club Mar-a-Lago has thrummed with scandal since the earliest days of his presidency. Long known for its famous and wealthy clientele, the resort's guest list soon started filling with political operatives and power-seekers. Meanwhile, as Trump re-branded Mar-a-Lago the Winter White House and began spending weekends there, state business spilled out into full view of the club's members, and vast sums of taxpayer money and political donations began flowing into its coffers, and into the pockets of the president. The Grifters' Club is a breakthrough account of the corruption, intrigue, and absurdity that has been on display in the place where the president is at his most relaxed. In these pages, a team of prizewinning Miami Herald journalists reveal the activities and motivations of the strange array of charlatans and tycoons who populate its halls. Some peddle influence, some look to steal government secrets, and some just want to soak up the feeling of unfettered access to the world's most powerful leaders. With the drama of an expose and the edgy humor of a Carl Hiaasen novel, *The Grifters' Club* takes you behind the velvet ropes of this exclusive club and into its bizarre world of extravagance and scandal. \_\_\_\_ An astonishing look inside the gilded gates of Mar-a-Lago, the palatial resort where President Trump conducts government business with little regard for ethics, security, or even the law. This ground-breaking and shocking expose reads like a thriller. Perfect for fans of *Fire and Fury*, *Team of Vipers* and *Fear*.

**The Art of Insight** Alberto Cairo, 2023-11-15 Learn how expert data visualization designers reason about their craft In *The Art of Insight: How Great Visualization Designers Think*, renowned visualization designer and educator Alberto Cairo, in conversation with several leaders in the field, delivers an inspiring exploration of how they make design choices. The book is a celebration of visualization, and a personal journey that dives into subjects like: How the professional background and life experiences of every designer shape their choices of what to visualize and how to visualize it. What designers from different countries and cultures, and working in different fields, such as data art, data analytics, or data journalism, have in common, or how they differ from each other. How designers reflect on research, ethical reasoning, and also aesthetic judgments, to make decisions such as selecting the most appropriate ways to encode data, or the most appealing visual style. Perfect for data scientists and data journalists, *The Art of Insight* will also inspire artists, analysts, statisticians, and any other professional who uses data visualizations.

[Dignity Not Debt](#) Chrystin Ondersma, 2024-04-09 An earth-shaking reimagining of household debt that opens up a new

path to financial security for all Americans. American households have a debt problem. The problem is not, as often claimed, that Americans recklessly take on too much debt. The problem is that US debt policies have no basis in reality. Weaving together the histories and trends of US debt policy with her own family story, Chrystin Ondersma debunks the myths that have long governed debt policy, like the belief that debt leads to prosperity or the claim that bad debt is the result of bad choices, both of which nest in the overarching myth of a free market unhindered by government interference and accessible to all. In place of these stale narratives, Ondersma offers a compelling, flexible, and reality-based taxonomy rooted in the internationally recognized principle of human dignity. Ondersma's new categories of debt—grounded in abolitionist principles—revolutionize how policymakers are able to think about debt, which will in turn revolutionize the American debt landscape itself.

*Producing Online News* Ryan Thornburg, 2010-10-27 Buy your copy now and pay only \$5 for shipping!\* (Use code C9BRGG when checking out. Applies only to orders in the US/Canada.) Follow the author's blog at <http://www.producingonlinenews.com>! The dazzling speed of change in online journalism can mask a simple truth: online news is still news. Cutting-edge technology benefits the audience only when journalists apply it in the service of good stories. Building on a foundation of news stories, *Producing Online News* shows students how to use the right tools to get the right information to the right people at the right time. The goal is to become a full-fledged online news producer and transform stories into a complete news experience for an ever more demanding audience. Ryan Thornburg, a journalism trainer who has managed the websites of top news organizations, hones the skills students need to produce stories using multimedia, interactivity and on-demand delivery- online journalism's three pillars. Practical instructions show students not just how to use the tools but also how to make good journalistic choices in applying them. The book works for courses specifically in online journalism or for any journalism course that incorporates multiple platforms. Features that make for stronger stories: TOOLS sections walk students through the latest technology- Twitter, Wordpress, Audacity, Caspio, Dipity and more- so their writing gains more immediacy and impact. Real-world examples from both traditional outlets and new-style sites like ProPublica, PolitiFact, BeliefNet and Global Voices showcase journalists connecting with their audiences. View Source boxes uncover the technology behind a specific news project-for example, how do just five editors at Yahoo News publish 2,000 stories a day? News Judgement boxes explore journalistic choices- sure, students can link a story to anything on the web- but should they?

*Ethical Journalism* Joe Mathewson, 2021-08-30 This book makes the case for the news media to take the lead in combatting key threats to American society including racial injustice, economic disparity, and climate change by adopting an ethics of care in reporting practices. Examining how traditional news coverage of race, economics and climate change has been dedicated to straightforward facts, the author asserts that journalism should now respond to societal needs by adopting

a moral philosophy of the ethics of care, opening the door to empathetic yet factual and fair coverage of news events, with a goal to move public opinion to the point that politicians are persuaded to take effective action. The book charts a clear path for how this style of ethics can be applied by today's journalists, tracing the emergence of this empathy-based ethics from feminist philosophy in the 1980s. It ultimately urges ethical news organizations to adopt the ethics of care, based on the human emotion prioritized by Scottish Enlightenment philosopher David Hume, and to pursue a more pro-active, solutions-seeking coverage of current events. This is an invaluable text for students and academics in the fields of journalism ethics, media ethics and media law, as well as for media professionals looking for a fresh perspective on practicing ethical journalism.

*ProPublica's Data Journalism: How Multidisciplinary Teams and Hybrid Profiles Create Impactful Data Stories* Mathias-Felipe de-Lima-Santos, 2022 Abstract: Despite growing interest in the emergence of technologies in journalistic practices, especially from the production perspective, there is still very little research on organizational structures and professional culture in relation to the deployment of these technologies. Drawing on six interviews and observation in staff meetings, this study aims to explore the nuances behind the professional roles of data journalists and how these relate to structural aspects of news organizations. The study focuses on the case of ProPublica, a news organization internationally renowned for its global excellence in data stories. This work considers boundary-making in the context of journalism and focuses on new professional roles in the news industry to produce a hybrid ethnography study based on qualitative data collected immediately before the Covid-19 pandemic hit the United States. The findings reveal the importance of hybrid profiles at ProPublica. While some journalists have had to expand th

**Controversies in Digital Ethics** Amber Davisson, Paul Booth, 2016-02-25 *Controversies in Digital Ethics* explores ethical frameworks within digital culture. Through a combination of theoretical examination and specific case studies, the essays in this volume provide a vigorous examination of ethics in a highly individualistic and mediated world. Focusing on specific controversies-privacy, surveillance, identity politics, participatory culture-the authors in this volume provide a roadmap for navigating the thorny ethical issues in new media. Paul Booth and Amber Davisson bring together multiple writers working from different theoretical traditions to represent the multiplicity of ethics in the 21st century. Each essay has been chosen to focus on a particular issue in contemporary ethical thinking in order to both facilitate classroom discussion and further scholarship in digital media ethics. Accessible for students, but with a robust analysis providing contemporary scholarship in media ethics, this collection unites theory, case studies, and practice within one volume.

efforts and to best bring about human flourishing and a just world, *Engineering and Philosophy: Reimagining Technology and Progress* brings together practitioners and scholars to inspire deeper conversations on the nature and varieties of engineering. The Future of Drone Use Bart Custers,2016-10-15 Given the popularity of drones and the fact that they are easy and cheap to buy, it is generally expected that the ubiquity of drones will significantly increase within the next few years. This

raises questions as to what is technologically feasible (now and in the future), what is acceptable from an ethical point of view and what is allowed from a legal point of view. Drone technology is to some extent already available and to some extent still in development. The aim and scope of this book is to map the opportunities and threats associated with the use of drones and to discuss the ethical and legal issues of the use of drones. This book provides an overview of current drone technologies and applications and of what to expect in the next few years. The question of how to regulate the use of drones in the future is addressed, by considering conditions and contents of future drone legislation and by analyzing issues surrounding privacy and safeguards that can be taken. As such, this book is valuable to scholars in several disciplines, such as law, ethics, sociology, politics and public administration, as well as to practitioners and others who may be confronted with the use of drones in their work, such as professionals working in the military, law enforcement, disaster management and infrastructure management. Individuals and businesses with a specific interest in drone use may also find in the nineteen contributions contained in this volume unexpected perspectives on this new field of research and innovation. Bart Custers is Associate Professor and Head of Research at eLaw, the Center for Law and Digital Technologies at Leiden University, The Netherlands. He has presented his work at international conferences in the United States, China, Japan, the Middle East and throughout Europe and has published over 80 scientific, professional and popularizing publications, including three books.

Democracy's Detectives James Hamilton, 2016-10-10 Investigative journalism holds democracies and individuals accountable to the public. But important stories are going untold as news outlets shy away from the expense of watchdog reporting. Computational journalism, using digital records and data-mining algorithms, promises to lower the cost and increase demand among readers, James Hamilton shows.

*The Transhumanism Handbook* Newton Lee, 2019-07-03 Modern humanity with some 5,000 years of recorded history has been experiencing growing pains, with no end in sight. It is high time for humanity to grow up and to transcend itself by embracing transhumanism. Transhumanism offers the most inclusive ideology for all ethnicities and races, the religious and the atheists, conservatives and liberals, the young and the old regardless of socioeconomic status, gender identity, or any other individual qualities. This book expounds on contemporary views and practical advice from more than 70 transhumanists. Astronaut Neil Armstrong said on the Apollo 11 moon landing in 1969, "One small step for a man, one giant leap for mankind." Transhumanism is the next logical step in the evolution of humankind, and it is the existential solution to the long-term survival of the human race.
