Rome: Continuing Encounters between Past and Present Dorigen Caldwell,2016-12-05 Few other cities can compare with Rome's history of continuous habitation, nor with the survival of so many different epochs in its present. This volume explores how the city's past has shaped the way in which Rome has been built, rebuilt, represented and imagined throughout its history. Bringing together scholars from the disciplines of architectural history, urban studies, art history, archaeology and film studies, this book comprises a series of studies on the evolution of the city of Rome and the ways in which it has represented and reconfigured itself from the medieval period to the present day. Moving from material appropriations such as spolia in the medieval period, through the cartographic representations of the city in the early modern period, to filmic representation in the twentieth century, we encounter very different ways of making sense of the past across Rome's historical spectrum. The broad chronological arrangement of the chapters, and the choice of themes and urban locations examined in each, allows the reader to draw comparisons between historical periods. An imaginative approach to the study of the urban and architectural make-up of Rome, this volume will be valuable not only for historians of art and architecture, but also for students of cultural history and film studies.

Un Fiume Per Roma Capitale William Todd Courtenay,2003

Ruins of Ancient Rome Roberto Cassanelli,2002 Traditionally a critical component of the education of any architect was to draw the ruins of ancient Rome, reconstructing either from ancient sources or, more often, pure fantasy, what the original structures must have looked like. From this training emerged generations of architects imbued with the aesthetic ideals that would form the Neoclassical and Beaux-Arts building styles. In this magnificently printed volume are reproduced some of the most extraordinarily handsome drawings of the ruins of ancient Rome made by French Prix de Rome architects from 1775 through 1925. Accompanied by text that explains how the Prix de Rome was awarded and the significance of the prize in the history of architecture, as well as how the study of ancient models formed the basis for nineteenth- and early twentieth-century architectural styles, these drawings provide an invaluable understanding of how the modern imagination recorded

and transformed ancient fragments into a modern architectural idiom.

Rome Franco Archibugi, 2004-06 This book describes the crucial role of planning the development of cities and outlines the consequences of not having a development strategy, focusing on the last century of Rome's evolution as an in-depth case study.

Water in the Making of a Socio-Natural Landscape Salvatore Valenti, 2022-09-30 How would the history of an urban area look if water were at the center of analysis? *Water in the Making of a Socio-Natural Landscape* explores the transition from early modern to modern water management in late nineteenth-century Rome. It merges local water management with national water policies aimed at promoting irrigated agriculture, industrial processes, and public health. It investigates perceptions and conceptualisations of water, changes in the water law, engineering projects, medical knowledge and practices, value of water in different productions, and needs and uses of local stakeholders. From which derives that water infrastructures are the complex outcome of the clash between different users and uses of water as well as the dynamic interaction between different levels of power. In this book, it builds upon Maria Kaika's *Cities of flows* and Erik Swyngedouw's *Liquid power* to introduce a new dimension to the analysis of urban water: the interaction among the three main uses of water: drinking, agriculture, and industry. *Water in the Making of a Socio-Natural Landscape* is written for a specialist readership with an interest in environmental and urban history and science and technology studies, but it can also be used by graduate and PhD students.

The Order Has Been Carried Out Alessandro Portelli, 2016-06-01 On March 24, 1944, Nazi occupation forces in Rome killed 335 unarmed civilians in retaliation for a partisan attack the day before. Portelli has crafted an eloquent, multi-voiced oral history of the massacre, of its background and its aftermath. The moving stories of the victims, the women and children who survived and carried on, the partisans who fought the Nazis, and the common people who lived through the tragedies of the war together paint a many-hued portrait of one of the world's most richly historical cities. *The Order Has Been Carried Out* powerfully relates the struggles for freedom under Fascism and Nazism, the battles for memory in post-war democracy, and the meanings of death and grief in modern society.

The Third Rome, 1922-43 Aristotle Kallis, 2014-07-29 What kind of city was the Fascist 'third Rome'? Imagined and real, rooted in the past and announcing a new, 'revolutionary' future, Fascist Rome was imagined both as the ideal city and as the sacred centre of a universal political religion. Kallis explores this through a journey across the sites, monuments, and buildings of the fascist capital.

Cinematic Rome Richard Wrigley, 2008 This collection is based on the papers given at a conference at the University of Nottingham in September 2005. The conference was intended to explore Rome as a site for the making of films, and also its changing role as a setting for cinematic narrative. The resulting collection of essays will contribute to the burgeoning genre of studies on cinema and the city, by focusing on one particularly rich case study both for the nature of the films discussed, and the complexities of the city and its representation. The volume will also reach beyond film studies in so far as the subject draws on and informs other approaches to Rome's cultural history (geography, art history, urban history, classics). The essays address topics ranging from the interwar period to the present. A diverse set of cinematic interactions and interventions are placed within the context of the evolving architectural, social and political fabric of Rome in a period of rapid and often traumatic historical change. Implicit in the conception of the conference was the idea that cinematic representations of the city inherit and rework established habits of visualisation used to produce images of the Eternal city. Three other tropes which constitute key elements in Rome's international reputation can be seen as being embedded in cinematic narratives. Firstly, the trope of transformation - artistic, psychological, spiritual; secondly, the city's reputation as a cosmopolitan crossroad. Thirdly, Rome's status as a locus classicus for the juxtaposition of the ancient and the modern, which was given a new relevance and complexity in films which sought to focus on aspects of contemporary life, be it in the Fascist era, or the extreme contrasts of poverty and international bohemianism of the postwar era.

Perspectives on Public Space in Rome, from Antiquity to the Present Day Jan Gadeyne, 2016-04-22 This volume provides readers interested in urban history with a collection of essays on the evolution of public space in that paradigmatic western city which is Rome. Scholars specialized in different historical periods contributed chapters, in order to find common themes which weave their way through one of the most complex urban histories of western civilization. Divided into five chronological sections (Antiquity, Middle Ages, Renaissance, Baroque, Modern and Contemporary) the volume opens with the

issue of how public space was defined in classical Roman law and how ancient city managers organized the maintenance of these spaces, before moving on to explore how this legacy was redefined and reinterpreted during the Middle Ages. The third group of essays examines how the imposition of papal order on feuding families during the Renaissance helped introduce a new urban plan which could satisfy both functional and symbolic needs. The fourth section shows how modern Rome continued to express strong interest in the control and management of public space, the definition of which was necessarily selective in this vastly extensive city. The collection ends with an essay on the contemporary debate for revitalizing Rome's eastern periphery. Through this long-term chronological approach the volume offers a truly unique insight into the urban development of one of Europe's most important cities, and concludes with a discuss of the challenges public space faces today after having served for so many centuries as a driving force in urban history.

Resilience in Papal Rome, 1656-1870 Marina Formica,Donatella Strangio,2023-09-23 This book analyses the evolution of the city of Rome, in particular, papal Rome, from the plague of 1656 until 1870 when it became the capital of the Kingdom of Italy. The authors explore papal Rome as a resilient city that had to cope with numerous crises during this period. By focusing on a selection of different crises in Rome, the book combines cultural, political, and economic history to examine key turning points in the city's history. All the chapters are based on untapped original sources, chiefly from the State Archive in Rome, the Vatican Archives, the Rome Municipal Archives, the École Française Library, the National Library, and the Capitoline Library.
