Reti verdi e disegno della città contemporanea Lucia Nucci, 2016-03-20T00:00:00+01:00 Il sistema del verde viene oggi riproposto in alcuni piani urbanistici più recenti secondo un disegno di struttura caratterizzato dalla continuità e dal paradigma reticolare; esso è utilizzato come componente primaria di un'operazione di riqualificazione ed integrazione della città consolidata e della città contemporanea caratterizzata dalla diffusione insediativa. La ricerca indaga su: i nuovi significati attribuiti al verde urbano con l'impiego del paradigma reticolare continuità/integrazione; il ruolo che questo può assumere quale strumento di riqualificazione ed integrazione urbana, a partire dal riutilizzo degli open space in dismissione e degli spazi residuali; la reale fattibilità ed efficacia, insieme ai limiti, delle tesi generali e delle sperimentazioni progettuali proposte o avviate su questi temi. Il campo di approfondimento è offerto dalle tesi sulla riqualificazione urbana di Rogers e dal dibattito e le riforme da queste suscitate che hanno determinato l'impostazione del Nuovo Piano di Londra (2003) e dalle

prime sperimentazioni progettuali avviate per la riqualificazione di parti della città. Il percorso consente di verificare l'applicabilità di queste tesi alla riqualificazione della città europea. Le motivazioni ed il campo problematico della ricerca prendono le mosse dal considerare la larga disponibilità nella città contemporanea, insieme alle grandi aree di dismissione, di aree e spazi minori residuali del processo insediativo; come queste aree siano riconducibili a tipologie e fattori assai diversi, come esse siano oggetto di usi impropri o inadeguati; infine come i comportamenti ricorrenti nella progettazione tendano a trascurare o ignorare questi residui o ad utilizzarli in una visione frammentata dello spazio pubblico e del verde. Recenti esperienze hanno dimostrato come questi spazi ed aree residue possano essere oggetto di una strategia più complessiva per la riqualificazione della città contemporanea.

*Urban Parks Between Safety and Aesthetics* Isabella M. Mambretti, Isabella Margherita Mambretti, 2011 The question of how to live in the city and increase the quality of urban life creates new challenges for both urban policies and academic research. Urban parks are important keys for achieving a broader understanding of the urban landscape. Open green spaces in every form are essential for life in our ever more urbanised society and are becoming a vital issue for the liveability of the urban environment. The purpose of the present research is to acquire a more thorough knowledge of the evaluation of urban parks. The study uses statistical analysis methods combined with landscape planning and visualisation methods. The research provides an innovative and sophisticated point of view along with the means to improve the comprehension of people's preferences for alternative urban park scenarios. The results are expected to create an advanced discussion platform and make a contribution towards improving knowledge of the public's perception of urban parks. The investigation was conducted with empirical experiments on two parks in Zurich. The functional component of the research is the visualisation of spatial data using powerful visualisation tools. The theoretical prospect is the achievement of broader knowledge about individuals' perception of open green spaces, focusing on previously unexplored experimental research combining conjoint analysis and visualisation methods. The experiments created for the research are effective for modelling and explaining the significance that people assign to specific dimensions characterising different park scenarios. Two motivations are at the base of the research: exploring the use of conjoint analysis methods to study virtual urban parks and evaluating the use of visual stimuli with conjoint analysis.

*Citizens' Participation in Urban Transformations* Chiara Scanagatta, 2023-07-11 Humanity has always seen a close relationship between the place of living and the ways of life. Today, the quality of life certainly improves if places of living are attentive to the ever-changing needs of communities. The space of the city should not be static, but dynamic and flexible. The aim of this work is therefore to pay more and more attention to the in-depth studies, on which many architectural scholars

are working today, necessary for the fabbricato to be more and more responsive to the population that uses it, both in the sense of the physical spaces and the materials that guarantee its quality and efficiency. It is a theme to which architects are paying plenty of attention because it is becoming increasingly urgent, also in view of the European Union's expectations on the matter, to investigate the urban and building components and the effects they produce in terms of e.g., quality of materials, functionality of spaces, living habits of the population, proximity of services. This work arose from an experience of personal collaboration in a European project of innovative participatory design carried out in Verona Sud during the PhD period. Subsequently, it was analysed and examined in depth which theoretical and operational aspects actually make it possible to implement urban transformations that link the relations between the environment and quality of life. In this large field, it therefore becomes predominant to re-propose the centrality of attention to the community's expectations, ways of living, decision-making systems, techniques used, knowledge and understanding of objective data on the environment, and thus to overcome common stereotypes on all these issues.

Città e guerra : difese, distruzioni, permanenze delle memorie e dell'immagine urbana. Tomo II : tracce e patrimoni Maria Ines Pascariello, Alessandra Verapalumbo, Raffaele Amore, 2023-12-31 [Italiano]: In un momento così significativo per la storia europea e mondiale, questo volume vuole essere la raccolta di riflessioni scientifiche condotte sui rapporti tra le scelte politiche, le azioni militari e la fisionomia delle città e del paesaggio urbano, sull'evoluzione delle strutture e delle tecniche di difesa, sulla rappresentazione della guerra e dei suoi effetti sull'immagine urbana, sul recupero delle tracce della memoria cittadina. Da una parte il campo delle Digital Humanities apre nuove prospettive per studiare l'immagine della città prima, durante e dopo la guerra, dall'altro le tecnologie digitali impegnano studiosi e ricercatori di varie discipline: in particolare nell'ambito del disegno viene esplorato il ruolo della rappresentazione nella formulazione dei progetti urbani di difesa e nella

documentazione degli eventi bellici e delle tracce lasciate dai conflitti, mentre nell'ambito del restauro vengono approfondite le sfide teoriche e pratiche imposte dai danni arrecati dai conflitti ai centri storici, passando in rassegna casi studio, soluzioni e dibattiti relativi alla conservazione del patrimonio urbano coinvolto in azioni di guerra, con un'attenzione particolare all'identità e alla memoria collettiva./[English]: At such a significant moment in European and world history, this volume aims to be a collection of scientific reflections about the relationships between political choices, military actions and the physiognomy of cities and the urban landscape, about the evolution of defence structures and techniques, about the representation of war and its effects on the urban image, and about the recovery of the traces of city memory. On the one hand the field of Digital Humanities opens up new perspectives to study the image of the city before, during and after the war, on the other hand digital technologies engage academics and researchers from various disciplines: In particular, in the area of drawing, the role of representation in the formulation of urban defence projects and in the documentation of wartime events and the traces left behind by conflicts is explored, while in the area of conservation, the theoretical and practical challenges imposed by the damage caused by conflicts to historic centres are explored, reviewing case studies, solutions and debates relating to the conservation of urban heritage involved in wartime actions, with a focus on identity and collective memory.
