**Marco Polo** Marina Münkler,2015-02-18 Marco Polo ist eine der bekanntesten Figuren des Mittelalters und einer der ganz wenigen Fernostreisenden dieser Zeit. Als Kaufmann und Abenteurer ist er das Synonym für den „merchant adventurer“, aber er ist viel mehr als das, ein Chronist der Fremde, der erste europäische Reisende, der mit der Autorität des Augenzeugen vom faszinierenden Raum des Fernen Ostens berichtete. Marina Münkler erzählt, wie aus dem Sohn einer venezianischen Kaufmannsfamilie jene schillernde Gestalt werden konnte, die wir heute kennen, und sie zeigt, dass alle Versuche, ihn als einen Hochstapler darzustellen, der nie in China gewesen sei, in die Irre führen.

**Brazilian Geography** Rubén C. Lois González,Marco Antonio Mitidiero Junior,2022-11-28 This book presents the history and theoretical contributions of Brazilian geography since the late twentieth century and shows how this sphere of knowledge has been organically integrated with social and territorial issues and with social movements. The relationship between the subjects and objects of research in Brazilian geography has been centred on the understanding and transformation of realities marked by injustice and inequality. Against this backdrop, the geography of the country has developed by integrating, relating to, and forming part of those realities as it headed out into the streets. Brazilian geography continues to hold theoretical debate in high regard as a result of the influence of critical theory. This book thus covers the

theoretical approaches in Brazilian geography, its different lines of research, and above all its character as manifested in culture and society.

**Das italienische Zivilrecht in der Verfassungswirklichkeit** Pietro Perlingieri,2016-12-27 In dem Werk ist das gesamte italienische Zivilrecht dargestellt – unter besonderer Berücksichtigung der italienischen Verfassung und des europäischen Gemeinschaftsrechts. In klarer und gleichzeitig problem- und praxisbezogener Form stellt der Autor die einzelnen Rechtsinstitute vor und vermittelt die Techniken des Zivilrechts. Dabei arbeitet er heraus, dass das geltende Zivilrecht trotz des Pluralismus des Gemeinschaftsrechts immer noch Ausdruck einer Rechtsordnung ist, die von einheitlichen, in der Verfassung verankerten Grundwerten geprägt ist.

**Fault Lines** Giacomo Parrinello,2015-05-01 Earth's fractured geology is visible in its fault lines. It is along these lines that earthquakes occur, sometimes with disastrous effects. These disturbances can significantly influence urban development, as seen in the aftermath of two earthquakes in Messina, Italy, in 1908 and in the Belice Valley, Sicily, in 1968. Following the history of these places before and after their destruction, this book explores plans and developments that preceded the disasters and the urbanism that emerged from the ruins. These stories explore fault lines between "rural" and "urban," "backwardness" and "development," and "before" and "after," shedding light on the role of environmental forces in the history of human habitats.

**Drought** Ana Iglesias,Dionysis Assimacopoulos,Henny A.J. Van Lanen,2018-11-05 Comprehensive coverage of understanding, prevention, and risk management of extreme drought events, with examples of approaches followed in water-stressed regions This book describes the progress made in our understanding of severe drought and explains how we can deal with—and even avoid—complete devastation brought on by such punishing events. It brings forward advanced knowledge on drought hazard analysis and management, particularly from EU-funded research projects, to assist in the development of the corresponding drought management plans. In addition, this book addresses issues of social vulnerability to drought and science-policy interfaces, which are important elements of drought management. Divided into three sections, this book covers the diagnosis of physical processes, historic drought and the trends in historic drought, and perspectives of future drought. It takes an academic approach to risk evaluation, including characterization of drought episodes, development of indicators of risk in hydrological and agricultural systems, and analysis of the role of socio-economic instruments for risk mitigation. It also discusses the interactions that have resulted in the complex institutional framework, and highlights the importance of stakeholder involvement and awareness building for successful drought management. In addition, Drought: Science and Policy features a collection of case studies that include the description of effective measures

taken in the past. Addresses the growing issue of drought preparedness planning, monitoring, and mitigation Teaches methodologies and lessons focused on specific, drought-prone regions so the applications have more significance Provides examples of approaches followed in water-stressed regions (river basin and national scale) with drought analyses at the pan-European scale Drought: Science and Policy will be an invaluable reference for researchers and practitioners in the field as well as Masters students taking relevant courses in drought management and natural disaster management.

**Nature and History in Modern Italy** Marco Armiero, Marcus Hall, 2010-08-15 Is Italy *il bel paese*—the beautiful country—where tourists spend their vacations looking for art, history, and scenery? Or is it a land whose beauty has been cursed by humanity's greed and nature's cruelty? The answer is largely a matter of narrative and the narrator's vision of Italy. The fifteen essays in *Nature and History in Modern Italy* investigate that nation's long experience in managing domesxadtxadcatd rather than wild natures and offer insight into these conflicting visions. Italians shaped their land in the most literal sense, producing the landscape, sculpting its heritage, embedding memory in nature, and rendering the two different visions inseparxadable. The interplay of Italy's rich human history and its dramatic natural diversity is a subject with broad appeal to a wide range of readers.

**Regulating Coastal Zones** Rachelle Alterman, Cygal Pellach, 2020-11-26 *Regulating Coastal Zones* addresses the knowledge gap concerning the legal and regulatory challenges of managing land in coastal zones across a broad range of political and socio-economic contexts. In recent years, coastal zone management has gained increasing attention from environmentalists, land use planners, and decision-makers across a broad spectrum of fields. Development pressures along coasts such as high-end tourism projects, luxury housing, ports, energy generation, military outposts, heavy industry, and large-scale enterprise compete with landscape preservation and threaten local history and culture. Leading experts present fifteen case studies among advanced-economy countries, selected to represent three groups of legal contexts: signatories to the 2008 Mediterranean ICZM Protocol, parties to the 2002 EU Recommendation on Integrated Coastal Zone Management, and the USA and Australia. This book is the first to address the legal-regulatory aspects of coastal land management from a systematic cross-national comparative perspective. By including both successful and less-effective strategies, it aims to inform professionals, graduate students, policy makers, and NGOs of the legal and socio-political challenges as well as the better practices from which others could learn.

**Environment and Urbanization in Modern Italy** Federico Paolini, 2020-05-12 From the second half of the 1940s, when postwar reconstruction began in Italy, there were three notable driving forces of environmental change: the uncontrollable process of urban drift, fueled by considerable migratory flows from the countryside and southern regions toward the cities where large-scale productive activities were beginning to amass; unruly industrial development, which was tolerated since it was seen as the necessary tribute to be paid to progress and modernization; and mass consumption. In his fourth book,

Federico Paolini presents a series of essays ranging from the uses of natural resources, to environmental problems caused by means of transport, to issues concerning environmental politics and the dynamics of the environment movement. Paolini concludes the book with a forecast about the environmental problems that will emerge in the public debate of the twenty-first century.

**Higher Education and Innovation** Vincenzo Sapienza, Marius Voica, Luca Finocchiaro, 2021-02-18 This book highlights the design of an educational module for an innovative intensive program. The theme is very relevant in the contemporary approach to teaching activities. In fact, thanks to the didactic design, it is possible to obtain a strong relationship between teachers and learners, as required by the Bologna Process. It also allows a stronger definition of learning outcomes. After a general excursus on the subject, the manuscript refers to a recent experience carried out in the Aeolian Island for the Erasmus + Programme, called VVITA. In it, an international group of students and teachers spent a period in the Aeolian Islands, to focus on the features of local vernacular architecture. The attention has been addressed to the Aeolian House, which is a wonderful example of ante litteram sustainable architecture. On the island of Filicudi, one of the most beautiful of the archipelago, it has preserved its characteristics intact. The book is completed by teachers' lectures and students' final reports.
