Non ci resta che crescere Tommaso Nannicini,2011-09-28T00:00:00+02:00 Perché in Italia, da oltre un decennio, si fa un gran parlare di riforme finendo per fare poco o nulla? La risposta apparentemente semplice: i potenziali vincitori non hanno voce presso partiti e parti sociali, mentre i potenziali sconfitti sanno bene come far pesare la loro influenza. Eppure, mai come in questa fase storica, i costi delle mancate riforme si fanno avvertire. L'Italia è un paese a rischio di "dolce declino", che ha smesso di crescere per la sua incapacità di adattare un modello di sviluppo e d'intervento pubblico nell'economia. Dal welfare al fisco, dalle liberalizzazioni alla scuola, alcuni esperti prendono di petto, con rigore e passione civile, quattro domande. Che cosa si può fare subito (e a costo zero) per rimettere in moto l'economia italiana? Che cosa nell'arco di due legislature? Quali interessi si oppongono alle riforme e come arginarli (o compensarli)? Quali interessi avrebbero tutto da guadagnare e come mobilitarli? I tempi sono maturi perché ci si ponga l'obiettivo di passare dalle parole ai fatti, scommettendo sul consenso di quanti pagano i costi del mancato dinamismo, a partire da interessi diffusi, giovani, donne e neoborghesia del capitale umano.

Genitori alla pari Alessandra Minello, Tommaso Nannicini,2024-04-30T00:00:00+02:00 Due mesi: ogni anno una madre lavoratrice, rispetto a un padre lavoratore, passa due mesi in più a prendersi cura della famiglia, mentre lui legge, studia, va in palestra, prende una birra con gli amici, fa gli straordinari, gioca a calcetto col capo da cui dipende la sua promozione. Uno squilibrio così sfacciato viene solitamente accettato perché la nostra cultura collettiva si basa su una semplice equazione: donna uguale cura. Genitori alla pari ci spiega perché questa equazione è sbagliata. E dimostra la necessità di politiche che parifichino il tempo di cura, esaltandone la condivisione. Le proposte di Alessandra Minello e Tommaso Nannicini fanno leva su tanti strumenti - dai congedi paritari a un "tempo di base", dal sostegno alle imprese a servizi integrati per la genitorialità - e si pongono un obiettivo prioritario: fare in modo che uomini e donne possano investire lo stesso tempo nel lavoro retribuito e in quello non retribuito. Partendo da un breve quadro in Italia e in Europa della fecondità e delle politiche per le famiglie, gli autori propongono politiche di tipo nuovo, egualitarie e incisive. Danno centralità a un allargamento della popolazione genitoriale, a partire dalle famiglie omoaffettive, e si concentrano sui bisogni delle famiglie in tutte le loro possibili composizioni. Genitori alla pari propone non solo un cambiamento politico, ma una vera rivoluzione del paradigma culturale con cui pensiamo e viviamo la genitorialità a livello sociale ed economico. Per far sì che, tra tempo e

lavoro, trovi spazio la libertà di tutte e di tutti. Ogni anno una madre lavoratrice passa due mesi in più a prendersi cura della famiglia rispetto a un padre lavoratore. È tempo non solo di un cambiamento politico, ma di una rivoluzione del paradigma culturale con cui pensiamo e viviamo la genitorialità a livello sociale ed economico.

Competing on Good Politicians Vincenzo Galasso, 2009 Is electoral competition good for political selection? To address this issue, we introduce a theoretical model in which ideological parties select candidates between party loyalists and experts, and allocate them into the electoral districts. Non-ideological voters, who care about national and local policies, strongly prefer experts. We show that parties compete on good politicians by allocating them to the most contestable districts. Empirical evidence on Italian members of parliament confirms this prediction. We find that politicians with higher ex-ante quality - as measured by years of schooling, previous market income, and local government experience - are more likely to run in a contestable district. Indeed, despite being different on average, the characteristics of politicians belonging to opposite parties converge to high-quality levels in close races. Furthermore, politicians elected in contestable districts make fewer absences in parliament; this is shown to be driven more by a selection effect than by reelection incentives.

ANNO 2021 L'AMMINISTRAZIONE TERZA PARTE ANTONIO GIANGRANDE, Antonio Giangrande, orgoglioso di essere diverso. Si nasce senza volerlo. Si muore senza volerlo. Si vive una vita di prese per il culo. Noi siamo quello che altri hanno voluto che diventassimo. Facciamo in modo che diventiamo quello che noi avremmo (rafforzativo di saremmo) voluto diventare. Rappresentare con verità storica, anche scomoda ai potenti di turno, la realtà contemporanea, rapportandola al passato e proiettandola al futuro. Per non reiterare vecchi errori. Perché la massa dimentica o non conosce. Denuncio i difetti e caldeggio i pregi italici. Perché non abbiamo orgoglio e dignità per migliorarci e perché non sappiamo apprezzare, tutelare e promuovere quello che abbiamo ereditato dai nostri avi. Insomma, siamo bravi a farci del male e qualcuno deve pur essere diverso!

Positive Spillovers from Negative Campaigning Vincenzo Galasso, Tommaso Nannicini, Salvatore Nunnari, 2020 Negative advertising is frequent in electoral campaigns, despite its ambiguous effectiveness: negativity may reduce voters' evaluation of the targeted politician but have a backlash effect for the attacker. We study the effect of negative advertising in electoral races with more than two candidates with a large scale field experiment during an electoral campaign for mayor in Italy and a survey experiment in a fictitious mayoral campaign. In our field experiment, we find a strong, positive spillover effect on the third main candidate (neither the target nor the attacker). This effect is confirmed in our survey experiment, which creates a controlled environment with no ideological components nor strategic voting. The negative ad has no impact on the targeted incumbent, has a sizable backlash effect on the attacker, and largely benefits the idle candidate. The attacker is perceived as less cooperative, less likely to lead a successful government, and more ideologically extreme.

Meet the Press Francesco Drago,2013 This paper evaluates the effects of changes in the supply of news provided by newspapers on electoral participation, political selection, and government efficiency. We address these issues in the Italian context by constructing a new dataset covering the presence of local news by different types of newspapers (i.e., local and national) for all cities above 15,000 inhabitants in the period 1993-2010. The identification strategy exploits discrete changes in the number of newspapers supplying local news and the precise timing of these events. The results show that the entry of newspapers in the market for local news leads to an increase in turnout in municipal elections, a higher probability of the incumbent mayor being reelected, and an improvement in the efficiency of the municipal government (as measured by the speed of revenue collection). The effect of newspapers on government efficiency is larger when mayors are not term-limited and thus face reelection incentives. Our evidence shows that newspapers do not have a major impact on the selection of politicians, but they play a relevant role in keeping politicians accountable once they are in office. Competition plays a relevant role, as the effects are not limited to the first newspaper entering the market.

Trade Openness and Growth Andreas Billmeier, Tommaso Nannicini, 2007-07 Studies of the impact of trade openness on growth are based either on cross-country analysis-which lacks transparency-or case studies-which lack statistical rigor. We apply transparent econometric methods drawn from the treatment evaluation literature to make the comparison between treated (i.e., open) and control (i.e., closed) countries explicit while remaining within a unified statistical framework. First, matching estimators highlight the rather far-fetched country comparisons underlying common cross-country results. When appropriately restricting the sample, we confirm a positive and significant effect of openness on growth. Second, we apply synthetic control methods-which account for endogeneity due to unobservable heterogeneity-to countries that liberalized their trade regime and we show that trade liberalization has often had a positive effect on growth.

Fighting Populism on Its Own Turf Vincenzo Galasso, Massimo Morelli, Tommaso Nannicini, Piero Stanig, 2022 We evaluate how traditional parties may respond to populist parties on issues that are particularly fitting for populist messages. The testing ground is the 2020 Italian referendum on the reduction of members of Parliament. We implement a large-scale field experiment, with almost one million impressions of programmatic advertising, and a survey experiment. Our treatments are an informative video on the likely costs of cutting MPs, aimed at deconstructing the populist narrative, and a reducing trust video aimed at attacking the credibility of populist politicians. Our field experiment shows that the latter video is more effective at capturing the viewers' attention. It decreases the turnout rate and, albeit less, the Yes votes (in favor of cutting MPs). We present a theoretical framework based on trust in traditional parties and information acquisition to account for our findings and provide additional predictions. In the survey experiment, both (unskippable) videos reduce the Yes votes and

increase the share of undecided. Confirming the theory, for voters of traditional parties the effects are concentrated among people with low information, while for voters of populist parties previous information plays no role. Our findings show that campaign messages should target not only demographic characteristics but also trust attitudes.

Beruf - Politik - Transparenz Stephan Malessa,2012-10-31 Der Skandal um Nebentätigkeiten von Bundestagsabgeordneten im Jahr 2005 hat gezeigt, wie kritisch die Öffentlichkeit die Finanzierung der politischen Klasse beobachtet. Der Skandal führte zur Einführung von Transparenzregeln, die nicht nur vor dem Bundesverfassungsgericht diskutiert wurden. Stephan Malessa untersucht die Systemkonformität der Nebentätigkeiten-Regeln aus politikwissenschaftlicher Perspektive. Dabei analysiert er zunächst die Politikbezüge der veröffentlichten Nebentätigkeiten. Darüber hinaus überprüft er durch einen internationalen Vergleich den Zusammenhang zwischen der Professionalisierung von Parlamenten und der Schärfe der jeweiligen Transparenzregeln.

The New Populism Marco Revelli,2019-07-02 A crisp and trenchant dissection of populism today The word 'populism' has come to cover all manner of sins. Yet despite the prevalence of its use, it is often difficult to understand what connects its various supposed expressions. From Syriza to Trump and from Podemos to Brexit, the electoral earthquakes of recent years have often been grouped under this term. But what actually defines 'populism'? Is it an ideology, a form of organisation, or a mentality? Marco Revelli seeks to answer this question by getting to grips with the historical dynamics of so-called 'populist' movements. While in the early days of democracy, populism sought to represent classes and social layers who asserted their political role for the first time, in today's post-democratic climate, it instead expresses the grievances of those who had until recently felt that they were included. Having lost their power, the disinherited embrace not a political alternative to -isms like liberalism or socialism, but a populist mood of discontent. The new populism is the 'formless form' that protest and grievance assume in the era of financialisation, in the era where the atomised masses lack voice or organisation. For Revelli, this new populism the child of an age in which the Left has been hollowed out and lost its capacity to offer an alternative.

The Liberalization of Temporary Work Agencies in the Italian Labor Market Tommaso Nannicini,European University Institute. Department of Economics,2005

Historical Roots of Political Extremism Nicola Fontana,Tommaso Nannicini,Guido Enrico Tabellini,2017 The Italian civil war and the Nazi occupation of Italy occurred at a critical juncture, just before the birth of a new democracy and when, for the first time in a generation, Italians were choosing political affiliations and forming political identities. In this paper we

study how these traumatic events shaped the new political system. We exploit geographic heterogeneity in the intensity and duration of the civil war, and the persistence of the battlefield along the Gothic line cutting through Northern-Central Italy. We find that the Communist Party gained votes in the post-war elections where the Nazi occupation and the civil war lasted longer, mainly at the expense of the centrist and catholic parties. This effect persists until the early 1990s. Evidence also suggests that this is due to an effect on political attitudes. Thus, the foreign occupation and the civil war left a lasting legacy of political extremism and polarization on the newborn Italian democracy.

So Closed Vincenzo Galasso, Tommaso Nannicini, Centre for Economic Policy Research (Great Britain), 2015 We analyze political selection in a closed list proportional system where parties have strong gate-keeping power, which they use as an instrument to pursue votes. Parties face a trade-off between selecting loyal candidates or experts, who are highly valued by the voters and thus increase the probability of winning the election. Voters can be rational or behavioral. The former care about the quality mix of the elected candidates in the winning party, and hence about the ordering on the party list. The latter only concentrate on the quality type of the candidates in the top positions of the party list. Our theoretical model shows that, to persuade rational voters, parties optimally allocate loyalists to safe seats and experts to uncertain positions. Persuading behavioral voters instead requires to position the experts visibly on top of the electoral list. Our empirical analysis, which uses data from the 2013 National election in Italy -- held under closed list proportional representation -- and from independent pre-electoral polls, is overall supportive of voters' rational behavior. Loyalists (i.e., party officers or former members of Parliament who mostly voted along party lines) are overrepresented in safe positions, and, within both safe and uncertain positions, they are ranked higher in the list.

Kommunale Schulden in Deutschland Steffen Zabler, 2021-01-14 Die Evaluation des Erfolgs von Instrumenten bei der Bekämpfung kommunaler Schulden stellt angesichts der Problemlage vieler Kommunen eine gleichermaßen praxis- wie wissenschaftsrelevante Forschungslücke dar, ist allerdings mit den Herausforderungen teils geringer Fallzahlen und unklaren Ursache-Wirkungszusammenhängen konfrontiert. Die vorliegende quantitative Analyse nimmt die kausalen Effekte von Sparkommissaren, dem Stärkungspakt Stadtfinanzen und freiwilligen Schuldenbremsen auf die Entwicklung der Verschuldung mithilfe synthetischer Matching-Modelle in den Blick. Die Ergebnisse deuten dabei keineswegs auf einen durchgängigen Erfolg der Instrumente hin und legen den Schluss nahe, dass ein erfolgreicher Einsatz stark kontextspezifisch ist.

Policies in Hard Times Gunes Gokmen, Tommaso Nannicini, Massimiliano Gaetano Onorato, Chris Papageorgiou, 2020 It is commonly argued that crises open up a window of opportunity to implement policies that otherwise would not have the necessary political backing. The argument goes that the political cost of deep reforms declines as crises unravel structural problems that need to be urgently rectified and the public is more willing to bear the pains associated with such reforms.

This paper casts doubt on this prevalent view by showing that not only the crises-reforms nexus is unfounded in the data, but rather crises are associated with slowing structural reforms depending on the institutional environment. In particular, we look at measures of reforms in international trade, agriculture, network industries, and financial markets. We find that, after a financial crisis, democracies neither open nor close their economy. On the contrary, autocracies reduce reforms in multiple economic sectors, as the fear of regime change lead non-democratic rulers to please vested economic interests.
