Public Health and Municipal Policy Making Professor Marjaana Niemi,2013-06-28 Public health policies had a profound impact on urban life in the late nineteenth and early twentieth centuries, yet relatively few people took an active interest in the formulation of these policies. In this book Marjaana Niemi examines the impact of different political aims and pressures on 'scientific' health policies through the analysis of public health programmes in two case studies, one in Birmingham and the other in Gothenburg. By examining early twentieth-century campaigns concerned with infant welfare and the prevention of tuberculosis, the book provides illuminating insights into the relationship between public health and the regulation of urban life. Not only does the book analyse the processes whereby different political aims became embedded in these 'apolitical' health campaigns, but it also highlights the important part that the campaigns played in urban politics and governance. The political aims which public health campaigns advanced are explored by comparing health policies in Britain and Sweden, where officials were part of one public health community, enjoying close links, attending the same conferences and contributing to the same journals. The problems they dealt with were often similar and in both countries health authorities claimed scientific grounds for their programmes. Yet the policies they pursued were often strikingly different. Through examination of two different national approaches, the book does justice to the full complexity of the policy-making process and illuminates the wide range of factors that affected municipal policies.

The Digital City Germaine R. Haleboua,2020-01-21 Shows how digital media connects people to their lived environments Every day, millions of people turn to small handheld screens to search for their destinations and to seek

recommendations for places to visit. They may share texts or images of themselves and these places en route or after their journey is complete. We don't consciously reflect on these activities and probably don't associate these practices with constructing a sense of place. Critics have argued that digital media alienates users from space and place, but this book argues that the exact opposite is true: that we habitually use digital technologies to re-embed ourselves within urban environments. The Digital City advocates for the need to rethink our everyday interactions with digital infrastructures, navigation technologies, and social media as we move through the world. Drawing on five case studies from global and mid-sized cities to illustrate the concept of "re-placemg," Germaine R. Haleboua shows how different populations employ urban broadband networks, social and locative media platforms, digital navigation, smart cities, and creative placemaking initiatives to turn urban spaces into places with deep meanings and emotional attachments. Through timely narratives of everyday urban life, Haleboua argues that people use digital media to create a unique sense of place within rapidly changing urban environments and that a sense of place is integral to understanding contemporary relationships with digital media.
