Metaphor and Gender in Business Media Discourse V. Koller,2004-05-25 This new study reconciles cognitive metaphor theory with Critical Discourse Analysis to offer a fresh approach to the study of metaphor. In applying this framework to a substantial corpus of texts from business magazines, the author shows how metaphors of war, sports and evolutionary struggle are used to construct business as a masculinized social domain. In view of the subtle but pervasive socio-cognitive impact of these metaphors, the study raises the question of possible alternatives and the scope for change in business media discourse.

Discourses of Perfection Anne-Mette Hermans,2021-03-22 This book explores editorial and advertising discourses related to cosmetic procedures and beauty products and services in UK lifestyle magazines, offering a holistic perspective on the normalisation of cosmetic procedures and the societal context in which particular perceptions have flourished. The volume examines the societal climate that contributed to cultural perceptions of the body as object and project, and constructions of masculinities and femininities as context for developments in lifestyle magazines' content on beauty and cosmetic procedures. Integrating approaches from Critical Discourse Analysis, Thematic Analysis, and Content Analysis, Hermans explores the varying ways in which cosmetic procedures and other beauty products are marketed to different audiences and examines phenomena such as the problem/solution rhetoric, and developments in beauty advertising discourse specifically targeted at men. The book also investigates the continuum view of beauty products and cosmetic procedures, and examines the implications of these blurred boundaries for the regulation of the cosmetic surgery industry. This innovative contribution to research on the representation of cosmetic procedures and beauty products in the media will be of interest to scholars researching at the intersection of language, gender, individualised body projects, and sexuality.

Face Value Autumn Whitefield-Madrano,2016-06-21 "A fascinating look" (The Boston Globe) at how we think and talk about beauty in the twenty-first century—and the unexpected and often positive way that beauty shapes our lives. For decades, we've thought of beauty as a negative influence in our lives. We feel insecure in the face of retouched, impossibly-perfect images. We worry primping and preening are a distraction and a trap. But in Face Value, journalist Autumn Whitefield-Modrano dispels this one-sided beauty myth and examines the relationship between appearance and science, social media, sex, friendship, language, and advertising to show how beauty actually affects us day to day. Through meticulous research and interviews with dozens of women across all walks of life, she reveals surprising findings, like wearing makeup can actually relax you, you can convince people you're better looking just by tweaking your personality, and the ways beauty can be a powerful tool of connection among women. Provocative and empowering, it celebrates a relaxed brand of feminism, one in which it's equally okay to feel fierce in your fake eyelashes and confident when going makeup-free. Face Value is "an immensely valuable work, one that seamlessly—and impressively—combines the tropes of the academic lit review and the memoir and the work of cultural criticism into an engaging, and timely, follow-up to The Beauty Myth" (The Atlantic).

Contemporary Latina/o Media Arlene Dávila,Yeidy M. Rivero,2014-09-12 The cultural politics creating and consuming Latina/o mass media. Just ten years ago, discussions of Latina/o media could be safely reduced to a handful of TV channels, dominated by Univision and Telemundo. Today, dramatic changes in the global political economy have resulted in an unprecedented rise in major new media ventures for Latinos as everyone seems to want a piece of the Latina/o media market. While current scholarship on Latina/o media have mostly revolved around important issues of representation and stereotypes, this approach does not provide the entire story. In Contemporary Latina/o Media, Arlene Dávila and Yeidy M. Rivero bring together an impressive range of leading scholars to move beyond analyses of media representations, going behind the scenes to explore issues of production, circulation, consumption, and political economy that affect Latina/o mass media. Working across the disciplines of Latina/o media, cultural studies, and communication, the contributors examine how Latinos are being affected both by the continued Latin Americanization of genres, products, and audiences, as well as by the whitewashing of "mainstream" Hollywood media where Latinos have been consistently bypassed. While focusing on Spanish-language television and radio, the essays also touch on the state of Latinos in prime-time television and in digital and alternative media. Using a transnational approach, the volume as a whole explores the ownership, importation, and circulation of talent and content from Latin America, placing the dynamics of the global political economy and cultural politics in the foreground of contemporary analysis of Latina/o media.

Growing Local Robert P. King,Michael Stephen Hand,Miguel I. Gómez,2014 In an increasingly commercialized world, the demand for better quality, healthier food has given rise to one of the fastest growing segments of the U.S. food system: locally grown food. Many believe that relocalization of the food system will provide a range of public benefits, including lower carbon emissions, increased local economic activity, and closer connections between consumers, farmers, and communities. The structure of local food supply chains, however, may not always be capable of generating these perceived benefits. Growing Local reports the findings from a coordinated series of case studies designed to develop a deeper, more nuanced understanding of how local food products reach consumers and how local food supply chains compare with mainstream

supermarket supply chains. To better understand how local food reaches the point of sale, Growing Local uses case study methods to rigorously compare local and mainstream supply chains for five products in five metropolitan areas along multiple social, economic, and environmental dimensions, highlighting areas of growth and potential barriers. Growing Local provides a foundation for a better understanding of the characteristics of local food production and emphasizes the realities of operating local food supply chains.

Uninhibited, Robust, and Wide-Open Lee C. Bollinger,2010-01-15 Lee Bollinger is one of our foremost experts on the First Amendment--both an erudite scholar and elegant advocate. In this sweeping account, he explores the troubled history of a free press in America and looks toward the challenges ahead. The first amendment guaranteed freedom of the press in seemingly clear terms. However, over the course of American history, Bollinger notes, the idea of press freedom has evolved, in response to social, political, technological, and legal changes. It was not until the twentieth century that freedom of the press came to be understood as guaranteeing an uninhibited, robust and wide-open public discourse. But even during the twentieth century, government continually tried to erect barriers: the sedition laws of World War One, the use of libel law, the Pentagon Papers case, and efforts to limit press access to information. Bollinger utilizes this history to explore the meaning of freedom of the press in our globalized, internet-dominated era. As he shows, we have now entered uncharted territory. What does press freedom mean when our news outlets can instantaneously disseminate information throughout the world? When foreign media have immediate access to the American market? Bollinger stresses that even though the law will surely evolve in the coming years, we must maintain our commitment to a press that is uninhibited, robust, and wide-open, not only in America but everywhere. Given the new ability of foreign media to reach the United States via the Internet and vice versa, it is in America's national interest for press freedoms to expand overseas. While protecting the freedom of the press at home remains a crucial task, the next challenge is to help create a global public forum suitable for an increasingly interconnected world. Part of Oxford's landmark Inalienable Rights series, this book will set the agenda for how we think about the press in the twenty-first century.
